

Contents

1	Introduction	1
1.1	Basic Concepts of Fractional Calculus	1
1.1.1	Special Functions	1
1.1.2	Definitions in Fractional Calculus	3
1.2	Solution of Fractional Differential Equations Using Laplace Transform	5
1.3	Some Visualizations of Fractional Calculus	5
1.4	Geometric and Physical Interpretation of Fractional Order Differentiation and Integration	7
1.5	Application of Fractional Calculus in Science and Engineering	10
	References	11
2	Basics of Fractional Order Signals and Systems	13
2.1	Fractional Order LTI Systems	14
2.1.1	Transfer Function Representation	14
2.1.2	State-Space Representation	15
2.2	Realization of Fractional Order Differ-integrators	17
2.2.1	Continuous Time Realization	17
2.2.2	Discrete Time Realization	19
2.3	Discrete Time Fractional Order Models	23
2.3.1	ARFIMA Models	23
2.3.2	Discrete Time FO Filters	24
2.4	Fractional Order Convolution and Correlation	24
2.5	Calculation of H_2 and H_∞ Norms of Fractional Order Systems	26
2.5.1	H_2 Norm of FO Systems	26
2.5.2	H_∞ Norm of FO Systems	27
	References	28

3	Long Range Dependence, Stable Distributions and Self-Similarity	31
3.1	Introduction	31
3.2	Rational Transfer Function Models of Signals and its Extension to ARFIMA Models	32
3.3	Few Characteristics of Fractional Pole Zero Models	34
3.4	Stable Distributions	35
3.5	Statistical Self-Similarity of Stochastic Processes	36
3.5.1	Self-Similar Processes with Stationary Increments	37
3.5.2	Fractional Brownian Motion	38
3.5.3	Persistence and Anti-Persistence	38
3.5.4	Fractional Gaussian Noise	39
3.5.5	Simulation of Fractional Brownian Motion and Fractional Gaussian Noise	40
3.5.6	Fractional Levy Stable Motion and Noise	43
3.6	Multi-Fractional Gaussian Noise	43
3.6.1	Concept of Variable Order Integrator	44
3.7	The Fractal Dimension	45
3.8	Hurst Parameter Estimators	45
3.8.1	Estimation of the Constant Hurst Index H in the Interval $(0.5, 1)$	46
3.8.2	Estimation of the Time Varying Hurst Parameter for a Locally Self Similar Process	47
	References	49
4	Fractional Order Integral Transforms	51
4.1	Fractional Fourier Transform as a Generalization of the Standard Integer Order Fourier Transform	51
4.1.1	Some Basic Properties of FrFT	53
4.1.2	FrFT of Some Commonly Used Functions	53
4.1.3	Relation of the FrFT with Other Transforms	53
4.1.4	Two Dimensional Transform	55
4.1.5	Discrete FrFT and its Computation	56
4.1.6	Filtering and Noise Removal in Fractional Domain	56
4.1.7	FrFT Applications in Other Areas of Signal Processing	58
4.2	Fractional Sine, Cosine and Hartley Transforms	60
4.3	Fractional B-splines and Fractional Wavelet Transform	61
4.3.1	The B-spline and the Fractional B-spline	61
4.3.2	Fractional B-spline Wavelets	62
	References	63

5 Fractional Order System Identification	67
5.1 Time Domain Identification Methods	68
5.1.1 Equation Error Model	69
5.1.2 Output Error Model	72
5.2 Frequency Domain Identification	75
5.2.1 Levy's Identification Method for Fractional Order Systems	75
5.2.2 Managing Multiple Frequencies	78
5.2.3 Adaptation of Levy's Algorithm Using Weights	79
5.3 Other Identification Techniques	80
References	81
6 Fractional Order Statistical Signal Processing	83
6.1 Fractional Order Kalman Filter	83
6.1.1 Brief Overview of the Kalman Filter	83
6.1.2 The Fractional Kalman Filter	84
6.1.3 The Extended Fractional Kalman Filter for Non-linear Systems	86
6.1.4 Improved Fractional Kalman Filter	87
6.2 Fractional Lower Order Moments and Their Applications to Signal Processing	89
6.2.1 Importance of Non-Gaussian Statistical Signal Processing	89
6.2.2 Characteristic Functions, FLOM and Covariations	90
6.2.3 Parameter Estimation for Symmetric Stable Distributions	92
6.2.4 Estimation of Covariation	94
References	95
7 MATLAB Based Simulation Tools	97
7.1 Numerical Tools for Fractional Calculus	97
7.2 Simulation of FO LTI Systems	98
7.3 Rational Approximation of FO Differ-integrators	98
7.4 Fractional Fourier and Wavelet Transform	99
7.5 Fractional Kalman Filter	99
7.6 System Identification	99
7.7 Hurst Parameter Estimators	99
7.8 Miscellaneous	100
References	100

Fractional Order Signal Processing
Introductory Concepts and Applications

Das, S.; Pan, I.

2012, XIII, 101 p. 6 illus., 5 illus. in color., Softcover

ISBN: 978-3-642-23116-2
