1	Elementary Description of Principal Results	1
1.1	Beppo Levi Spaces	1
1.1.1	Definition of $W^{k,2}$	1
1.1.2	Equivalent Norms	3
1.1.3	Concept of a Trace	4
1.1.4	The Poincaré Inequality	6
1.1.5	Rellich's Theorem	7
1.1.6	The Generalized Poincaré Inequality	9
1.1.7	The Quotient Spaces	10
1.1.8	Other Equivalent Norms	11
1.1.9	An Imbedding Theorem	12
1.2	Boundary Value Problems for Elliptic Operators	14
1.2.1	Elliptic Operators	14
1.2.2	Decomposition of Operators	16
1.2.3	The Boundary Operators	17
1.2.4	Green's Formula	18
1.2.5	Sesquilinear Forms	21
1.2.6	Boundary Value Problems	23
1.2.7	Examples	24
1.3	The V -ellipticity, Existence and Uniqueness of the Solution	29
1.3.1	The Lax-Milgram Lemma	29
1.3.2	Solving the Boundary Value Problem	30
1.3.3	The Case of Quotient Spaces	31
1.3.4	Conditions of V -ellipticity	33
1.3.5	Nonstable Boundary Conditions	37
1.3.6	Orthogonal Projections	37
1.4	The Ritz, Galerkin, and Least Squares Methods	38
1.4.1	The Variational Method	38
1.4.2	The Galerkin Method	39
1.4.3	The Least Squares Method	41

1.5	Basic Notions from the Spectral Theory	42
1.5.1	Eigenvalues and Eigenfunctions, the Fredholm Alternative	42
1.5.2	Eigenvalues and Eigenfunctions, the Fredholm Alternative (Continuation)	43
1.5.3	The Gårding Inequality	45
2	The Spaces $W^{k,p}$	49
2.1	Definitions and Auxiliary Theorems	49
2.1.1	Classification of Domains, Pseudotopology in $C_0^\infty(\Omega)$	49
2.1.2	The Space $L^p(\Omega)$, Mean Continuity	51
2.1.3	The Regularizing Operator	52
2.1.4	Compactness Condition	53
2.2	The Spaces $W^{k,p}(\Omega)$	54
2.2.1	A Property of the Regularizing Operator	54
2.2.2	The Absolute Continuity	55
2.2.3	The Spaces $W^{k,p}(\Omega)$	56
2.2.4	The Spaces $W^{k,p}(\Omega)$ (Continuation)	58
2.2.5	The Spaces $W_0^{k,p}(\Omega)$	59
2.3	Imbedding Theorems	60
2.3.1	The Lipschitz Transform	60
2.3.2	Density of $C^\infty(\bar{\Omega})$ in $W^{k,p}(\Omega)$	61
2.3.3	The Gagliardo Lemma	62
2.3.4	The Sobolev Imbedding Theorems	63
2.3.5	The Sobolev Imbedding Theorems (Continuation)	66
2.3.6	Extension, the Nikolskii Method	69
2.3.7	Extension, the Calderon Method	72
2.3.8	The Spaces $W^{k,p}(\Omega)$, k Non-integer	76
2.4	The Problem of Traces	77
2.4.1	Lemmas	77
2.4.2	Imbedding Theorems	79
2.4.3	Two Trace Theorems	82
2.4.4	Some Other Properties of Traces	83
2.5	The Problem of Traces (Continuation)	86
2.5.1	Application of the Fourier Transform	86
2.5.2	Lemmas Based on the Hardy Inequality	90
2.5.3	Imbedding Theorems, Application of the Spaces $W^{1-1/p,p}(\partial\Omega)$	93
2.5.4	Imbedding Theorems, Application of the Spaces $W^{1-1/p,p}(\partial\Omega)$ (Continuation)	93
2.5.5	A Lemma	96
2.5.6	The Converse Theorem	98
2.5.7	The Converse Theorem (Continuation)	99
2.5.8	Remarks	101

