

# Contents

<b>1</b>	<b>Nanotechnology: Principles and Applications</b> .....	<b>1</b>
	S. Logothetidis	
1.1	Introduction .....	2
1.2	Methods and Principles of Nanotechnology .....	3
1.2.1	What Makes Nanostructures Unique .....	3
1.2.2	Size Dependence.....	5
1.2.3	Metal NPs .....	6
1.2.4	Quantum Dots .....	6
1.2.5	Nanotechnology Imitates Nature.....	7
1.3	From Microelectronics to Nanoelectronics and Molecular Electronics .....	10
1.4	Nano in Energy and Clean Energy .....	12
1.5	Nanotechnology Tools: Nanometrology .....	15
1.6	Future Perspectives.....	18
1.7	Summary.....	19
	References .....	20
<b>2</b>	<b>Carbon Nanomaterials: Synthesis, Properties and Applications</b> .....	<b>23</b>
	Kyriakos Porfyrakis and Jamie H. Warner	
2.1	Introduction .....	23
2.2	Fullerenes and Their Derivatives .....	24
2.2.1	Synthesis of Endohedral Fullerenes .....	25
2.2.2	Endohedral Metallofullerenes.....	26
2.2.3	Endohedral Nitrogen Fullerenes .....	27
2.2.4	Molecular Synthesis of Endohedral Fullerenes .....	28
2.2.5	Purification of Endohedral Fullerenes .....	29
2.2.6	Properties and Applications .....	29
2.2.7	Chemistry of Endohedral Fullerenes .....	32
2.2.8	One-Dimensional, Two-Dimensional Arrays and Beyond .....	35

2.3	Graphene.....	36
2.3.1	Synthesis .....	36
2.3.2	Properties and Applications .....	38
2.4	Carbon Nanotubes.....	39
2.4.1	Synthesis .....	40
2.4.2	Applications.....	42
2.5	Summary.....	42
	References .....	43
<b>3</b>	<b>Carbon Nanotubes: From Symmetry to Applications .....</b>	<b>47</b>
	M. Damnjanović	
3.1	Introduction: Symmetry of Nanotubes .....	47
3.1.1	Configuration of Single-Wall Nanotubes .....	48
3.1.2	Symmetry of Single-Wall Nanotubes .....	48
3.1.3	Double-Wall Nanotubes .....	50
3.2	Energy Bands .....	51
3.2.1	Electronic Bands.....	51
3.2.2	Phonons .....	53
3.3	Interaction Between Walls .....	54
3.3.1	Potential Produced by Nanotube .....	54
3.3.2	Interaction.....	56
3.4	Summary.....	57
	References .....	57
<b>4</b>	<b>Laser-Based Growth of Nanostructured Thin Films .....</b>	<b>59</b>
	P. Patsalas	
4.1	Introduction.....	59
4.2	Instrumentation and Principles of Pulsed Laser Deposition.....	60
4.3	Examples and Applications .....	67
4.3.1	External Control of Ablated Species and Application to Ta-C Films [29] .....	67
4.3.2	Self-Assembled Nanoparticles into Dielectric-Matrix Films and Superlattices [52, 54] .....	71
4.3.3	Control of the Atomic Structure and Nanostructure of Intermetallic and Glassy Films [147].....	76
	References.....	78
<b>5</b>	<b>High Efficiency Multijunction Solar Cells with Finely- Tuned Quantum Wells .....</b>	<b>85</b>
	Argyrios C. Varonides	
5.1	What is a Solar Cell? .....	86
5.2	Photo-Currents .....	87
5.3	Solution of the Diffusion Equation: n-Region .....	88
5.4	Solution of the Diffusion Equation: P-Region .....	89
5.5	Total Electron and Hole Currents .....	90

