

Table of Contents

2nd WMRIF Workshop for Young Materials Scientists

Materials challenges for nuclear fission and fusion	1
<i>Examination of Dust Particles from Present-Day Controlled Fusion Devices</i>	3
Elzbieta Fortuna-Zalesna , University of Technology, Warsaw, Poland	
<i>Quantitative microstructural investigation of neutron-irradiated RAFM steel for nuclear fusion applications</i>	13
Oliver J. WeiB , KIT, Karlsruhe, Germany	
<i>Controlling Welding Residual Stresses by means of Alloy Design</i>	23
Arne Kromm , BAM, Berlin, Germany	
<i>Degradation Mechanism of Creep Strength Enhanced Ferritic Steels for Power Plants</i>	35
Kota Sawada , NIMS, Tsukuba, Japan	
<i>Electrochemical studies on pitting corrosion on Cr13 steel exposed to CO₂ and artificial brine with high chloride concentration</i>	45
Oleksandra Yevtushenko , BAM, Berlin, Germany	
<i>Development of ¹⁰B₂O₃ processing for use as a neutron conversion materials</i>	55
Lars F. Voss , LLNL, Livermore, U.S.A.	
Materials challenges for water supply	65
<i>Water overlayers on Cu(110) studied by van der Waals density Functional</i>	67
Sheng Meng , IPHY CAS, Beijing, China	

Challenges in conclusive, realistic and system oriented materials testing	77
<i>Employment of high Resolution RBS to characterize ultrathin transparent electrode in high efficiency GaN based Light Emitting Diode</i>	79
Grace Huiqi Wang , IMRE, Singapore	
<i>A possible route to the quantification of piezoresponse force microscopy through correlation with electron backscatter diffraction</i>	95
Tim L. Burnett , NPL, Teddington, United Kingdom	
<i>High Resolution Analysis of Tungsten Doped Amorphous Carbon thin Films</i>	107
Marcin Rasinski , University of Technology, Warsaw, Poland	
<i>Electron Microscopy Studies on Oxide Dispersion Strengthened Steels</i>	117
Arup Dasgupta , IGCAR, Kalpakkam, India	
<i>Fabrication of Probes for In-situ Mapping of Electrocatalytic Activity at the Nanoscale</i>	129
Andrew J. Wain , NPL, Teddington, United Kingdom	
<i>Electrochemical Synthesis of Nanostructured Pd-based Catalyst and Its Application to On-Chip Fuel Cells</i>	143
Satoshi Tominaka , NIMS, Tsukuba, Japan	
<i>Characterization and Synthesis of PtRu/C Catalysts for Possible Use in Fuel Cells</i>	153
Eleanor Fourie , MINTEK, Randburg, South Africa	
<i>Synthesis and investigation of silver-peptide bioconjugates and investigation in their antimicrobial activity</i>	163
Olga Golubeva , ISC RAS, Saint Petersburg, Russia	
<i>Characterization of Stabilized Zero Valent Iron Nanoparticles</i>	173
Lauren F. Greenlee , NIST, Boulder, U.S.A.	
<i>Combustion Synthesis of Nanoparticles CeO_2 and $\text{Ce}_{0.9}\text{Gd}_{0.1}\text{O}_{1.95}$</i>	189
Sumittra Charojrochkul , MTEC, Pathumthani, Thailand	
<i>Understandings of Solid Particle Impact and Bonding Behaviors in Warm Spray Deposition</i>	203
Makoto Watanabe , NIMS, Tsukuba, Japan	

<i>Mechanical properties of innovative metal/ceramic composites based on freeze-cast ceramic performs</i> Siddhartha Roy , KIT, Karlsruhe, Germany	213
<i>Mini-Samples Technique in Tensile and Fracture Toughness Tests of Nano-Structured Materials</i> Tomasz Brynk , University of Technology, Warsaw, Poland	221
<i>The use of Focused Ion Beam to Build Nanodevices with Graphitic Structures</i> Braulio Archango , INMETRO, Rio de Janeiro, Brasil	235
<i>Development of compact continuous-wave terahertz (THz) sources by photoconductive mixing</i> Hendrix Tanoto , IMRE, Singapore	245
<i>Electrical Impedance Characterization of Cement-Based Materials</i> Supaporn Wansom , MTEC, Pathumthani, Thailand	251
<i>On the Use of Indentation Technique as an Effective Method for Characterising starch-based food gels</i> Chaiwut Gamonpilas , MTEC, Pathumthani, Thailand	261
<i>Photothermal Radiometry applied in nanoliter melted tellurium alloys</i> Andrea Cappella , LNE, Trappes, France	273
Extraction and recovery of scarce elements and minerals	285
<i>Biological Treatment of Solid Waste Materials from Copper and Steel Industry</i> Elina Merta , VTT, Espoo, Finland	287

Materials Challenges and Testing for Supply of Energy
and Resources

Boellinghaus, Th.; Lexow, J.; Kishi, T.; Kitagawa, M. (Eds.)

2012, VIII, 296 p., Hardcover

ISBN: 978-3-642-23347-0
