

Contents

Treatment of Rising Damp in Historical Buildings	1
Ana Sofia Guimarães, Vasco Peixoto de Freitas and João M. P. Q. Delgado	
The Evaluation of Hygroscopic Inertia and Its Importance to the Hygrothermal Performance of Buildings	25
Nuno M. M. Ramos and Vasco Peixoto de Freitas	
Two-Phase Flow and Heat Transfer in Micro-Channels and Their Applications in Micro-System Cooling	47
Yuan Wang, Khellil Sefiane, Souad Harmand and Rachid Bennacer	
Numerical Methods for Flow in Fractured Porous Media	83
Sabine Stichel, Dmitriy Logashenko, Alfio Grillo, Sebastian Reiter, Michael Lampe and Gabriel Wittum	
Lungs as a Natural Porous Media: Architecture, Airflow Characteristics and Transport of Suspended Particles	115
António F. Miguel	
On Analogy Between Convective Heat and Mass Transfer Processes in a Porous Medium and a Hele-Shaw Cell	139
A. V. Gorin	
Heat and Mass Transfer in Porous Materials with Complex Geometry: Fundamentals and Applications	161
A. G. B. de Lima, S. R. Farias Neto and W. P. Silva	

Contribution to Thermal Properties of Multi-Component Porous Ceramic Materials Used in High-Temperature Processes in the Foundry Industry	187
Z. Ignaszak and P. Popielarski	
Metal Foams Design for Heat Exchangers: Structure and Effectives Transport Properties	219
Jean-Michel Hugo and Frédéric Topin	
Heat and Mass Transfer in Matrices of Hygroscopic Wheels	245
C. R. Ruivo, J. J. Costa and A. R. Figueiredo
