<b>Foreword (by Malte Henkel)</b> .....	v
<b>Preface</b> .....	xxiii
<b>1 Geometric Definitions of <math>\mathfrak{sv}</math></b> .....	1
1.1 From Newtonian Mechanics to the Schrödinger–Virasoro Algebra .....	1
1.1.1 From Galilei to Schrödinger: Central Extensions and Projective Automorphisms .....	3
1.1.2 From Schrödinger to Schrödinger–Virasoro .....	7
1.1.3 Our Object of Study: The Schrödinger–Virasoro Algebra in One Space Dimension .....	11
1.2 Integration of the Schrödinger–Virasoro Algebra to a Group .....	12
<b>2 Basic Algebraic and Geometric Features</b> .....	17
2.1 On Graduations and Some Deformations of the Lie Algebra $\mathfrak{sv}$ .....	18
2.2 The Conformal Embedding .....	20
2.3 Relations Between $\mathfrak{sv}$ and the Poisson Algebra on $T^*S^1$ and ‘no-go’ Theorem .....	23
2.4 Conformal and Schrödinger Tensor Invariants .....	27
<b>3 Coadjoint Representation of the Schrödinger–Virasoro Group</b> .....	31
3.1 Coadjoint Action of $\mathfrak{sv}$ .....	32
3.2 Coadjoint Orbits of $\mathfrak{sv}$ .....	37
<b>4 Induced Representations and Verma Modules</b> .....	43
4.1 Introduction and Notations .....	43
4.2 Kac Determinant Formula for $\text{Vect}(S^1) \ltimes \mathcal{F}_0$ .....	46
4.3 Kac Determinant Formula for $\mathfrak{sv}$ .....	52

<b>5</b>	<b>Coinduced Representations</b>	57
5.1	The Lie Algebra $\mathfrak{sv}$ as a Cartan Prolongation	58
5.2	About Multi-Diagonal Differential Operators and Some Virasoro-Solvable Lie Algebras	61
5.3	Coinduced Representations of $\mathfrak{sv}$	68
5.4	Examples of Coinduced Representations	72
<b>6</b>	<b>Vertex Representations</b>	75
6.1	On the Extended Schrödinger–Virasoro Lie Algebra $\widehat{\mathfrak{sv}}$ and its Coinduced Representations	77
6.2	The Schrödinger–Virasoro Primary Fields and the Superfield Interpretation of $\widehat{\mathfrak{sv}}$	81
6.2.1	Definition of the Schrödinger–Virasoro Primary Fields	82
6.2.2	A Superfield Interpretation	86
6.3	Construction by $U(1)$ -Currents or $a\bar{b}$ -Theory	89
6.3.1	Definition of the $\widehat{\mathfrak{sv}}$ -Fields	89
6.3.2	Construction of the Generalized Polynomial Fields ${}_{\alpha}\Phi_{j,k}$	95
6.4	Correlators of the Polynomial and Generalized Polynomial Fields	106
6.5	Construction of the Massive Fields	111
<b>7</b>	<b>Cohomology, Extensions and Deformations</b>	125
7.1	Some Prerequisites About Lie Algebra Cohomology	126
7.2	Classifying Deformations of $\mathfrak{sv}(0)$	128
7.3	Computation of $H^2(\mathfrak{sv}_{\varepsilon}(0), \mathbb{R})$	138
7.4	About Deformations of $\mathfrak{sv}_1(0)$	141
7.5	Coming Back to the Original Schrödinger–Virasoro Algebra	144
<b>8</b>	<b>Action of <math>\mathfrak{sv}</math> on Schrödinger and Dirac Operators</b>	147
8.1	Definitions and Notations	148
8.2	Affine Schrödinger Cocycles	154
8.3	Action on Dirac–Lévy–Leblond Operators	157
<b>9</b>	<b>Monodromy of Schrödinger Operators</b>	161
9.1	Introduction	161
9.2	Classification of the Schrödinger Operators in $\mathcal{S}_{\leq 2}^{aff}$	167
9.2.1	Statement of the Problem and Connection with the Classification of Hill Operators	167
9.2.2	Classification of Hill Operators by the Lifted Monodromy	169
9.2.3	Kirillov’s Classification of Hill Operators by Isotropy Subgroups	172
9.2.4	Classification of the SV-Orbits in $\mathcal{S}_{\leq 2}^{aff}$	176
9.2.5	Connection to U. Niederer’s Results	181

