1	Some Important Definitions	1
1.1	Introduction	1
1.2	Terms Pertaining to Quantity	2
1.2.1	Quantity	2
1.2.2	System of Base Quantities	2
1.2.3	Derived Quantity	2
1.2.4	Quantity Equation	3
1.2.5	Dimension of a Quantity	3
1.2.6	Measurand	4
1.2.7	True Value of a Quantity	4
1.2.8	Conventional True Value of a Quantity	4
1.2.9	Measured Value	5
1.2.10	Relation in Between Measured Value and True or Conventional True Value.....	5
1.3	Terms Pertaining to Measurement	5
1.3.1	Measurement.....	5
1.3.2	Method of Measurement	5
1.3.3	Substitution Method	5
1.3.4	Differential Method	6
1.3.5	Null Method	6
1.3.6	Measurement Procedure.....	6
1.3.7	Result of Measurement	6
1.3.8	Error	6
1.3.9	Spurious Error	7
1.3.10	Relative Error	7
1.3.11	Random Error	7
1.3.12	Systematic Error	7
1.3.13	Accuracy of Measurement	8
1.3.14	Precision of Measurement Result	8
1.3.15	Repeatability	8

1.3.16	Reproducibility (of Measurement Results)	9
1.3.17	Correction	9
1.4	Terms Pertaining to Statistics	9
1.4.1	Observation	9
1.4.2	Independent Observations	9
1.4.3	Population	10
1.4.4	Sample	10
1.4.5	Measurement	10
1.4.6	Population of Measurement	10
1.4.7	Sample of Measurements	11
1.4.8	Frequency/Relative Frequency	11
1.4.9	Mean	11
1.4.10	Sample Mean	11
1.4.11	Population Mean	11
1.4.12	Merits and Demerits of Arithmetic Mean [3]	12
1.4.13	Median	12
1.4.14	Quartiles	12
1.4.15	Dispersion	13
1.4.16	Standard Deviation	13
1.4.17	Variance	13
1.4.18	Sample Standard Deviation	14
1.4.19	Population Standard Deviation	14
1.4.20	Estimate of Population Standard Deviation	14
1.4.21	Estimate of Population and Sample Standard Deviations-Relation	15
1.4.22	Independent Variable	15
1.4.23	Dependent Variable or Response Variable	15
1.4.24	Correlation	15
1.4.25	Correlation Coefficient	15
1.4.26	Covariance	16
1.4.27	Random Variable	16
1.4.28	Discrete Random Variable	16
1.4.29	Continuous Random Variable	16
1.4.30	Probability	16
1.4.31	Probability Distribution	17
1.4.32	Normal Distribution	17
1.4.33	Properties of Normal Distribution	18
1.4.34	Probable Error	18
1.4.35	Range	18
1.4.36	Confidence Level	18
1.4.37	Confidence Interval	19
1.4.38	Outlier	19
1.4.39	Parameter	19
1.4.40	Random Selection	19
1.4.41	Sample Statistic	19

1.4.42	Error	20
1.4.43	Standard Error, or Standard Deviation of the Mean	20
1.4.44	Uncertainty	20
1.4.45	Evaluations of Uncertainty	20
1.4.46	Random Uncertainty(e_r)	21
1.4.47	Systematic Uncertainty(U_s)	22
1.4.48	Standard Uncertainty	22
1.4.49	Expanded Uncertainty	22
1.4.50	Expressing Uncertainty of Measurement	22
1.4.51	Coverage Interval	22
1.4.52	Coverage Probability	23
1.4.53	Central Limit Theorem	23
1.5	Influence Quantity	23
1.6	Instruments and Standards	24
1.6.1	Repeatability of an Instrument	24
1.6.2	Precision of the Instrument	24
1.6.3	Accuracy of an Instrument	24
1.6.4	Accuracy of a Standard	25
1.6.5	Difference Between Uncertainty and Accuracy	25
1.6.6	Difference Between the Correction, Error and Uncertainty	25
1.6.7	Correction Factor	26
1.6.8	Discrimination Threshold	26
1.7	Some Special Integrals and Functions	26
1.7.1	Gamma Function	26
1.7.2	Beta Function of First Kind B(m,n)	27
1.7.3	Alternative Form of Beta Function	27
1.7.4	Beta Function of Second Kind B (m,n)	28
1.7.5	Cauchy Distribution	28
1.7.6	Arc Sine(U-Shaped) Distribution	29
	References	29
2	Distribution Functions	31
2.1	Introduction	31
2.2	Random Variable	31
2.3	Discrete and Continuous Variables	32
2.4	Discrete Functions	32
2.4.1	Probability Distribution of a Random Variable	32
2.4.2	Discrete Probability Function	32
2.5	Distribution Function	33
2.5.1	Continuous Distribution Function	33
2.5.2	Discrete Distribution	33

