<b>Preface</b>	<b>xi</b>
<b>Basic Terms and Notation</b>	<b>xvii</b>
<b>I Classical Extension-Trace Theorems and Related Results</b>	<b>1</b>
<b>1 Continuous and Lipschitz Functions</b>	<b>5</b>
Continuous Functions . . . . .	5
1.1 Notation and definitions . . . . .	6
1.2 Extension and trace problems: formulations and examples . . . . .	7
1.2.1 Example: Continuous functions . . . . .	9
1.2.2 Example: Uniformly continuous functions . . . . .	9
1.2.3 Example: Continuously differentiable functions on $\mathbb{R}^n$ . . . . .	10
1.2.4 Example: BMO and Sobolev spaces . . . . .	11
1.3 Continuous selections . . . . .	12
1.4 Simultaneous continuous extensions . . . . .	14
1.5 Extensions of continuous maps acting between metric spaces . . . . .	16
1.6 Absolute metric retracts . . . . .	17
Lipschitz Functions . . . . .	20
1.7 Notation and definitions . . . . .	20
1.8 Trace and extension problems for Lipschitz functions . . . . .	22
1.9 Lipschitz selection problem . . . . .	23
1.9.1 Counterexample . . . . .	23
1.9.2 Combinatorial–geometric selection results . . . . .	25
1.10 Extensions preserving Lipschitz constants . . . . .	27
1.10.1 Banach-valued Lipschitz functions . . . . .	27
1.10.2 Extension and the intersection property of balls . . . . .	30
1.10.3 Proof of Theorem 1.26 . . . . .	33
1.10.4 Lipschitz maps acting in spaces of constant curvature . . . . .	33
1.11 Lipschitz extensions . . . . .	42
1.12 Simultaneous Lipschitz extensions . . . . .	53

1.13	Simultaneous Lipschitz selection problem . . . . .	55
	Comments . . . . .	56
	Appendices . . . . .	61
A.	Topological dimension and continuous extensions of maps into $\mathbb{S}^n$ .	61
B.	Helly's topological theorem . . . . .	64
B.1.	The Classical Helly theorem and related results . . . . .	64
B.2.	Cohomology theory – a computational aspect . . . . .	67
B.3.	Helly's topological theorem . . . . .	71
C.	Sperner's lemma and its consequences . . . . .	73
D.	Contractions of $n$ -spheres . . . . .	78
<b>2</b>	<b>Smooth Functions on Subsets of <math>\mathbb{R}^n</math></b>	<b>83</b>
2.1	Classical function spaces: notation and definitions . . . . .	84
2.1.1	Differentiable functions . . . . .	84
2.1.2	$k$ -jets . . . . .	86
2.1.3	Lipschitz functions of higher order . . . . .	87
2.1.4	Extension and trace problems for classical function spaces .	92
2.2	Whitney's extension theorem . . . . .	93
2.3	Divided differences, local approximation and differentiability . . .	101
2.4	Trace and extension problems for univariate $C^k$ functions . . . .	120
2.4.1	Whitney's theorem . . . . .	120
2.4.2	Reformulation of Whitney's theorem . . . . .	129
2.4.3	Finiteness and linearity . . . . .	130
2.4.4	Basic conjectures . . . . .	133
2.5	Restricted main problem for some classes of domains in $\mathbb{R}^n$ . . . .	134
2.5.1	Quasiconvex domains . . . . .	134
2.5.2	Lipschitz domains . . . . .	149
2.6	Sobolev spaces: selected trace and extension results . . . . .	155
2.6.1	P. Jones' theorem and related results . . . . .	155
2.6.2	Peetre's nonexistence theorem . . . . .	160
	Comments . . . . .	165
	Appendices . . . . .	170
E.	Difference identities . . . . .	170
E.1.	Kemperman's identity . . . . .	170
E.2.	Marchaud's identity . . . . .	176
F.	Local polynomial approximation and moduli of continuity . . . .	178
F.1.	Degree of local polynomial approximation . . . . .	178
F.2.	Whitney's constants . . . . .	186
F.3.	Conjectures . . . . .	188
G.	Local inequalities for polynomials . . . . .	188

<b>II</b>	<b>Topics in Geometry of and Analysis on Metric Spaces</b>	<b>197</b>
<b>3</b>	<b>Topics in Metric Space Theory</b>	<b>201</b>
3.1	Principal concepts and related facts . . . . .	201
3.1.1	Pseudometrics, metrics and quasimetrics . . . . .	201
3.1.2	Metric and quasimetric spaces . . . . .	203
3.1.3	Paracompactness and continuous partitions of unity . . . .	212
3.1.4	Compact and precompact metric spaces . . . . .	215
3.1.5	Proper metric spaces . . . . .	219
3.1.6	Doubling metric spaces . . . . .	222
3.1.7	Metric length structure . . . . .	226
3.1.8	Basic metric constructions . . . . .	237
3.2	Measures on metric spaces . . . . .	252
3.2.1	Measure theory . . . . .	252
3.2.2	Integration . . . . .	254
3.2.3	Measurable selections . . . . .	255
3.2.4	Hausdorff measures . . . . .	256
3.2.5	Doubling measures . . . . .	263
3.2.6	Families of pointwise doubling measures . . . . .	266
3.3	Basic classes of metric spaces . . . . .	274
3.3.1	Ultrametric spaces . . . . .	274
3.3.2	Spaces of bounded geometry . . . . .	278
3.3.3	Riemannian manifolds as metric spaces . . . . .	280
3.3.4	Gromov hyperbolic spaces . . . . .	286
3.3.5	Sub-Riemannian manifolds . . . . .	291
3.3.6	Metric graphs . . . . .	292
3.3.7	Metric groups . . . . .	301
	Comments . . . . .	312
<b>4</b>	<b>Selected Topics in Analysis on Metric Spaces</b>	<b>317</b>
4.1	Dvoretzky type theorem for finite metric spaces . . . . .	318
4.2	Covering metric invariants . . . . .	326
4.2.1	Metric dimension . . . . .	326
4.2.2	Hausdorff dimension . . . . .	329
4.2.3	Hausdorff dimension of doubling metric spaces . . . . .	334
4.2.4	Nagata dimension . . . . .	341
4.3	Existence of doubling measures . . . . .	357
4.3.1	Finite metric spaces . . . . .	358
4.3.2	Compact metric spaces . . . . .	367
4.3.3	Complete metric spaces . . . . .	369
4.3.4	Dyn'kin conjecture . . . . .	369
4.3.5	Concluding remarks . . . . .	371
4.4	Space of balls . . . . .	372
4.4.1	$\mathcal{B}(\mathcal{M})$ as a length space . . . . .	373

