

# Contents

<b>Part 1    Boundary Value Problems</b>	
<b>Domain Derivatives for Energy Functionals with Boundary Integrals . . .</b>	<b>3</b>
Catherine Bandle and Alfred Wagner	
<b>The Asymptotic Shape of a Boundary Layer of Symmetric Willmore Surfaces of Revolution . . . . .</b>	<b>19</b>
Hans-Christoph Grunau	
<b>A Computer-Assisted Uniqueness Proof for a Semilinear Elliptic Boundary Value Problem . . . . .</b>	<b>31</b>
Patrick J. McKenna, Filomena Pacella, Michael Plum, and Dagmar Roth	
<b>Green Function Estimates Lead to Neumann Function Estimates . . . . .</b>	<b>53</b>
Guido Sweers	
<b>Part 2    Numerical Methods</b>	
<b>Deriving Inequalities in the Laguerre-Pólya Class from Properties of Half-Plane Mappings . . . . .</b>	<b>67</b>
Prashant Batra	
<b>Fundamental Error Estimate Inequalities for the Tikhonov Regularization Using Reproducing Kernels . . . . .</b>	<b>87</b>
Luís P. Castro, Hiroshi Fujiwara, Saburou Saitoh, Yoshihiro Sawano, Akira Yamada, and Masato Yamada	
<b>On the Approximation-Error of Some Numerical Methods for Obtaining the Optimal Deformable Model . . . . .</b>	<b>103</b>
Paulina Mitrea, Octavian Mircia Gurzău, and Alexandru Ioan Mitrea	
<b>Part 3    Geometric and Norm Inequalities</b>	
<b>The Longest Shortest Piercing . . . . .</b>	<b>119</b>
Bernd Kawohl and Vasilii V. Kurta	

<b>On a Continuous Mapping and Sharp Triangle Inequalities . . . . .</b>	<b>125</b>
Tomoyoshi Ohwada	
<b>A Dunkl-Williams Inequality and the Generalized Operator Version . . .</b>	<b>137</b>
Kichi-Suke Saito and Masaru Tominaga	
<b>Part 4 Generalized Convexity</b>	
<b>Jordan Type Representation of Functions with Generalized High Order</b>	
<b>Bounded Variation . . . . .</b>	<b>151</b>
Gabriela Cristescu	
<b>On Vector Hermite-Hadamard Differences Controlled by Their Scalar</b>	
<b>Counterparts . . . . .</b>	<b>165</b>
Roman Ger and Josip Pečarić	
<b>Functions Generating Strongly Schur-Convex Sums . . . . .</b>	<b>175</b>
Kazimierz Nikodem, Teresa Rajba, and Szymon Wąsowicz	
<b>Strongly Convex Sequences . . . . .</b>	<b>183</b>
Jacek Tabor, Józef Tabor, and Marek Źołdak	
<b>Part 5 Convexity and Related Inequalities</b>	
<b>Refinement of Inequalities Related to Convexity via Superquadracity,</b>	
<b>Weaksuperquadracity and Superterzacity . . . . .</b>	<b>191</b>
Shoshana Abramovich, Slavica Ivelić, and Josip Pečarić	
<b>On Two Different Concepts of Subquadraticity . . . . .</b>	<b>209</b>
Attila Gilányi, Csaba Gábor Kézi, and Katarzyna Troczka-Pawelec	
<b>Connections Between the Jensen and the Chebychev Functionals . . . . .</b>	<b>217</b>
Flavia Corina Mitroi	
<b>Part 6 Other Equations and Inequalities</b>	
<b>Functional Inequalities and Equivalences of Some Estimates . . . . .</b>	<b>231</b>
Włodzimierz Fechner	
<b>On Measurable Functions Satisfying Multiplicative Type Functional</b>	
<b>Equations Almost Everywhere . . . . .</b>	<b>241</b>
Antal Jári, Károly Lajkó, and Fruzsina Mészáros	
<b>On the <math>L^1</math> Norm of the Weighted Maximal Function of Walsh-</b>	
<b>Marcinkiewicz Kernels . . . . .</b>	<b>255</b>
Károly Nagy	
<b>Quasimonotonicity as a Tool for Differential and Functional Inequalities</b>	<b>269</b>
Peter Volkmann	

Inequalities and Applications 2010

Dedicated to the Memory of Wolfgang Walter

Bandle, C.; Gilányi, A.; Losonczi, L.; Plum, M. (Eds.)

2012, LXX, 274 p., Hardcover

ISBN: 978-3-0348-0248-2

A product of Birkhäuser Basel
