Part I Mathematical Prerequisites

1	Introduction	3
1.1	Introduction to Soliton Theory	3
1.2	Algebraic and Geometric Approaches	4
1.3	A List of Useful Derivatives in Finite Dimensional Spaces	6
2	Mathematical Prerequisites	9
2.1	Elements of Topology	9
2.1.1	Separation Axioms	11
2.1.2	Compactness	13
2.1.3	Weierstrass–Stone Theorem	15
2.1.4	Connectedness, Connectivity, and Homotopy	17
2.1.5	Separability and Basis	18
2.1.6	Metric and Normed Spaces	19
2.2	Elements of Homology	20
2.3	Group Action	21
3	The Importance of the Boundary	23
3.1	The Power of Compact Boundaries: Representation Formulas	23
3.1.1	Representation Formula for $n = 1$: Taylor Series	24
3.1.2	Representation Formula for $n = 2$: Cauchy Formula	24
3.1.3	Representation Formula for $n = 3$: Green Formula	25
3.1.4	Representation Formula in General: Stokes Theorem	26
3.2	Comments and Examples	28
4	Vector Fields, Differential Forms, and Derivatives	31
4.1	Manifolds and Maps	32
4.2	Differential and Vector Fields	35

4.3	Existence and Uniqueness Theorems: Differential Equation Approach	40
4.4	Existence and Uniqueness Theorems: Flow Box Approach.....	45
4.5	Compact Supported Vector Fields	47
4.6	Differential Forms and the Lie Derivative	48
4.7	Differential Systems, Integrability and Invariants	54
4.8	Poincaré Lemma.....	56
4.9	Fiber Bundles and Covariant Derivative	57
4.9.1	Principal Bundle and Frames	59
4.9.2	Connection Form and Covariant Derivative	61
4.10	Tensor Analysis	66
4.11	The Mixed Covariant Derivative.....	69
4.12	Curvilinear Orthogonal Coordinates	71
4.13	Special Two-Dimensional Nonlinear Orthogonal Coordinates	75
4.14	Problems	76
5	Geometry of Curves	79
5.1	Elements of Differential Geometry of Curves	79
5.2	Closed Curves	86
5.3	Curves Lying on a Surface	91
5.4	Problems	94
6	Geometry of Surfaces	97
6.1	Elements of Differential Geometry of Surfaces.....	99
6.2	Covariant Derivative and Connections	107
6.3	Geometry of Parameterized Surfaces Embedded in \mathbb{R}^3	110
6.3.1	Christoffel Symbols and Covariant Differentiation for Hybrid Tensors.....	113
6.4	Compact Surfaces	115
6.5	Surface Differential Operators.....	117
6.5.1	Surface Gradient	117
6.5.2	Surface Divergence	118
6.5.3	Surface Laplacian.....	120
6.5.4	Surface Curl.....	121
6.5.5	Integral Relations for Surface Differential Operators.....	124
6.5.6	Applications.....	125
6.6	Problems	129
7	Motion of Curves and Solitons	131
7.1	Kinematics of Two-Dimensional Curves.....	132
7.2	Mapping Two-Dimensional Curve Motion into Nonlinear Integrable Systems	136
7.3	The Time Evolution of Length and Area.....	144
7.4	Cartan Theory of Three-Dimensional Curve Motion.....	150
7.5	Kinematics of Three-Dimensional Curves	152

7.6	Mapping Three-Dimensional Curve Motion into Nonlinear Integrable Systems	156
7.7	Problems	157
8	Theory of Motion of Surfaces	159
8.1	Differential Geometry of Surface Motion	159
8.2	Coordinates and Velocities on a Fluid Surface	162
8.3	Kinematics of Moving Surfaces	168
8.4	Dynamics of Moving Surfaces	170
8.5	Boundary Conditions for Moving Fluid Interfaces	173
8.6	Dynamics of the Fluid Interfaces	174
8.7	Problems	176
 Part II Solitons and Nonlinear Waves on Closed Curves and Surfaces		
9	Kinematics of Hydrodynamics	179
9.1	Lagrangian vs. Eulerian Frames	179
9.1.1	Introduction	180
9.1.2	Geometrical Picture for Lagrangian vs. Eulerian	181
9.2	Fluid Fiber Bundle	183
9.2.1	Introduction	183
9.2.2	Motivation for a Geometrical Approach	186
9.2.3	The Fiber Bundle	189
9.2.4	Fixed Fluid Container	190
9.2.5	Free Surface Fiber Bundle	193
9.2.6	How Does the Time Derivative of Tensors Transform from Euler to Lagrange Frame?	196
9.3	Path Lines, Stream Lines, and Particle Contours	199
9.4	Eulerian–Lagrangian Description for Moving Curves	203
9.5	The Free Surface	206
9.6	Equation of Continuity	207
9.6.1	Introduction	208
9.6.2	Solutions of the Continuity Equation on Compact Intervals	214
9.7	Problems	220
10	Dynamics of Hydrodynamics	223
10.1	Momentum Conservation: Euler and Navier–Stokes Equations	223
10.2	Boundary Conditions	226
10.3	Circulation Theorem	228
10.4	Surface Tension	234
10.4.1	Physical Problem	234
10.4.2	Minimal Surfaces	236
10.4.3	Application	238