5.6	P-I-N Geometries of Solar Cells .....	91
5.7	A Proposed Device .....	92
5.8	The Concept .....	94
5.9	Current Research Objectives: A Proposed Guideline.....	95
5.10	To Probe Further .....	101
	References .....	102
<b>6</b>	<b>Thin Film Deposition and Nanoscale Characterisation</b>	
	<b>Techniques</b> .....	105
	Spyridon Kassavetis, Christoforos Gravalidis, and Stergios Logothetidis	
6.1	Introduction.....	105
6.2	Methods and Results .....	106
6.2.1	Thin Film Deposition Techniques .....	106
6.2.2	Physical Vapor Deposition: Magnetron Sputtering .....	106
6.2.3	Nanoscale Characterization of Sputtered Thin Films .....	108
6.2.4	Wet Deposition Techniques of Thin Films .....	125
6.3	Summary: Conclusion .....	127
	References .....	127
<b>7</b>	<b>Implementation of Optical Characterization for Flexible Organic Electronics Applications</b> .....	131
	A. Laskarakis and S. Logothetidis	
7.1	Introduction.....	132
7.2	Optical Characterization of Materials .....	133
7.3	Flexible Organic Electronic Devices .....	137
7.4	Results and Discussion.....	139
7.4.1	Flexible Polymeric Substrates .....	139
7.4.2	Barrier Layers for Encapsulation of Devices.....	144
7.4.3	Transparent Electrodes (Inorganic, Organic) .....	147
7.5	Conclusions and Perspectives.....	152
	References .....	153
<b>8</b>	<b>Introduction to Organic Vapor Phase Deposition (OVPD®) Technology for Organic (Opto-)electronics</b> .....	155
	Dietmar Keiper, Nico Meyer, and Michael Heuken	
8.1	Introduction.....	155
8.2	OVPD® Basics and Industrial Concept .....	157
8.3	OVPD® Deposition of Organic Thin Films and Devices .....	158
8.3.1	Single Film Deposition .....	158
8.3.2	Organic Film Morphology .....	161
8.3.3	OLED Stack Designs Fabricated by OVPD® – Cross-Fading.....	163
8.4	Conclusion .....	168
	References .....	169

<b>9</b>	<b>Computational Studies on Organic Electronic Materials .....</b>	<b>171</b>
	Leonidas Tsetseris	
9.1	Introduction .....	171
9.2	Computational Methods .....	173
9.2.1	A Brief Overview .....	173
9.2.2	First-Principles Methods .....	174
9.2.3	First-Principles Methods: Limitations and Extensions ...	176
9.2.4	Carrier Hopping Mechanisms .....	178
9.2.5	Monte Carlo Simulations .....	182
9.3	Results and Findings .....	184
9.4	Summary and Outlook .....	189
	References .....	190
<b>10</b>	<b>Self-Assembly of Colloidal Nanoparticles on Surfaces: Towards Surface Nanopatterning.....</b>	<b>191</b>
	Vasileios Koutsos, John Walker, and Emmanouil Glynos	
10.1	Introduction and Theoretical Background .....	191
10.1.1	Colloidal Particle Interactions .....	193
10.1.2	van der Waals Forces .....	193
10.1.3	Electrostatic Interactions .....	194
10.1.4	DLVO Theory .....	197
10.1.5	Electrolyte Concentration Control over Interactions.....	198
10.1.6	Steric Interactions .....	199
10.2	Experimental .....	199
10.2.1	Atomic Force Microscopy .....	199
10.3	Drying and Immersion Capillary Forces: The Emergence of Order .....	201
10.3.1	Crystalline Monolayers of Colloidal Silica on Mica .....	204
10.4	Dewetting Effects: Self-Organisation .....	205
10.4.1	Dewetting Structures of Colloidal Magnetite Nanoparticles on Mica .....	206
10.4.2	Adsorption and Self-Assembly of Soft Colloid Nanoparticles on Mica .....	209
10.5	Conclusions .....	209
	References .....	210
	<b>Index .....</b>	<b>213</b>

Nanostructured Materials and Their Applications

Logothetidis, S. (Ed.)

2012, XII, 220 p., Hardcover

ISBN: 978-3-642-22226-9