2.6	Compactness	102
2.6.1	The Kondrashov Theorem	102
2.6.2	Traces	103
2.6.3	The Lions Lemma, Another Theorem of Compactness	104
2.7	Quotient Spaces, Equivalent Norms.....	106
2.7.1	Equivalent Norms	106
2.7.2	Quotient Spaces	108
2.7.3	The Spaces $V^{k,p}(\Omega)$	109
2.7.4	Nikodym Domains	111
3	Existence, Uniqueness and Fundamental Properties of Solutions of Boundary Value Problems.....	115
3.1	The Boundary Integral, Green's Formula	115
3.1.1	The Boundary Integral	115
3.1.2	Green's Formula	117
3.2	Formulation of the Problem. Existence and Uniqueness of the Solution.....	119
3.2.1	Sesquilinear Boundary Forms	119
3.2.2	Sesquilinear Boundary Forms (Continuation)	121
3.2.3	Boundary Value Problems	122
3.2.4	Remarks.....	126
3.2.5	The Differential Operators	127
3.3	The Fredholm Alternative	130
3.3.1	Remarks.....	132
3.4	The V -ellipticity	133
3.4.1	Coercivity	133
3.4.2	The Aronszajn Theorem	136
3.4.3	Strongly Elliptic Operators	138
3.4.4	Algebraic Conditions for the $W^{k,2}(\Omega)$ -ellipticity	141
3.5	The V -ellipticity of Forms $\int_{\Omega} A\nabla u \nabla x$	144
3.5.1	Definition	144
3.5.2	The Fundamental Solution	145
3.5.3	A Lemma	147
3.5.4	A priori Estimates in \mathbb{R}_+^N	148
3.5.5	Properly Elliptic Operators	154
3.5.6	Properly Elliptic Operators (Continuation)	159
3.6	Continuous Dependence on the Data.....	160
3.6.1	Dependence on the Coefficients	160
3.6.2	Dependence on the Coefficients (Continuation)	162
3.6.3	The Singular Case	164
3.6.4	Dependence on the Space V	168
3.6.5	Dependence on the Space V (Continuation)	170
3.6.6	Dependence on the Domain, the Dirichlet Problem	172
3.6.7	The General Case.....	173
3.6.8	Dependence on the Domain, Another Method	179

3.7	Elliptic Systems	181
3.7.1	Elliptic Systems and Sesquilinear Forms.....	182
3.7.2	Boundary Value Problems	183
3.7.3	Strongly Elliptic Systems	184
3.7.4	Algebraically Complete, Formally Positive Forms	185
3.7.5	Examples.....	192
4	Regularity of the Solution	197
4.1	Interior Regularity	198
4.1.1	Regularity of the Weak Solution	198
4.1.2	Regularity of the Very Weak Solution	201
4.2	Regularity of the Solution in the Neighborhood of the Boundary	203
4.2.1	The Second Order Operator.....	203
4.2.2	The Regularizable Problem	204
4.2.3	Lemmas	206
4.2.4	Lemmas (Continuation)	210
4.2.5	A Modification of Lions' Lemma	211
4.2.6	A Fundamental Lemma	214
4.2.7	Regularity of the Solution in a Neighborhood of the Boundary	218
4.2.8	Strong Solutions	220
4.2.9	Local Regularity in a Neighborhood of the Boundary	223
4.2.10	Dependence of the Solution on the Coefficients	223
4.3	Boundary Value Problems for Properly Elliptic Operators	225
4.3.1	The Operator A Properly Elliptic, B_s Cover A	225
4.3.2	An Existence Theorem	227
4.3.3	Dependence with Respect to a Parameter	230
4.4	Very Weak Solutions of Boundary Value Problems	231
4.4.1	Very Weak Solutions, the Homogeneous Case.....	231
4.4.2	Regularity of the Solution	232
4.4.3	Very Weak Solutions (Continuation)	233
4.4.4	The Green Kernel.....	235
4.4.5	The Green Operator and the Green Kernel	237
4.5	Very Weak Solutions (Continuation)	239
4.5.1	Very Weak Solutions, the Nonhomogeneous Case	239
4.5.2	Very Weak Solutions, the Nonhomogeneous Case (Continuation)	242
4.5.3	The Green and Poisson Kernels	245
5	Applications of Rellich's Equalities and Their Generalizations to Boundary Value Problems	247
5.1	The Rellich Equality for a Second Order Equation.....	247
5.1.1	The Rellich Equality	247
5.1.2	Lemmas, Regularity of the Dirichlet Problem	248
5.1.3	Very Weak Solutions	253

