

Contents

Preface	vii
1 Monday	1
1.1 Overview	1
1.2 Modules over group algebras	9
1.3 Triangulated categories	15
1.4 Exercises	23
2 Tuesday	27
2.1 Perfect complexes over commutative rings	27
2.2 Brown representability and localisation	33
2.3 The stable module category of a finite group	36
2.4 Exercises	44
3 Wednesday	47
3.1 Local cohomology and support	47
3.2 Koszul objects and support	50
3.3 The homotopy category of injectives	54
3.4 Exercises	62
4 Thursday	63
4.1 Stratifying triangulated categories	63
4.2 Consequences of stratification	69
4.3 The Klein four group	73
4.4 Exercises	77
5 Friday	79
5.1 Localising subcategories of $D(A)$	79
5.2 Elementary abelian 2-groups	82
5.3 Stratification for arbitrary finite groups	86
5.4 Exercises	90

A	Support for modules over commutative rings	93
A.1	Big support	93
A.2	Serre subcategories	95
A.3	Localising subcategories	95
A.4	Injective modules	96
A.5	Support	96
A.6	Specialization closed sets	97
	Bibliography	99
	Index	103

Representations of Finite Groups: Local Cohomology
and Support

Benson, D.J.; Iyengar, S.; Krause, H.

2012, X, 105 p., Softcover

ISBN: 978-3-0348-0259-8

A product of Birkhäuser Basel
