<b>1</b>	<b>Traditional Magnetism</b>	1
1.1	Magnetic Concepts	2
1.1.1	Magnetic Dipoles	2
1.1.2	Magnetic Field Intensity and Magnetic Flux Density	4
1.1.3	Magnetic Susceptibility and Magnetic Permeability	5
1.2	Classification of Magnetic Materials	6
1.2.1	Diamagnetism	6
1.2.2	Paramagnetism	6
1.2.3	Antiferromagnetism	7
1.2.4	Ferrimagnetism	8
1.2.5	Ferromagnetism	9
1.3	Origins of Magnetism	10
1.3.1	Angular Momentum and Its Role in Magnetism	10
1.3.2	Exchange Coupling and Exchange Bias	11
1.3.3	Partition Function $Z$	15
1.3.4	Intrinsic and Induced Anisotropy	16
1.3.5	Magnetostriction	19
1.4	Historical Uses of Magnetic Materials	20
1.4.1	Permanent Magnets	20
1.4.2	Silicon–Iron Alloys. Wound Cores	23
1.4.3	Nickel–Iron Alloys. Permalloys	25
1.4.4	Compounds with Rare Earth Elements	28
	References	37
<b>2</b>	<b>Micromagnetism and the Magnetization Process</b>	39
2.1	Magnetic Domains in Ferromagnets	40
2.1.1	The Process of Division into Magnetic Domains	40
2.1.2	Formation of Domain Walls	42
2.2	The Process of Magnetization in Ferromagnets	44
2.2.1	Initial Magnetization Curve	44
2.2.2	Magnetic Domain Wall Motion	45

2.2.3	Magnetic Barkhausen Noise .....	47
2.2.4	Magnetization Rotation.....	48
2.3	Mechanisms of Resistance to Domain Wall Motion .....	49
2.3.1	Lattice Strain Fields .....	49
2.3.2	Nonmagnetic Inclusions .....	53
2.3.3	Artificial Pinning and Depinning .....	57

<b>5 Thermoelectrics, Thermomagnetics, Magnetoelectrics, and Multiferroics</b>	147
5.1 Thermoelectric Devices	148
5.1.1 Thermoelectric Voltage	148
5.1.2 Figure-of-Merit	150
5.1.3 Heat Transfer in Thermoelectric Structures	151
5.1.4 Thermal Conductivity	154
5.1.5 Nanoscale Effects on Heat Transfer	157
5.1.6 A Few Thermoelectric Material Considerations	162
5.1.7 Heusler Alloys with Thermoelectric Potential	164
5.2 Thermomagnetic Phenomena	166
5.2.1 The Nernst and Ettingshausen Effects	166
5.2.2 Influence of Specimen Geometry	167
5.2.3 Summarized Theoretical Model	168
5.3 The Magnetoelectric Effect	171
5.3.1 Magnetoelectric Voltage Coefficient	171
5.3.2 Fabrication Conditions	172
5.3.3 Incorporating Piezomagnetic Materials	174
5.4 Multiferroics	177
5.4.1 Combining Ferroic Phases	177
5.4.2 Multiferroics in Applications	180
References	186
<b>6 Giant Magnetoresistance. Spin Valves</b>	189
6.1 Basic Considerations about Giant Magnetoresistance	190
6.1.1 Changes in Magnetoresistance	190
6.1.2 Magnetoresistance and Electron Spin	192
6.1.3 Quantifying Magnetoresistance	195
6.1.4 Using the Nonequilibrium Green's Function Formalism	197
6.2 Configuration and Choice of Materials	203
6.2.1 The Term "Spin Valve"	203
6.2.2 Hard and Soft Ferromagnetic Layers	204
6.2.3 Fabrication Dependence of Spin Valve Structures	206
6.2.4 Dilute Magnetic Semiconductors as Spin Valve Materials	209
6.3 A Closer Look at Incoherent Scattering	211
6.3.1 Using Büttiker Probes	211
6.3.2 Spin Scattering at Interfaces	214
6.3.3 Scattering in a Broader Context	214
6.3.4 Additional Interface Influences on Spin Valve Performance	216
6.4 Other Devices and Spin Valves	218
6.4.1 Magnetic Flux Concentrators	218
6.4.2 Vibration Detectors	219
6.4.3 Microbridge Deflection Monitor	221

6.5	Magnetoresistive Heads.....	222
6.5.1	The Role of the Magnetoresistive Head .....	222
6.5.2	Material and Design Considerations for Magnetoresistive Heads .....	223