5.2	The Neumann and Newton Problems	256
5.2.1	Lemmas, Regularity of the Solution	256
5.2.2	Lemmas, Regularity of the Solution (Continuation)	259
5.2.3	Very Weak Solutions	259
5.2.4	Uniqueness Theorems	260
5.2.5	Very Weak Solutions (Continuation)	261
5.3	Second Order Strongly Elliptic Systems	262
5.3.1	Definitions	262
5.3.2	Regularity of the Solution, Ω Smooth	263
5.3.3	The Rellich Equality	264
5.3.4	Regularity of the Solution, Ω Non-smooth	266
5.3.5	Very Weak Solutions	267
5.4	A Fourth Order Equation, the Dirichlet Problem	268
5.4.1	Definition	268
5.4.2	The Second Order Rellich Inequality	269
5.4.3	The Third Order Rellich Inequality	271
5.4.4	Dependence on the Domain	272
5.4.5	A Density Lemma	274
5.4.6	Regularity of the Solution	276
5.4.7	Very Weak Solutions	278
6	Boundary Value Problems in Weighted Sobolev Spaces	281
6.1	A Second Order Equation, Regularity of Solution	281
6.1.1	The Case of $\partial\Omega$ Regular	281
6.1.2	The Very Weak Solution	284
6.1.3	The Case $\partial\Omega$ Non-smooth	287
6.2	The Dirichlet Problem and Spaces $W_{\sigma}^{k,p}$	288
6.2.1	Density Theorem	288
6.2.2	The Trace Problem	290
6.2.3	Some Imbedding Theorems	292
6.2.4	The Dirichlet Problem, Very Weak Solution	294
6.3	Sesquilinear Forms on $W_{\sigma^{-1}}^{k,2}(\Omega) \times W_{\sigma}^{k,2}(\Omega)$	300
6.3.1	The B, H_2 -ellipticity	300
6.3.2	Ellipticity of Sesquilinear Forms for $W_{0,\sigma^{-\alpha}}^{k,2}, W_{0,\sigma^{\alpha}}^{k,2}$	301
6.3.3	The Dirichlet Problem	309
6.3.4	The Neumann Problem and Other Problems	310
6.3.5	An Imbedding Theorem for $W_{r^{\alpha}}^{k,p}(\Omega)$	311
6.3.6	Concluding Remarks	316
7	Regularity of the Solution for Non-smooth Coefficients and Non-regular Domains	319
7.1	Second Order Operators	320
7.1.1	Auxiliary Lemmas	320
7.1.2	Fundamental Lemmas	322

7.1.3	Regularity of the Solution of the Boundary Value Problem	325
7.1.4	The Case $1/N > 1/p$	326
7.1.5	Regularity of the Solution	328
7.1.6	The Dual Method	329
7.2	The Maximum Principle	331
7.2.1	The Maximum Principle	331
7.3	Higher Order Equations	334
7.3.1	“The Mean Inequality”	334
7.3.2	Existence of a Classical Solution in the Case $N = 2$	337
7.3.3	The Case $N = 3$	339
7.3.4	Continuity of the Solution for the Laplace Operator on $\overline{\Omega}$	341
7.3.5	The Case of the Right Hand Side Equal to Zero	344
