

Contents

- 1 Modeling of Socio-Economic Systems 1**
 - 1.1 Introduction 1
 - 1.2 Particular Difficulties of Modeling Socio-Economic Systems 2
 - 1.3 Modeling Approaches 4
 - 1.3.1 Qualitative Descriptions 4
 - 1.3.2 Detailed Models 5
 - 1.3.3 Simple Models 6
 - 1.3.4 Modeling Complex Systems 9
 - 1.4 Challenges of Socio-Economic Modeling 11
 - 1.4.1 Promises and Difficulties of the Experimental Approach 12
 - 1.4.2 Several Models Are Right 13
 - 1.4.3 No Known Model Is Right 15
 - 1.4.4 The Model Captures Some Features, But May Be Inadequate 17
 - 1.4.5 Different Interpretations of the Same Model 19
 - 1.5 Discussion and Outlook 20
 - 1.5.1 Pluralistic or Possibilistic Modeling and Multiple World Views: The Way Out? 20
 - 1.5.2 Where Social Scientists and Natural Scientists or Engineers Can Learn from Each Other 21
 - References 22
- 2 Agent-Based Modeling 25**
 - 2.1 Why Develop and Use Agent-Based Models? 26
 - 2.1.1 Potential of Computer Simulation in the Socio-Economic Sciences 26
 - 2.1.2 Equation-Based Versus Agent-Based Approach 27
 - 2.1.3 Scientific Agent-Based Models Versus Computer Games 28
 - 2.1.4 Advantages of Agent-Based Simulations 28
