
Contents

1	Introduction	1
1.1	The discovery of nuclear fission	1
1.2	The classical liquid-drop model	3
1.2.1	Volume-charged drops	3
1.2.2	Surface-charged drops	11
1.2.3	Hydrodynamics	16
1.3	Shell model and pairing correlations	18
2	POTENTIAL-ENERGY SURFACES	21
2.1	Mean field theories	21
2.1.1	The Hartree-Fock theory	22
2.1.2	The Hartree-Fock-Bogolyubov theory	26
2.1.3	The Bardeen-Cooper-Schrieffer (BCS) theory	28
2.1.4	Thomas-Fermi and extended Thomas-Fermi theories	36
2.1.5	Relativistic mean field theory	40
2.1.6	Spontaneous symmetry breaking	44
2.1.7	Effective interactions	46
2.1.8	Mean-field potential and other leptodermous distributions	55
2.2	Macroscopic mass formulae	60
2.2.1	Leptodermous expansions	60
2.2.2	Liquid-drop mass-formulae	67
2.2.3	The droplet model	75
2.3	Shell and pairing corrections to the macroscopic mass formula	82
2.3.1	The Strutinsky shell-correction	82
2.3.2	Microscopic justification of the Strutinsky shell-correction	88
2.3.3	The extended Thomas-Fermi-plus-Strutinsky integral method	90
2.4	Energy surfaces	91
2.4.1	Calculations with shape constraints	92

2.4.2	Calculations based on shape parametrizations	96
2.4.3	Survey of the geometry of stationary points	103
2.4.4	Effect of an odd-particle on the fission barrier	115
2.5	Effect of rotation on the fission barriers	116
3	THE NUCLEAR LEVEL DENSITY	123
3.1	The Thomas-Fermi model	124
3.2	The picket-fence model	129
3.3	Angular momentum and odd-even dependence of the level density	132
3.4	Shell corrections	135
3.5	Corrections for vibrational and rotational excitations	141
3.6	Pairing correlations	144
3.7	Fits of level-density formulae and compilations of empirical level densities	149
4	STATISTICAL DECAY MODELS	155
4.1	Transition-state theory	156
4.1.1	Excitation energy well above the barrier	156
4.1.2	Excitation energy close to the fission barrier	161
4.1.3	Parity violation in fission	163
4.1.4	Transmission coefficients	168
4.1.5	Cascade calculations	172
4.2	Scission-point models	175
4.2.1	Neck rupture	177
4.2.2	Mass and charge distributions of fission fragments	181
4.2.3	Angular-momentum-bearing scission modes	190
4.2.4	Cold fission	194
4.2.5	Ternary fission	198
5	FISSION DYNAMICS	207
5.1	Adiabatic motion	208
5.1.1	The cranking approach	208
5.1.2	The Hill-Wheeler-Griffin theory	212
5.1.3	Decay rates	222
5.1.4	Spontaneous fission half-lives	226
5.1.5	Mass distribution of spontaneous fission fragments	232
5.1.6	Cluster radioactivity and α -decay	233
5.2	Fission dynamics of excited nuclei	237
5.2.1	The Langevin process	238
5.2.2	The Fokker-Planck equation	256
5.2.3	Werner-Wheeler approximation of the hydrodynamical inertial tensor	269
5.2.4	The friction tensor	272

Theory of Nuclear Fission

A Textbook

Krappe, H.J.; Pomorski, K.

2012, IX, 320 p. 101 illus., Softcover

ISBN: 978-3-642-23514-6