4.4.2	$\mathcal{B}(\mathbb{R}^n)$ as a space of pointwise homogeneous type . . . . .	379
4.4.3	Generalized hyperbolic spaces $\mathbb{H}_\omega^{n+1}$ . . . . .	384
4.5	Differentiability of Lipschitz functions . . . . .	386
4.5.1	Lipschitz functions on $\mathbb{R}^n$ . . . . .	386
4.5.2	Lipschitz functions on metric spaces . . . . .	389
4.6	Lipschitz spaces . . . . .	394
4.6.1	Modulus of continuity . . . . .	394
4.6.2	Real interpolation of Lipschitz spaces . . . . .	397
4.6.3	Duality theorem . . . . .	405
	Comments . . . . .	413
<b>5</b>	<b>Lipschitz Embedding and Selections</b>	<b>417</b>
5.1	Embedding of metric spaces into the space forms of nonpositive curvature . . . . .	418
5.1.1	Finite metric spaces . . . . .	418
5.1.2	Infinite metric trees . . . . .	423
5.1.3	Doubling metric spaces . . . . .	438
5.1.4	Gromov hyperbolic spaces . . . . .	447
5.2	Roughly similar embeddings of Gromov hyperbolic spaces . . . . .	454
5.2.1	Coarse Geometry, a survey . . . . .	454
5.2.2	Coarse geometry of $\mathbb{H}^n$ . . . . .	458
5.2.3	The Bonk–Schramm theorem . . . . .	461
5.3	Lipschitz selections . . . . .	470
5.3.1	Barycenter and Steiner selectors . . . . .	470
5.3.2	Helly type result: a conjecture . . . . .	476
5.3.3	A Sylvester type selection result . . . . .	483
5.4	Simultaneous Lipschitz selections . . . . .	493
5.4.1	The problem . . . . .	493
5.4.2	Formulation of the main theorem . . . . .	494
5.4.3	Auxiliary results . . . . .	495
5.4.4	Proof of Theorem 5.66 . . . . .	497
5.4.5	Proof of Proposition 5.68 . . . . .	512
5.4.6	Proof of Proposition 5.69 . . . . .	519
	Comments . . . . .	523
	<b>Bibliography</b>	<b>527</b>
	<b>Index</b>	<b>557</b>

# Contents of Volume II

**Preface**

**Basic Terms and Notation**

**III Lipschitz Extensions from Subsets of Metric Spaces**

**6 Extensions of Lipschitz Maps**

6.1	Lipschitz $n$ -connectedness . . . . .	
6.2	Whitney covers . . . . .	
6.3	Main extension theorem . . . . .	
6.4	Corollaries of the main extension theorem . . . . .	
6.5	Nonlinear Lipschitz extension constants . . . . .	
	Comments . . . . .	

**7 Simultaneous Lipschitz Extensions**

7.1	Characterization of simultaneous Lipschitz extension spaces . . . . .	
7.2	Main extension result . . . . .	
7.3	Locally doubling metric spaces with uniform lattices . . . . .	
7.4	Spaces with the universal linear Lipschitz extension property . . . . .	
	Comments . . . . .	

**8 Linearity and Nonlinearity**

8.1	Snowflake stability of Lipschitz extension properties . . . . .	
8.2	Relation between linear and nonlinear extension constants . . . . .	
8.3	Metric spaces without simultaneous Lipschitz extension property . . . . .	
	Comments . . . . .	

**IV Smooth Extension and Trace Problems for Functions on Subsets of  $\mathbb{R}^n$**

**9 Traces to Closed Subsets: Criteria, Applications**

9.1 Traces to closed subsets: criteria . . . . .

9.2 Traces to Markov sets . . . . .

9.3 Simultaneous extensions from uniform domains . . . . .

Comments . . . . .

**10 Whitney Problems**

10.1 Formulation of the problems . . . . .

10.2 Trace and extension problems for Markov sets . . . . .

10.3  $C^{k,\omega}(\mathbb{R}^n)$  spaces: finiteness and linearity . . . . .

10.4 Fefferman’s solution to the classical Whitney problems . . . . .

10.5 Jet space  $J^\ell \Lambda^{2,\omega}(\mathbb{R}^n)$ : finiteness and linearity . . . . .

Comments . . . . .

**Bibliography**

**Index**

Methods of Geometric Analysis in Extension and Trace  
Problems

Volume 1

Brudnyi, A.; Technion R&D Foundation Ltd, P.Y.B.

2012, XXIII, 560 p. 11 illus., Hardcover

ISBN: 978-3-0348-0208-6

A product of Birkhäuser Basel
