

# Contents

<b>1</b>	<b>Physical Properties of Unconventional Superconductors</b>	<b>1</b>
1.1	Cuprate Superconductors	1
1.1.1	Atomic Structure and Classification	2
1.1.2	Theoretical Models	6
1.2	Borocarbides	10
1.2.1	Crystal Structure and $T_c$	13
1.2.2	The Electronic Structure	13
1.3	Magnesium Diboride	15
1.3.1	Crystal Structure	16
1.3.2	Electronic and Band Structure	17
1.4	Oxypnictides	19
1.4.1	Atomic Structure and Classification	21
1.4.2	Electronic and Band Structure	24
<b>2</b>	<b>Ginzburg–Landau Analysis of Multiband and Anisotropic Superconductors</b>	<b>27</b>
2.1	GL Equations for Two-Band Isotropic Superconductors	28
2.1.1	Upper Critical Field $H_{c2}(T)$	30
2.1.2	Surface Magnetic Field $H_{c3}(T)$	34
2.1.3	Lower Critical Field $H_{c1}(T)$	37
2.1.4	Upper Critical Field $H_{c2}$ of Thin Films	39
2.1.5	Magnetization of Two-Band Superconductors Near $H_{c2}$	41
2.1.6	Flux Quantization	42
2.1.7	Little-Parks Effect in Two-Band Superconductors	42
2.1.8	Thermodynamic Magnetic Field $H_{cm}(T)$ and Specific Heat Jump $\frac{\Delta C}{C_N}$	43
2.1.9	Critical Current Density $J_c(T)$	45
2.2	Anisotropy Effects in Two-Band GL Theory	47
2.2.1	Layered Two-Band GL Equations	47
2.2.2	Anisotropy Effect on Upper Critical Field in Layered Two-Band Superconductors	49

2.2.3	Effects of Anisotropy on London Penetration Depth .....	51
2.2.4	Single Vortex in Two-Band Layered Superconductor .....	53
2.2.5	Surface Magnetic Field in Anisotropic Two-Band GL Theory .....	56
2.2.6	Angular Effects in Two-Band GL Theory .....	57
2.3	d-Wave GL Equations .....	62
2.3.1	Upper Critical Field of d-Wave Superconductors .....	64
2.3.2	Single Vortex in d-Wave Superconductor .....	66
2.3.3	Nonlinear Magnetization in d + s Wave Superconductors .....	68
2.3.4	Vortex Lattice in d-Wave Superconductors .....	69
2.4	GL-Like Theory in Application to Cuprate Superconductors .....	71
2.4.1	Transition Temperature $T_c(x)$ .....	73
2.4.2	Superfluid Density .....	73
2.4.3	Specific Heat .....	74
2.5	GL Theory of Dirty Two-Band Superconductors .....	75
2.6	Time-Dependent Two-Band GL Equations .....	77
2.6.1	Two-Band s-Wave Superconductors .....	77
2.6.2	Time-Dependent d-Wave GL Equations .....	82
2.6.3	1.5 Type Superconductivity .....	84
2.7	Coexistence Antiferromagnetism and Superconductivity: GL Description .....	86
2.8	Application of GL Equations to Nanosize Superconductors .....	88
<b>3</b>	<b>Anisotropic Eliashberg Equations and Influence of Multiband Effects .....</b>	<b>95</b>
3.1	Single-Band Isotropic Eliashberg Equations and BCS Limit .....	96
3.2	Eliashberg Equations for Single Band Layered Superconductors .....	98
3.3	Eliashberg Equations for Two-Band Isotropic Superconductors .....	103
3.4	Effects of Nonadiabacity in Layered Systems .....	106
3.5	Effect of Coulomb Repulsion in Layered Single-Band Superconductors with Arbitrary Thickness of Layers .....	111
3.6	Plasmon Spectrum of Layered Superconductors .....	115
3.7	Specific Heat Jump of Layered Superconductors .....	119
3.8	d-Wave Single Band BCS Theory .....	122
3.9	Properties of Two-Band Isotropic Superconductors in BCS Theory .....	124
3.9.1	Critical Temperature .....	125
3.9.2	Specific Heat of Two-Band Superconductors .....	128
3.9.3	Upper Critical Field $H_{c2}$ in Two-Band Superconductors ....	130
3.10	Nanosize Two-Gap Superconductivity .....	134
3.11	Effect of Nonadiabacity in Two-Band Superconductors .....	136
3.12	Leggett's Mode in Two-Band Superconductors .....	138

<b>4 Fluctuation Effects in Anisotropic and Multiband Superconductors</b> .....	141
4.1 Fluctuations of Specific Heat in GL Theory .....	141
4.1.1 Single-Band Isotropic GL Theory .....	141
4.1.2 Fluctuation of Specific Heat in Two-Band Isotropic Superconductors .....	143
4.1.3 Influence of External Magnetic Field on Specific Heat Jump .....	145
4.2 The Diamagnetic Susceptibility $T > T_c$ .....	147
4.3 Fluctuation of Conductivity Near $T_c$ .....	149
4.4 Fluctuation Effects in Layered Superconductors .....	151
4.4.1 Influence Phase Fluctuations on Critical Temperature in Layered Superconductors .....	153
4.5 Post-Gaussian Fluctuations in Superconductors .....	155
4.6 GL Theory for Layered Superconductors with Small Coherence Length .....	157
<b>References</b> .....	159
<b>Index</b> .....	173
