

# Contents

<b>1</b>	<b>Environmental Monitoring</b> . . . . .	<b>1</b>
1.1	Monitoring. . . . .	1
1.2	Satellite Monitoring . . . . .	5
1.3	Integration of GNSS With Remote Sensing Satellites . . . . .	7
1.4	Objectives and Aims of the Book. . . . .	10
	References . . . . .	11

## **Part I Global Navigation Satellite Systems (GNSS)**

<b>2</b>	<b>Modernization of GNSS</b> . . . . .	<b>15</b>
2.1	Introductory Remarks . . . . .	15
2.2	GNSS Family and the Future. . . . .	17
2.3	Benefits of the Expanding GNSS Family. . . . .	18
2.4	Concluding Remarks. . . . .	20
	References . . . . .	21
<b>3</b>	<b>The Global Positioning System</b> . . . . .	<b>23</b>
3.1	Introductory Remarks . . . . .	23
3.2	GPS Design and Operation . . . . .	24
	3.2.1 Space Segment. . . . .	24
	3.2.2 Control Segment. . . . .	25
	3.2.3 User Segment. . . . .	26
3.3	GPS Observation Principles . . . . .	27
	3.3.1 GPS Signals. . . . .	27
	3.3.2 Measuring Principle . . . . .	29
3.4	Errors in GPS Measurements . . . . .	32
	3.4.1 Ephemeris Errors . . . . .	32
	3.4.2 Clock Errors . . . . .	33
	3.4.3 Atmospheric Errors. . . . .	34
	3.4.4 Multipath. . . . .	37

3.4.5	Satellite Constellation “Geometry” . . . . .	37
3.4.6	Other Sources of Errors. . . . .	38
3.5	Concluding Remarks. . . . .	38
	References . . . . .	38
<b>4</b>	<b>Mathematical Modelling . . . . .</b>	<b>41</b>
4.1	Introductory Remarks . . . . .	41
4.2	Observation Equations. . . . .	42
4.3	Models . . . . .	45
4.3.1	Static and Kinematic Positioning . . . . .	48
4.3.2	Differential GPS (DGPS). . . . .	49
4.3.3	Relative Positioning . . . . .	51
4.4	Concluding Remarks. . . . .	54
	References . . . . .	55
<b>5</b>	<b>Environmental Surveying and Surveillance . . . . .</b>	<b>57</b>
5.1	Environmental Monitoring Parameters. . . . .	57
5.2	Design of GNSS Monitoring Survey. . . . .	58
5.3	Mission Planning and Reconnaissance. . . . .	59
5.4	GNSS Field Procedures. . . . .	64
5.4.1	Single Point Positioning . . . . .	66
5.4.2	Static Relative Positioning. . . . .	66
5.4.3	Real-Time GNSS (RTGNSS). . . . .	67
5.4.4	Differential and Augmented GNSS. . . . .	69
5.4.5	Rapid Positioning Methods . . . . .	71
5.4.6	Real-Time Kinematic (RTK) . . . . .	74
5.4.7	Precise Point Positioning (PPP) . . . . .	76
5.5	Environmental Surveillance: CORS Monitoring . . . . .	77
5.6	Coordinate Reference System. . . . .	82
5.6.1	Datum. . . . .	83
5.6.2	Coordinate Systems . . . . .	84
5.6.3	Map Projection. . . . .	87
5.7	Concluding Remarks. . . . .	87
	References . . . . .	89
<b>6</b>	<b>Data processing and Adjustment. . . . .</b>	<b>91</b>
6.1	Introductory Remarks . . . . .	91
6.2	Processing of Observations . . . . .	91
6.2.1	Data . . . . .	91
6.2.2	Baseline Processing . . . . .	93
6.2.3	Solution Types. . . . .	94
6.2.4	Quality Assessment. . . . .	96
6.2.5	Adjustment of GNSS Network Surveys. . . . .	98
6.3	Least Squares Solution . . . . .	99

