

Contents

1	Chemical Pollutants as a Factor of Soil–Subsurface Irreversible Transformation: An Introductory Discussion	1
1.1	Raison d’être	1
1.2	Soil–Subsurface Region as Part of the Critical Zone	2
1.3	Human Impact on Soil Formation	3
1.4	Chemical Pollutant-Induced Irreversible Changes to the Soil–Subsurface System	5
	References	8
2	Soil–Subsurface Interrelated Matrix	11
2.1	Soil and Subsurface Solid Phase	11
2.1.1	The Mineral Phase	12
2.1.2	The Organic Phase	23
2.2	Soil and Subsurface Liquid Phase	29
2.2.1	Structure of the Water Molecule	29
2.2.2	Near Solid Phase Water	30
2.2.3	Soil and Subsurface Solution	31
2.2.4	Aquifers and Groundwater	33
	References	35
3	Properties and Behavior of Selected Inorganic and Organometallic Contaminants	39
3.1	Introductory Comments	39
3.2	Nitrogen Forms	40
3.3	Phosphorus Forms	42
3.4	Radionuclides	44
3.5	Heavy Metals and Metalloids	46
3.5.1	Arsenic and Arsenic Compounds	46
3.5.2	Cadmium	48
3.5.3	Chromium	50

3.5.4 Lead	51
3.5.5 Nickel	53
3.6 Nanosized Materials	54
3.7 Pesticides	55
3.7.1 Organophosphates	57
3.7.2 <i>N</i> -methyl Carbamates	57
3.7.3 Triazines	58
3.7.4 Organochlorines	59
3.7.5 Paraquat and Diquat	59
3.8 Synthetic Halogenated Organic Substances	60
3.8.1 Chlorinated Hydrocarbons	61
3.8.2 Brominated Flame Retardants	62
3.9 Petroleum Hydrocarbons and Fuel Additives	63
3.10 Pharmaceuticals and Personal Care Products	66
3.11 Surfactants	67
References	69
 4 On the Retention and Transformation of Contaminants	
in Soil and the Subsurface	75
4.1 Contaminant Retention by Surface Adsorption	75
4.1.1 Surface Properties of Geosorbents	75
4.1.2 Surface Adsorption	77
4.1.3 Factors Controlling Adsorption	84
4.2 Nonadsorptive Retention	88
4.2.1 Contaminant Precipitation	88
4.2.2 Particle Deposition and Trapping	89
4.3 Retention Hysteresis	90
4.3.1 True Hysteresis	91
4.3.2 Apparent Hysteresis	92
4.3.3 Bound Residues	93
4.4 Transformation of Contaminants Retained on Solid Phase	95
4.4.1 Abiotic Transformation	96
4.4.2 Biologically Mediated Transformation	100
References	107
 5 Irreversible Alteration of Soil–Subsurface Matrix Induced	
by Contaminant Exchange Processes	113
5.1 Ionic Exchange on Clay Minerals and Organic Matter:	
Introductory Considerations	113
5.1.1 Clay Minerals	113
5.1.2 Humic Substances	116

5.2 Irreversible Adsorption of Contaminants via Exchange Processes and Induced Modification of the Soil–Subsurface Mineral Phase	119
5.2.1 Major Elements	119
5.2.2 Heavy Metals	124
5.2.3 Radionuclides	133
5.2.4 Polar Organic Contaminants	137
5.3 Irreversible Adsorption via Exchange Processes and Induced Modification of the Soil Organic Phase	153
5.3.1 Metal Ions	155
5.3.2 Chemical Fertilizer	159
5.3.3 Organic Amendments	161
5.3.4 Pesticide Adsorption	164
References	171
6 Irreversible Alteration of Soil–Subsurface Matrix Induced by Contaminant Binding	177
6.1 Binding of Contaminants on Mineral and Organic Solid Phases: An Introductory Consideration	177
6.2 Induced Changes in Mineral and Organic Soil–Subsurface Constituents Following Contaminant Binding	180
6.2.1 Iron Oxide and Hydrous Oxide Sorbents	180
6.2.2 Clay Mineral Sorbents	200
6.2.3 Humic Substances as Contaminant Sorbents	229
References	255
7 Contaminant-Induced Irreversible Changes in Properties of the Soil–Subsurface Regime	263
7.1 Sodic and Saline Water Effects	263
7.1.1 Swelling	264
7.1.2 Dispersion: Flocculation	269
7.1.3 Water Transmission Properties	272
7.1.4 Crust Formation and Infiltration Rate	281
7.2 Effluents and Treated Wastewater Effects	284
7.2.1 Surfactants	284
7.2.2 Anionic Compounds	290
7.2.3 Sludge and Compost	292
7.2.4 Hydrophobic Organics and Soil Water Repellency	303
7.2.5 Long-Term Irrigation Effects	308
7.3 Agrochemical Effects	310
7.3.1 Major Elements	310
7.3.2 Trace Elements	313
7.4 Compounds of Industrial and Urban Origin	316
7.4.1 Acid Rain Effects	317
7.4.2 Hydrocarbon-Induced Irreversible Changes	325

7.5 Soil Amendment Effects 335

 7.5.1 Reclamation of Soils with Extreme pH Values 336

 7.5.2 Preventing Soil Sealing and Dispersivity 346
