

Contents

1	Introduction	1
1.1	The World Cold Regions	1
1.2	Water in Frozen Soils	2
1.3	Permafrost	5
1.3.1	Definitions	5
1.3.2	Distribution	6
1.3.3	Factors Influencing Permafrost Occurrence	7
1.4	Permafrost and Hydrology	13
1.4.1	Permafrost Hydrology	13
1.4.2	Hydrologic Behavior of Seasonal Frost and Permafrost	15
1.5	Environments of Permafrost Regions	16
1.5.1	Hydroclimatology	16
1.5.2	Geology	17
1.5.3	Glaciation	20
1.5.4	Physiography	20
1.5.5	Vegetation	26
1.5.6	Peat Cover	30
1.6	Presentation of the Book	31
	References	33
2	Moisture and Heat	35
2.1	Precipitation	35
2.1.1	General Pattern	35
2.1.2	Cyclones	36
2.1.3	Recycling	37
2.1.4	Trace Precipitation	39
2.2	Surface Energy Balance	40
2.3	Evaporation	42
2.3.1	Eddy Fluctuation Method	43
2.3.2	Aerodynamic Method	44

2.3.3 Bowen Ratio Method	44
2.3.4 Priestley and Taylor Method	45
2.4 Energy Balance of the Active Layer	46
2.4.1 Energy Balance	46
2.4.2 Thermal Conductivity and Heat Capacity	47
2.5 Ground Temperature	49
2.5.1 Penetration of Temperature Waves	50
2.5.2 Frost Table Development	52
2.6 Heat and Moisture Flows in Frozen Soils	53
2.6.1 Stefan's Algorithm	54
2.6.2 Near-Surface Ground Temperature	55
2.6.3 Moisture Migration and Ice Lens Formation	56
2.7 Ground Ice	61
2.7.1 Types of Ground Ice	61
2.7.2 Excess Ice	66
References	70
3 Groundwater	73
3.1 Groundwater Occurrence in Permafrost	74
3.1.1 Suprapermafrost Groundwater	75
3.1.2 Intrapermafrost Groundwater	76
3.1.3 Subpermafrost Groundwater	77
3.2 Groundwater Recharge and Circulation	78
3.2.1 Recharge	78
3.2.2 Groundwater Movement	80
3.3 Groundwater Discharge	84
3.3.1 Seeps	84
3.3.2 Springs	87
3.3.3 Baseflow	90
3.3.4 Ponds and Lakes	93
3.4 Icings	95
3.4.1 Ground and Spring Icings	96
3.4.2 River Icings	100
3.4.3 Icing Dimension	105
3.4.4 Icing Problems	106
3.5 Domed Ice Features	107
3.5.1 Frost Mounds and Icing Mounds	107
3.5.2 Pingos	108
References	116
4 Snow Cover	119
4.1 Snow Accumulation	119
4.1.1 Winter Precipitation	120
4.1.2 Blowing Snow	121

4.1.3 Terrain Heterogeneity	123
4.1.4 Vegetation Cover	125
4.2 Characteristics of the Snow Cover	130
4.2.1 Snow Temperature and Insulation	130
4.2.2 Snow Metamorphism	132
4.2.3 Snow Stratigraphy	133
4.3 Snowmelt Processes	134
4.3.1 Radiation Melt	136
4.3.2 Turbulent Fluxes Melt	138
4.3.3 Other Melt Terms	140
4.4 Snowmelt in Permafrost Areas	142
4.4.1 Tundra and Barren Areas	145
4.4.2 Dirty Snow	148
4.4.3 Shrub Fields	148
4.4.4 Forests	150
4.5 Meltwater Movement in Snow	152
4.5.1 Dry Snow	154
4.5.2 Wet Snow	157
References	159
5 Active Layer Dynamics	163
5.1 Freeze-Back and Winter Periods	163
5.1.1 Snow Cover and Ground Freezing	164
5.1.2 Moisture Flux and Ice Formation	167
5.1.3 Vapor Flux from Soil to Snow	170
5.2 Snowmelt Period	171
5.2.1 Snowmelt and Basal Ice	172
5.2.2 Infiltration into Frozen Soil	178
5.2.3 Soil Warming	185
5.2.4 Surface Saturation, Evaporation and Runoff	187
5.3 Summer	190
5.3.1 Active Layer Thaw	190
5.3.2 Summer Precipitation	199
5.3.3 Evaporation	202
5.3.4 Rainwater Infiltration	212
5.3.5 Soil Moisture	216
5.3.6 Groundwater	220
References	223
6 Slope Processes	229
6.1 Flow Paths	229
6.1.1 Flow Paths in Snow	229
6.1.2 Surface and Subsurface Flows	235

