Author biographies	vii
1 Overview of cancer cachexia	1
Introduction	1
Epidemiology	3
Comorbidities	4
Disease burden	4
References	4
2 Pathophysiology	7
Introduction	7
Hormones and mediators	7
Negative nitrogen balance	13
Myostatin	14
Insulin-like growth factor-1	14
Oxidative stress	16
Anabolic hormones	16
Effects on antineoplastic therapy	17
References	20
3 Impact of cancer cachexia	25
Primary cachexia	27
Secondary cachexia	28
Quality of life	34
Impact of weight loss on survival	37
References	38
4 Patient assessment	41
Identification of patients with cachexia in clinical practice	41
References	48

5	Managing cancer cachexia	51
	Treatment goals in current standard of care	51
	Pharmacological treatments	52
	Non-pharmacological treatments	55
	Managing side effects	58
	Cancer cachexia in special populations	60
	References	69
6	Emerging treatments, current challenges, and future directions	73
	Emerging treatments	73
	Nutritional counseling	76
	Multimodal treatment	77
	References	80

Cancer Cachexia

Del Fabbro, E.; Inui, A.; Strasser, F.

2012, VIII, 83 p. 18 illus. in color., Softcover

ISBN: 978-1-910315-06-4