2.6	Probability Density Function	33
2.6.1	Discrete Probability Function	34
2.7	Discrete Probability Functions.....	34
2.7.1	Binomial Probability Distribution	34
2.7.2	Poisson's Distribution	36
2.8	Continuous Probability Distributions	38
2.8.1	Normal Probability Function.....	38
2.8.2	Cumulative Distribution of the Normal Probability Function	39
2.8.3	Normal Distribution and Probability Tables.....	40
2.8.4	Mean and Variance of a Linear Combination of Normal Variates.....	41
2.8.5	Standard Deviation of Mean	41
2.8.6	Deviation from the Mean	42
2.8.7	Standard Deviation of Standard Deviation	43
2.8.8	Nomenclature for Normal Distribution	46
2.8.9	Probability Function of the Ratio of Two Normal Variates [1].....	46
2.8.10	Importance of Normal Distribution	48
2.8.11	Collation of Data from Various Laboratories [2]	48
	References.....	51
3	Other Probability Functions	53
3.1	Introduction	53
3.2	Important Distributions	53
3.2.1	Rectangular Distribution	53
3.2.2	Triangular Probability Function.....	55
3.2.3	Trapezoidal Probability Function	56
3.3	Small Sample Distributions	58
3.3.1	The Student's t Distribution.....	59
3.3.2	The χ^2 Distribution	66
3.3.3	The F -Distribution	69
3.3.4	Upper and Lower Percentage Points.....	71
3.3.5	Application of F-Test	72
3.3.6	For Equality of Several Means	73
3.4	Combining of Variances of Variables Following Different Probability Distribution Functions.....	73
	References.....	74
4	Evaluation of Measurement Data	75
4.1	Introduction.....	75
4.2	Evaluation of Validity of Extreme Values of Measurement Results	75
4.2.1	Outline (Dixon)Test	76

4.3	Evaluation of the Means Obtained from Two Sets of Measurement Results	77
4.3.1	Two Means Coming from the Same Source	78
4.3.2	Test for Two Means Coming from Different Sources	83
4.4	Comparison of Variances of Two Sets of Measurement Results	85
4.4.1	Numerical Example	86
4.5	Measurements Concerning Travelling Standards	86
4.5.1	Mean and Standard Deviation for each Laboratory	89
4.5.2	Inter-Laboratories Standard Deviation	91
4.5.3	Intra-Laboratory Standard Deviation	91
4.6	F-test for Internal and External Consistency	92
4.6.1	F-test for Inter- and Intra-Laboratory Variances	92
4.6.2	Weight Factors	94
4.6.3	F-test for Variances	97
4.7	Standard Error of the Overall Mean	97
4.7.1	Results Inconsistent	97
4.8	Analysis of Variance	98
4.8.1	One-Way Analysis of Variance	98
4.9	Tests for Uniformity of Variances	105
4.9.1	Bartlett's Test for Uniformity of Many Variances	105
4.9.2	Cochran Test for Homogeneity of Variances	107
	References	108
5	Propagation of Uncertainty	109
5.1	Mathematical Modelling	109
5.1.1	Mean of Measurand (Dependent Variable)	110
5.1.2	Functional Relationship and Input Quantities	110
5.1.3	Expansion of a Function	111
5.1.4	Combination of Arithmetic Means	113
5.1.5	Combination of Variances	113
5.1.6	Variance of the Mean	113
5.2	Uncertainty	114
5.2.1	Combined Standard Uncertainty	114
5.2.2	Expanded Uncertainty	115
5.3	Type A Evaluation of Uncertainty	116
5.3.1	Numerical Example for Calculation of Type A Evaluation of Standard Uncertainty	117
5.4	Pooled Variance	118
5.4.1	Validity	118
5.4.2	Applicable	118
5.4.3	Uses	118
5.4.4	Need	119
5.4.5	Calculation of Pooled Variance	119
5.4.6	Uses of Pooled Variance	121
5.4.7	Concluding Remarks	124

