

Contents

1	Overview	1
2	Numerical Algorithms for ESM: State of the Art	3
2.1	Space Discretization: Finite Difference and Finite Volume Methods	5
2.2	Space Discretization: Spectral Transform Methods	8
2.3	Time Discretizations	10
2.4	Numerical Algorithms for Parameterized Physical Processes	12
	References	14
3	Numerical Algorithms for ESM: Future Perspectives for Atmospheric Modelling	19
	References	22
4	Numerical Algorithms for ESM: Future Perspectives for Ocean Modelling	25
4.1	Finite Element and Finite-Volume Methods	26
4.2	An Incomplete Overview	29
4.3	Challenges of Unstructured Grids	31
4.4	Conclusions	32
	References	32
5	Efficiency for Adaptive Triangular Meshes: Key Issues of Future Approaches	35
5.1	Introduction	35
5.1.1	Quadrilateral vs. Triangular Meshes	36
5.1.2	Applications Suitable for Adaptive Meshing	37
5.1.3	Key Challenges for Adaptive Triangular Meshes and Solvers	38
5.2	Triangular Mesh Generation	39
5.2.1	Delaunay Triangulations	40

5.2.2	Hierarchical Triangulations	41
5.2.3	Data Structures	42
5.3	Adaptive Mesh Control	44
5.3.1	Error Estimation Concepts	44
5.3.2	Refinement Strategies	45
5.4	Optimisation of Hierarchical Triangular Mesh Computations . . .	46
5.4.1	Linearization with Space-Filling Curves	46
5.5	Example of an Adaptive Mesh Refinement Computation	47
	References	49
6	Code Design and Quality Control	51
6.1	Design for Sustainability	52
6.2	Software Coding Standards	53
6.3	Version Control	55
6.4	Other Tools to Support Coding	56
6.5	Code Reviews	58
6.6	Verification and Validation for ESM	59
6.7	Model Intercomparisons	61
6.8	Assessments of Model Quality	62
	References	63
7	Code Optimisation	67
7.1	Application Portability	67
7.2	Profiling	68
7.3	Compiler Optimisation	70
7.4	Optimisations for Vector, Scalar and Cache-Based Architectures	71
7.4.1	Use Stride 1	72
7.4.2	Avoid Stores	73
7.4.3	Remove Divides	73
7.4.4	Remove IFs	74
7.4.5	Optimisations for Cache	75
	References	76
8	Code Parallelisation On Massively Parallel Machines	77
8.1	Introduction to Parallel Computing	77
8.2	A General Communication and Synchronization Model for Parallel systems	80
8.3	Parallel Programming Models	84
8.4	Simplifying the Expression of Parallelism	86
	References	87
9	Future Perspectives	89
	References	91
	Glossary	93
	Index	95

Earth System Modelling - Volume 2
Algorithms, Code Infrastructure and Optimisation
Bonaventura, L.; Redler, R.; Budich, R.
2012, XI, 96 p. 20 illus., Softcover
ISBN: 978-3-642-23830-7
