1	Introduction and Outline	1
1.1	State of the Art in Regional Econometric Modelling	1
1.2	A Stylized Framework for Time–Space–Structural Analysis	5
1.3	Contribution of This Work	8
1.3.1	General Outline	8
1.3.2	Internal Migration and the Labor Market	9
1.3.3	Link to the World: Trade & FDI Activity	10
1.3.4	Growth, Factor and Final Demand	12
	References	14
 Part I Internal Migration and the Labor Market		
2	A Panel VAR Approach for Internal Migration Modelling and Regional Labor Market Dynamics in Germany	19
2.1	Introduction	19
2.2	Literature Review	20
2.3	Modelling Migration in a System of Regional Labor Market Dynamics and Economic Development	22
2.4	Data and Stylized Facts of Intra-German Migration	26
2.5	Dynamic Panel Data Estimators in a VAR Framework	28
2.6	Empirical Results	31
2.7	East–West Migration: Still an “Empirical Puzzle”?	39
2.8	Conclusion	44
	Appendix A Testing for Instrument Validity in the Migration Equation	45
	Appendix B Impulse–Response Functions and In-Sample PVAR(1) Predictions for East–West Net Migration	47
	References	50
3	Testing the Neoclassical Migration Model: Overall and Age-Group Specific Results for German Regions	53
3.1	Introduction	53
3.2	The Neoclassical Migration Model	54

3.3	Econometric Specification	56
3.3.1	Functional Form of the Empirical Migration Equation . . .	56
3.3.2	Choice of Estimation Technique and Model Misspecification Tests	57
3.4	What Does the Empirical Literature Say?	60
3.5	Data and Stylized Facts	62
3.6	Empirical Results for the Neoclassical Migration Model	67
3.6.1	Aggregate Findings	67
3.6.2	Disaggregate Estimates by Age Groups	73
3.7	Conclusion	76
Appendix A	Estimated State Level Effects in Migration Models	77
Appendix B	Baseline and Augmented Regression Results by Age Groups	78
References	80
4	Space–Time Dependence in Internal Migration Flows: Evidence for Germany since Re-unification	83
4.1	Introduction	83
4.2	Econometric Model Specification	84
4.2.1	Neoclassical Migration: A Benchmark Model	84
4.2.2	Spatial Upgrading of Dynamic Panel Data Models	86
4.2.3	Imposing Spatial Dependency Structures for Migration Flows	92
4.3	Stylized Facts and Exploratory Space–Time Data Analysis	94
4.4	Empirical Results of the Spatial Regression Approach	102
4.5	Conclusion	110
Appendix A	Space–Time Moran’s <i>I</i> Indices	111
Appendix B	Spatial Filtering and Optimal Distance Based Weight Matrix	113
References	118
 Part II Trade and FDI Activity		
5	Trade-FDI Linkages in a Simultaneous Equations System of Gravity Models for German Regional Data	123
5.1	Introduction	123
5.2	Gravity Models of Trade and FDI	125
5.2.1	Theoretical Foundations	125
5.2.2	Empirical Operationalization	126
5.3	Theory and Empirics of Trade-FDI Linkages	131
5.4	Data and Stylized Facts	134
5.5	Econometric Specification and Estimation Results	139
5.5.1	Time Series Properties of the Variables	139
5.5.2	Econometric Specification	141
5.5.3	Estimation Results	143
5.5.4	Robustness Checks	148

5.6	Identification of Trade-FDI Linkages	149
5.7	Conclusion	153
	Appendix A IV and Non-IV System Estimators	154
A.1	The General Model	154
A.2	The HT-3SLS-GMM Estimator	155
A.3	The FEVD(-SUR) Estimator and Bootstrapping Standard Errors	157
	Appendix B Testing for Cross-Equation Residual Correlation	159
	References	160
6	Estimating Gravity Models of Trade with Correlated Time-Fixed Regressors: To IV or not IV?	165
6.1	Introduction	165
6.2	Panel Data Models with Time-Fixed Regressors	167
6.3	Monte Carlo Simulation Results	170
6.4	Empirical Illustration: Trade Estimates for German Regions	178
6.5	Conclusion	182
	Appendix A Monte Carlo Simulation Design	183
	Appendix B Variable Description for the Gravity Model	188
	References	188
7	Within and Between Panel Cointegration in the German Regional Output–Trade–FDI Nexus	191
7.1	Introduction	191
7.2	Theory and Empirics of Output–Trade–FDI Linkages	193
7.3	Data and Stylized Facts	195
7.4	Econometric Specification	198
7.5	Empirical Results	199
7.5.1	Within Panel Cointegration and ECM	199
7.5.2	Global Cointegration and SpECM	202
7.6	Robustness Check: Transport Flows as Spatial Weights	207
7.7	Conclusion	209
	Appendix A Bootstrapping the Spatio-Temporal Extension of Moran's I	210
	Appendix B Moment Conditions for the Spatial Dynamic GMM Model	211
	References	212
 Part III Growth, Factor and Final Demand		
8	Dynamic Simultaneous Equations with Panel Data: Small Sample Properties and Application to Regional Econometric Modelling	219
8.1	Introduction	219
8.2	Model Setup: DSEM with Panel Data	220
8.2.1	General Specification	220
8.2.2	Estimators for Dynamic Panel Data Models	221

8.2.3	Extension of GMM Estimation for Multiple Equation Settings	224
8.2.4	Evaluation Literature on Finite Sample Performance	225
8.3	Monte Carlo Simulations	227
8.3.1	Model Design and Parameter Settings	227
8.3.2	Simulation Results	231
8.3.3	Extension: Simulation with Heteroscedastic Errors	245
8.4	Empirical Application: A Small-Scale Regional Economic Model	247
8.4.1	Model Specification	247
8.4.2	Data and Empirical Results for Baseline Model	251
8.4.3	Interregional Spillovers from Public Capital and the Impact of Regional Transfers	259
8.5	Conclusion	266
	References	267
9	Speed Up or Slow Down? The Effects of Capital Investment Grants on German Regional Growth	273
9.1	Introduction	273
9.2	Institutional Setup and Literature Review	274
9.3	Theoretical Foundation and Empirical Specification	278
9.3.1	The Neoclassical Growth Model and Income Convergence	278
9.3.2	Empirical Specification of the Convergence Equation	280
9.4	Data and Empirical Results	284
9.5	Model Extension to the Analysis of Spatial Effects	292
9.6	Conclusion	299