5.5	Type B Evaluation of Standard Uncertainty	125
5.5.1	Type B Evaluation of Uncertainty	125
5.5.2	Common Uncertainties Evaluated by Type B	126
5.6	Variance and Uncertainty Range	126
5.6.1	Normal Distribution	126
5.6.2	Rectangular Distribution	126
5.6.3	Triangular Distribution	127
5.6.4	Trapezoidal Distribution.....	127
	References.....	129
6	Uncertainty and Calibration of Instruments	131
6.1	Introduction.....	131
6.2	Linear Relation	132
6.2.1	The Classical Method	133
6.2.2	Matrix Method.....	135
6.3	Uncertainty	137
6.4	Numerical Example	138
6.4.1	Calibration of a Proving Ring.....	138
6.4.2	Calibration of a Glass Scale.....	141
6.5	Other Functions	142
6.5.1	Exponential Function.....	143
6.6	Power Function.....	145
6.6.1	Uncertainty.....	146
6.6.2	Numerical Example	147
6.6.3	Same Data Fitted to Two Functions	147
6.7	Method of Least Squares.....	148
	Referece	151
7	Calculation of Uncertainty	153
7.1	Importance of Correct Measurement	153
7.1.1	Discovery of Inert Gases	153
7.1.2	Correction in Composition of Air.....	154
7.1.3	Meaning of Quantity Being Exact	154
7.1.4	International Agreement with Uncertainty	154
7.1.5	Initiation by BIPM.....	155
7.2	Classical Procedure for Uncertainty Calculations	155
7.2.1	Random Error	155
7.2.2	Systematic Error	156
7.2.3	Calculation of Random Uncertainty (u_r)	156
7.2.4	Combination of Random Uncertainties (u_r).....	157
7.3	Sources of Systematic Uncertainty (U_s)	158
7.4	Combination of Systematic Uncertainty	159
7.5	Dominant Term	159
7.6	Total Overall Uncertainty U	160
7.7	Objections to the Above Method	160

7.8	The BIPM Recommendations 1980 Basis of ISO Guide (GUM).....	161
7.9	ISO GUM-Step-by-Step Procedure for Calculation of Uncertainty	162
7.10	Calculation of Uncertainty	164
7.10.1	Procedure for Calculation	164
7.10.2	Relation Between Range and Standard Uncertainty	165
7.10.3	Applicability of ISO GUM.....	166
7.11	Propagation of Probability Density Function	167
7.11.1	Step-by-Step Procedure for Monte-Carlo Method.....	167
7.11.2	Two-Stage Bootstrap Procedure	168
7.12	Bayesian Statistics	169
7.13	Example for Calculations of Uncertainty	169
7.13.1	Calculation of Random Uncertainty	170
7.13.2	Systematic Uncertainty	172
7.14	Merits and Limitations of ISO Gum Method	174
7.14.1	Merits of ISO GUM	174
7.14.2	Limitations of ISO GUM.....	175
	References.....	175
8	Uncertainty in Calibration of a Surface Plate (Fitting a Plane)	177
8.1	Introduction.....	177
8.2	Procedure	178
8.3	Derivation of Formulae for Height	180
8.3.1	Height of a Point on the Diagonal AC.....	180
8.3.2	Height of a Point on the Diagonal BD.....	181
8.3.3	Height of a Point on the Sides AB	182
8.3.4	Height of a Point on the Side DC	183
8.3.5	Height of a Point on the Sides AD.....	183
8.3.6	Height of a Point on the Side BC	184
8.3.7	Height of a Point on the Middle Side GH	184
8.3.8	Height of a Point on the Middle Side EF	185
8.3.9	Heights of Some Important Points	186
8.4	Numerical Example	187
8.4.1	For Diagonals BD or AC	187
8.4.2	For Longer Parallel Sides BA or CD	188
8.4.3	For Sides BC or AD	189
8.4.4	For Middle Parallel Sides EF and GH	190
8.5	Fitting a Plane to the Given Data	191
8.5.1	Standard Deviation from the Mean Plane	195
8.6	Uncertainty in Measurements.....	195
8.6.1	Uncertainty in Measured Height of a Point	195
8.6.2	Uncertainty in Difference in Heights of Two Points on the Diagonal	199
8.6.3	Points Are on the Same Straight Line	200
8.6.4	Points on Two Different Lines	205

8.7	Type A Evaluation of Uncertainty	209
8.8	Type B Evaluation of Standard Uncertainty	209
8.8.1	Uncertainty Due to the Finite Digital Readout of the Measuring Instrument	209
8.8.2	Uncertainty Due to Certified Accuracy of the Measuring Instrument	210
8.8.3	Uncertainty Due to Unstability of the Instrument	210
8.8.4	The Error in Non-Uniformity of Temperature	210
8.8.5	Effective Degrees of Freedom	211
8.8.6	Extended Uncertainty	211
