

# Contents

<b>1</b>	<b>Overview</b>	<b>1</b>
1.1	The Universe	1
1.2	The Structure of Matter	3
1.2.1	The Structure of Atoms	3
1.3	The Structure of Nuclei	6
1.3.1	Radioactivity	7
1.3.2	$\alpha$ Radiation	7
1.3.3	$\beta$ Radiation	8
1.3.4	$\gamma$ Radiation	9
1.4	The Structure of Baryons	10
1.5	Preliminary Summary	12
	Exercise	12
<b>2</b>	<b>The Evolution of the Universe</b>	<b>15</b>
2.1	The Expansion of the Universe in General Relativity	15
2.2	The History of the Universe	19
2.3	Dark Matter and Dark Energy	21
2.4	Inflation	24
2.5	Summary and Open Questions	25
	Exercises	27
<b>3</b>	<b>Elements of the Theory of Relativity</b>	<b>29</b>
3.1	The Special Theory of Relativity	29
3.1.1	Energy and Momentum	36
3.2	The General Theory of Relativity: Curved Spaces	38
3.2.1	Black Holes	41
	Exercises	43

<b>4</b>	<b>The Theory of Fields</b> . . . . .	45
4.1	The Klein–Gordon Equation . . . . .	45
4.2	The Wave Solution . . . . .	46
4.3	The Coulomb Solution . . . . .	50
4.4	Gravitational Waves . . . . .	50
	Exercises . . . . .	53
<b>5</b>	<b>Electrodynamics</b> . . . . .	55
5.1	Classical Electrodynamics . . . . .	55
5.2	Electron–Electron Scattering . . . . .	58
5.3	Quantum Electrodynamics . . . . .	60
5.4	Internal Angular Momentum . . . . .	67
5.5	The Bohr Atomic Model . . . . .	70
	Exercises . . . . .	72
<b>6</b>	<b>The Strong Interaction</b> . . . . .	73
6.1	Quantum Chromodynamics . . . . .	73
6.2	Bound States of Quarks . . . . .	76
6.3	Summary . . . . .	80
	Exercise . . . . .	80
<b>7</b>	<b>The Weak Interaction</b> . . . . .	81
7.1	W and Z Bosons . . . . .	81
7.2	Parity Violation . . . . .	86
7.3	The Higgs Boson . . . . .	88
7.4	CP Violation . . . . .	94
7.5	Neutrino Oscillations . . . . .	95
	Exercises . . . . .	99
<b>8</b>	<b>The Production of Elementary Particles</b> . . . . .	101
8.1	Introduction to Accelerator Experiments . . . . .	101
8.2	The Layout of Ring Accelerators and Detectors . . . . .	104
8.3	The Search for New Elementary Particles . . . . .	109
	Exercise . . . . .	120
<b>9</b>	<b>Symmetries</b> . . . . .	121
9.1	External Symmetries . . . . .	121
9.2	Internal Symmetries . . . . .	123
9.3	Gauge Symmetries and Gauge Fields . . . . .	127
	Exercises (Challenging!) . . . . .	135

<b>10 The Standard Model of Particle Physics</b> . . . . .	137
10.1 Properties of the Elementary Particles . . . . .	137
10.2 Properties of the Fundamental Interactions . . . . .	138
10.3 Open Questions . . . . .	139
<b>11 Quantum Corrections and the Renormalization</b>	
Group Equations . . . . .	141
11.1 Quantum Corrections . . . . .	141
11.2 Energy Dependent Coupling Constants . . . . .	145
Exercise . . . . .	149
<b>12 Beyond the Standard Model</b> . . . . .	151
12.1 Grand Unification . . . . .	151
12.2 The Hierarchy Problem and Supersymmetry . . . . .	155
12.3 Quantum Gravity, String Theory, and Extra Dimensions . . . . .	160
Exercise . . . . .	172
<b>Appendix A</b> . . . . .	173
<b>Solutions to Exercises</b> . . . . .	175
<b>References</b> . . . . .	183
<b>Index</b> . . . . .	185

From the Universe to the Elementary Particles  
A First Introduction to Cosmology and the Fundamental  
Interactions

Ellwanger, U.

2012, XII, 192 p., Hardcover

ISBN: 978-3-642-24374-5