6.4	Online Processing . . . . .	105
6.5	Concluding Remarks . . . . .	106
	References . . . . .	106
<b>7</b>	<b>Basics of Galileo Satellites . . . . .</b>	<b>109</b>
7.1	Introductory Remarks . . . . .	109
7.2	Galileo Design and Operation . . . . .	111
7.2.1	User Component . . . . .	111
7.2.2	Global Component . . . . .	113
7.2.3	Regional Component . . . . .	114
7.2.4	Local Component . . . . .	114
7.3	Galileo Signals . . . . .	115
7.4	Concluding Remarks . . . . .	116
	References . . . . .	116

## **Part II Applications of Environmental Monitoring**

<b>8</b>	<b>GNSS Maps in Environmental Monitoring . . . . .</b>	<b>119</b>
8.1	Maps and Their Environmental Applications . . . . .	119
8.2	Types of Maps . . . . .	120
8.2.1	Thematic Maps . . . . .	120
8.2.2	Topographical Maps . . . . .	121
8.2.3	GNSS-Derived Topographical Maps . . . . .	122
8.2.4	Application to the Monitoring of Lake Jack Finney . . . . .	128
8.3	Concluding Remarks . . . . .	130
	References . . . . .	131
<b>9</b>	<b>GNSS Remote Sensing of the Environment . . . . .</b>	<b>133</b>
9.1	Introductory Remarks . . . . .	133
9.2	GNSS Remote Sensing of the Atmosphere . . . . .	134
9.2.1	Background to GNSS-Meteorology . . . . .	135
9.2.2	GNSS-Derived Atmospheric Parameters . . . . .	136
9.2.3	GNSS Remote Sensing Techniques . . . . .	144
9.3	GNSS Contribution to Remote Sensing of Gravity Variations. . . . .	153
9.3.1	Mass Variation and Gravity . . . . .	153
9.3.2	High and Low Earth Orbiting Satellites . . . . .	155
9.3.3	Gravity Recovery and Climate Experiment . . . . .	155
9.4	Satellite Altimetry . . . . .	158
9.4.1	Remote Sensing With Satellite Altimetry . . . . .	158
9.4.2	Satellite Altimetry Missions . . . . .	160
9.5	Remote Sensing Using GNSS Reflected Signals . . . . .	161
9.6	Concluding Remarks . . . . .	163
	References . . . . .	163

<b>10</b>	<b>Climate Change and Weather Related Impacts</b>	169
10.1	Weather, Climate, and Global Warming	169
10.2	Impacts of Weather and the Changing Climate	171
10.2.1	Weather Related Impacts	171
10.2.2	Climate Related Impacts	172
10.3	Water Vapour	174
10.3.1	Significance	174
10.3.2	Numerical Weather Prediction	175
10.4	Environmental Monitoring Applications	178
10.4.1	GNSS Applications to Weather Monitoring	178
10.4.2	GNSS Applications to Climate Change Monitoring	180
10.4.3	Monitoring of Global Warming	183
10.4.4	Monitoring Cryospheric Changes	189
10.4.5	Possible Contributions of GNSS to International Protocols	191
10.5	Concluding Remarks	194
	References	195
<b>11</b>	<b>Water Resources</b>	201
11.1	Why Monitor Variation in Fresh Water Resources?	201
11.2	Gravity Field and Changes in Stored Water	204
11.2.1	Gravity Field Changes and the Hydrological Processes	205
11.2.2	Monitoring Variation in Stored Water Using Temporal Gravity Field	205
11.3	Examples of Space Monitoring of Changes in Stored Water	207
11.3.1	The Nile Basin	207
11.3.2	Understanding the Decline of Lake Naivasha	219
11.3.3	Water, a Critical Dwindling Australian Resource	225
11.4	Concluding Remarks	231
	References	232
<b>12</b>	<b>Coastal Resources</b>	237
12.1	Marine Habitat	237
12.1.1	Background	237
12.1.2	Satellites Monitoring of Marine Habitats	238
12.2	Shoreline Monitoring and Prediction	240
12.2.1	Definition and Need for Monitoring	240
12.2.2	Monitoring	243
12.2.3	Prediction	244
12.3	Concluding Remarks	249
	References	251