9.3	Monodromy of Time-Dependent Schrödinger Operators of Non-resonant Types and Ermakov-Lewis Invariants .....	182
9.3.1	Ermakov-Lewis Invariants and Schrödinger–Virasoro Invariance .....	182
9.3.2	Solution of the Associated Classical Problem .....	189
9.3.3	Spectral Decomposition of the Model Operators .....	191
9.3.4	Monodromy of Non-resonant Harmonic Oscillators (Elliptic Case) .....	192
9.3.5	Monodromy of Harmonic Repulsors (Hyperbolic Type) .....	193
9.3.6	Monodromy of Non-resonant Operators of Unipotent Type .....	195
9.4	Symplectic Structures and General Solution of the Schrödinger Equation .....	196
<b>10</b>	<b>Poisson Structures and Schrödinger Operators</b> .....	207
10.1	Introduction .....	207
10.2	Algebras of Pseudodifferential Symbols .....	210
10.3	Time-Shift Transformation and Symmetries of the Free Schrödinger Equation .....	214
10.4	From Central Cocycles of $(\Psi D_r)_{\leq 1}$ to the Kac-Moody Algebra $\mathfrak{g}$ .....	216
10.4.1	Central Cocycles of $(\Psi D_r)_{\leq 1}$ .....	217
10.4.2	Introducing the Kac-Moody Type Lie Algebra $\mathfrak{g}$ .....	219
10.5	Construction of the Embedding $I$ of $(D\Psi D_\xi)_{\leq 1}$ into $\mathfrak{g}$ .....	220
10.6	The Action of $\mathfrak{sv}$ on Schrödinger Operators as a Coadjoint Action .....	221
10.7	Connection with the Poisson Formalism .....	226
<b>11</b>	<b>Supersymmetric Extensions of the Schrödinger–Virasoro Algebra</b> .....	231
11.1	On the Dirac-Lévy-Leblond Equation .....	233
11.2	Supersymmetry in Three Dimensions and Supersymmetric Schrödinger-Invariance .....	240
11.2.1	From $N = 2$ Supersymmetry to the Super-Schrödinger Equation .....	240
11.2.2	Dynamic Symmetries of the Super-Schrödinger Model .....	245
11.2.3	Some Physical Applications .....	248
11.2.4	Dynamic Symmetries of the $(3 2)$ -Supersymmetric Model .....	249
11.2.5	First Correspondence with Poisson Structures: The Super-Schrödinger Model .....	250

11.2.6	Second Correspondence with Poisson Structures: The Case of $\mathfrak{osp}(2 4)$ , or the $(3 2)$ -Supersymmetric Model .....	254
11.3	Extended Super-Schrödinger Transformations .....	257
11.3.1	Elementary Examples .....	258
11.3.2	General Case .....	260
11.3.3	Study of the Case $N = 2$ .....	264
11.4	Two-Point Functions .....	267
<b>A</b>	<b>Appendix to Chapter 6</b> .....	273
<b>B</b>	<b>Appendix to Chapter 11</b> .....	281
B.1	Supersymmetric Two-Point Functions .....	281
B.1.1	$\tilde{\mathfrak{s}}^{(1)}$ -Covariant Two-Point Functions .....	281
B.1.2	$\tilde{\mathfrak{s}}^{(2)}$ -Covariant Two-Point Functions .....	284
B.1.3	$\mathfrak{osp}(2 2)$ -Covariant Two-Point Functions .....	284
B.1.4	$\mathfrak{se}(3 2)$ -Covariant Two-Point Functions .....	288
B.1.5	$\mathfrak{osp}(2 4)$ -Covariant Two-Point Functions .....	289
B.2	Table of Lie Superalgebras .....	289
	<b>References</b> .....	293
	<b>Index</b> .....	299

The Schrödinger-Virasoro Algebra

Mathematical structure and dynamical Schrödinger  
symmetries

Unterberger, J.; Roger, C.

2012, XLII, 302 p., Hardcover

ISBN: 978-3-642-22716-5