6.1.3 Flow in Bedrock Areas	237
6.1.4 Flow in Unconsolidated Materials	239
6.2 Water Sources	254
6.3 Factors Influencing Slope Runoff Generation	258
6.3.1 Microclimatic Control	258
6.3.2 Topographic Influence	259
6.3.3 Importance of the Frost Table	261
6.3.4 Roles of Organic Materials	267
6.3.5 Bedrock Control	272
6.4 Basin Slopes in Permafrost Regions	275
6.4.1 High Arctic Slopes	276
6.4.2 Low Arctic Slopes	281
6.4.3 Subarctic Slopes	284
6.4.4 Alpine Permafrost Zones	287
6.4.5 Precambrian Bedrock Terrain	293
6.5 Concepts for Basin Flow Generation	296
6.5.1 Variable Source Area and Fill-and-Spill Concepts	296
6.5.2 Heterogeneous Slopes	299
References	300
7 Cold Lakes	305
7.1 Types of Lakes	305
7.2 Lake Ice	310
7.2.1 Lake Ice Regime	310
7.2.2 Ice Formation and Growth	313
7.2.3 Ice Decay	317
7.3 Lake Circulation	323
7.4 Hydrologic Inputs	325
7.5 Lake Evaporation	329
7.6 Lake Outflow	331
7.6.1 Outflow Conditions	331
7.6.2 Fill-and-Spill Concept and Lake Outflow	335
7.7 Lake Level	338
7.8 Large Lakes	339
7.9 Permafrost and Lakes	343
References	344
8 Northern Wetlands	347
8.1 Wetlands in Permafrost Regions	347
8.2 Factors Favoring Wetland Occurrence	348
8.2.1 Climate	349
8.2.2 Topography	349
8.2.3 Stratigraphy	350
8.2.4 Other Factors	351

8.3	Hydrogeomorphic Features in Wetlands	353
8.3.1	Bog-Related Features	354
8.3.2	Fen-Related Features	357
8.3.3	Marshes and Swamps	357
8.3.4	Shallow Water Bodies	360
8.4	Hydrologic Behavior of Wetlands	363
8.4.1	Seasonality of Hydrologic Activities	364
8.4.2	Wetland Storage	370
8.4.3	Flow Paths	373
8.4.4	Application of Fill-and-Spill Concept	378
8.5	Patchy Arctic Wetlands	380
8.5.1	Wetlands Maintained by Snowmelt	381
8.5.2	Groundwater-Fed Wetlands	383
8.5.3	Valley Bottom Fens	383
8.5.4	Wetlands due to Lateral Inundation	385
8.5.5	Tundra Ponds	385
8.5.6	Lake-Fed and Lake-Bed Wetlands	387
8.6	Extensive Wetlands	388
8.6.1	Wet Terrain	388
8.6.2	Ice-Wedge Polygon Fields	390
8.6.3	Coastal Plains	391
8.6.4	Deltas	395
8.6.5	Subarctic Continental Wetlands	396
8.7	Wetlands, Permafrost and Disturbances	400

9	Rivers in Cold Regions	407
9.1	Drainage Patterns	407
9.2	In-Valley Conditions	411
9.2.1	Geological Setting for Channels	411
9.2.2	River Ice	413
9.2.3	River Icing	420
9.2.4	In-Channel Snow	423
9.2.5	Permafrost	430
9.2.6	Alluvial Environment	434
9.3	In-Channel Hydrology	435
9.3.1	Lateral Inflow	437
9.3.2	Channel Inflow	437
9.3.3	Vertical Water Exchanges	440
9.3.4	Storage in Channels	441
9.4	Flow Connectivity and Delivery	446
9.4.1	Flow Network Integration	446
9.4.2	Decoupling of Flow Network	448
9.4.3	Flow Delivery	451