<b>13</b>	<b>Land Management</b>	253
13.1	Introductory Remarks	253
13.2	GNSS for Reconnaissance and Validation	253
13.3	Monitoring of Land Conditions	254
13.3.1	Soil Landscape Mapping	254
13.3.2	Provision of Point Data	255
13.3.3	Provision of Polygon Data	256
13.4	Monitoring of Land Degradation	257
13.4.1	Soil Erosion Monitoring	258
13.4.2	Salinity Monitoring: The Catchment Approach	259
13.5	GNSS Support of Precise Farming	263
13.5.1	Precise Farming	263
13.5.2	Farm Topographical Maps	265
13.6	Concluding Remarks	267
	References	267
<b>14</b>	<b>Disaster Management</b>	271
14.1	Geosensor Networks in Disaster Monitoring	271
14.1.1	Disasters and Their Impacts	271
14.1.2	GNSS in Support of Geosensor Networks	273
14.2	Changing Sea Levels	274
14.2.1	Impacts of Rise in Sea Level	275
14.2.2	Tide Gauge Monitoring	277
14.2.3	GNSS Monitoring	277
14.3	Tsunami Early Warning System	279
14.4	Land Subsidence and Landslides	282
14.5	Earthquakes	285
14.6	Floods	291
14.6.1	Flood Forecasting and Warning	292
14.6.2	Mapping of Flood Events and Damage Assessment	294
14.6.3	Flood Plain Management	295
14.6.4	GNSS Monitoring of ENSO and IOD	295
14.7	Droughts	298
14.7.1	Early Warning of Drought	299
14.7.2	Monitoring and Assessment	299
14.7.3	Combating Drought	300
14.8	Vector-Borne Diseases and Outbreak	300
14.9	Concluding Remarks	302
	References	302
<b>15</b>	<b>Environmental Pollution</b>	307
15.1	The Concept of Pollution and Applications of GNSS	307
15.2	Water Pollution	308
15.2.1	Point and Non-point Sources	308
15.2.2	Eutrophication of the Lakes	310

15.3	Air Pollution . . . . .	312
15.3.1	Background . . . . .	312
15.3.2	Pollution from Transportation Sector . . . . .	312
15.4	Land Pollution . . . . .	314
15.4.1	Solid Waste Collection and Management . . . . .	314
15.4.2	GNSS Support of Solid Waste Management . . . . .	315
15.4.3	Solid Waste from Transportation Sector . . . . .	315
15.4.4	Acid Mine Deposit Sites . . . . .	319
15.5	Concluding Remarks . . . . .	320
	References . . . . .	320
<b>16</b>	<b>Animals and Vegetation Protection and Conservation . . . . .</b>	<b>323</b>
16.1	Introductory Remarks . . . . .	323
16.2	GNSS Animal Telemetry . . . . .	324
16.2.1	Benefits and Background . . . . .	324
16.2.2	Observation and Data Management Techniques . . . . .	326
16.2.3	Applications . . . . .	328
16.3	Vegetation . . . . .	333
16.3.1	Forests . . . . .	334
16.3.2	Wetlands . . . . .	337
16.4	Concluding Remarks . . . . .	338
	References . . . . .	339
<b>17</b>	<b>Environmental Impact Assessment . . . . .</b>	<b>343</b>
17.1	GNSS Support of EIA, SEA, and SA . . . . .	343
17.1.1	Impact Assessments and the Need for Monitoring . . . . .	343
17.1.2	Applications of GNSS . . . . .	344
17.2	Impact Monitoring to Detect Change . . . . .	346
17.3	Project EIA . . . . .	347
17.3.1	GNSS in Support of EIA Process . . . . .	347
17.3.2	GNSS in Support of Multi-Criteria Analysis . . . . .	350
17.3.3	Example of Ghangara Mound Groundwater Resources . . . . .	357
17.4	Strategic Environmental Assessment . . . . .	365
17.4.1	GNSS Role in Supporting Cumulative Impacts Assessments . . . . .	366
17.4.2	Example of Marillana Creek (Yandi) Mine . . . . .	367
17.5	Sustainability Assessment . . . . .	368
17.6	Concluding Remarks . . . . .	369
	References . . . . .	370
	<b>Index . . . . .</b>	<b>375</b>

Environmental Monitoring using GNSS

Global Navigation Satellite Systems

Awange, J.L.

2012, XVIII, 382 p., Hardcover

ISBN: 978-3-540-88255-8