10.4.4	Isothermal Parametrization	241
10.4.5	Topological Properties of Minimal Surfaces	244
10.4.6	General Condition for Minimal Surfaces	246
10.4.7	Surface Tension for Almost Isothermal Parametrization	247
10.5	Special Fluids	250
10.6	Representation Theorems in Fluid Dynamics	250
10.6.1	Helmholtz Decomposition Theorem in \mathbb{R}^3	250
10.6.2	Decomposition Formula for Transversal Isotropic Vector Fields	253
10.6.3	Solenoidal–Toroidal Decomposition Formulas	256
10.7	Problems	257
11	Nonlinear Surface Waves in One Dimension	259
11.1	KdV Equation Deduction for Shallow Waters	259
11.2	Smooth Transitions Between Periodic and Aperiodic Solutions	264
11.3	Modified KdV Equation and Generalizations	269
11.4	Hydrodynamic Equations Involving Higher-Order Nonlinearities	270
11.4.1	A Compact Version for KdV	271
11.4.2	Small Amplitude Approximation	273
11.4.3	Dispersion Relations	276
11.4.4	The Full Equation	277
11.4.5	Reduction of GKdV to Other Equations and Solutions	279
11.4.6	The Finite Difference Form	283
11.5	Boussinesq Equations on a Circle	286
12	Nonlinear Surface Waves in Two Dimensions	289
12.1	Geometry of Two-Dimensional Flow	289
12.2	Two-Dimensional Nonlinear Equations	296
12.3	Two-Dimensional Fluid Systems with Boundary	299
12.4	Oscillations in Two-Dimensional Liquid Drops	302
12.5	Contours Described by Quartic Closed Curves	304
12.6	Surface Nonlinear Waves in Two-Dimensional Liquid Nitrogen Drops	305
13	Nonlinear Surface Waves in Three Dimensions	309
13.1	Oscillations of Inviscid Drops: The Linear Model	311
13.1.1	Drop Immersed in Another Fluid	313
13.1.2	Drop with Rigid Core	315
13.1.3	Moving Core	321
13.1.4	Drop Volume	325
13.2	Oscillations of Viscous Drops: The Linear Model	327
13.2.1	Model 1	328

13.3	Nonlinear Three-Dimensional Oscillations of Axisymmetric Drops	341
13.3.1	Nonlinear Resonances in Drop Oscillation	351
13.4	Other Nonlinear Effects in Drop Oscillations	362
13.5	Solitons on the Surface of Liquid Drops	363
13.6	Problems	372
14	Other Special Nonlinear Compact Systems	373
14.1	Nonlinear Compact Shapes and Collective Motion	373
14.2	The Hamiltonian Structure for Free Boundary Problems on Compact Surfaces	378
 Part III Physical Nonlinear Systems at Different Scales		
15	Filaments, Chains, and Solitons	385
15.1	Vortex Filaments	385
15.1.1	Gas Dynamics Filament Model and Solitons	391
15.1.2	Special Solutions	394
15.1.3	Integration of Serret–Frenet Equations for Filaments	395
15.1.4	The Riccati Form of the Serret–Frenet Equations	397
15.2	Soliton Solutions on the Vortex Filament	400
15.2.1	Constant Torsion Vortex Filaments	400
15.2.2	Vortex Filaments and the Nonlinear Schrödinger Equation	403
15.3	Closed Curves Solitons	406
15.4	Nonlinear Dynamics of Stiff Chains	408
15.5	Problems	410
16	Solitons on the Boundaries of Microscopic Systems	411
16.1	Solitons as Elementary Particles	412
16.2	Quantization of Solitons on a Closed Contour and Instantons	414
16.3	Clusters as Solitary Waves on the Nuclear Surface	417
16.4	Solitons and Quasimolecular Structure	426
16.5	Soliton Model for Heavy Emitted Nuclear Clusters	428
16.5.1	Quintic Nonlinear Schrödinger Equation for Nuclear Cluster Decay	430
16.6	Contour Solitons in the Quantum Hall Liquid	433
16.6.1	Perturbative Approach	436
16.6.2	Geometric Approach	438
17	Nonlinear Contour Dynamics in Macroscopic Systems	445
17.1	Plasma Vortex	445
17.1.1	Effective Surface Tension in Magnetohydrodynamics and Plasma Systems	445
17.1.2	Trajectories in Magnetic Field Configurations	446
17.1.3	Magnetic Surfaces in Static Equilibrium	455

17.2	Elastic Spheres	462
17.3	Curvature Dependent Nonlinear Diffusion on Closed Surfaces	464
17.4	Nonlinear Evolution of Oscillation Modes in Neutron Stars	465
18	Mathematical Annex	467
18.1	Differentiable Manifolds	467
18.2	Riccati Equation	468
18.3	Special Functions	469
18.4	One-Soliton Solutions for the KdV, MKdV, and Their Combination	470
18.5	Scaling and Nonlinear Dispersion Relations	472
	References	475
	Index	485

Nonlinear Waves and Solitons on Contours and Closed
Surfaces

Ludu, A.

2012, XVIII, 490 p., Hardcover

ISBN: 978-3-642-22894-0
