

Contents

1	Introduction	1
1.1	What Is an Equation of Keldysh Type?	1
1.1.1	Remarks	2
1.2	Why Study Equations of Keldysh Type?	3
1.3	Objectives and Organization of the Course	4
1.4	The Problem of Smoothness	6
1.5	The Problem of Lower-Order Terms	7
1.5.1	First-Order Terms	8
1.5.2	Zeroth-Order Terms	8
1.6	Notation and Conventions	9
	References	9
2	Mathematical Preliminaries	13
2.1	Boundary Value Problems for Elliptic–Hyperbolic Equations	13
2.2	What Is the Right Number of Boundary Conditions?	16
2.3	What Do We Mean by “Well-posed”?	18
2.4	Technical Results from Classical Analysis	19
2.4.1	A Weak Maximum Principle	19
2.4.2	A Weighted Poincaré Inequality	21
2.4.3	An Integration-by-Parts Formula	22
2.4.4	Two Theorems from Functional Analysis	24
2.4.5	Divergent Integrals	25
2.5	Symmetric Positive Operators	26
2.5.1	The Friedrichs Identities	29
2.5.2	Two Simple Examples	33
2.6	Inhomogeneous Boundary Conditions	34
2.7	Chapter Appendix: A Survey of Applications	35
2.7.1	Variational Interpretation	35
2.7.2	A Partial List of Applications	37
2.7.3	Remark	43
	References	43

3	The Equation of Cinquini-Cibrario	47
3.1	Very Brief Historical Remarks	47
3.2	Transformation to Canonical Form	49
3.3	A Closed Dirichlet Problem Which Is Classically Ill-Posed	50
3.4	A Closed Dirichlet Problem for Distribution Solutions	56
3.4.1	<i>Almost-Correct</i> Boundary Conditions	56
3.4.2	The Existence of Distribution Solutions	58
3.5	A Strong Solution to an Open Dirichlet–Neumann Problem	61
3.5.1	<i>D</i> -Star-Shaped Domains	61
3.5.2	Admissible Domains	63
3.5.3	An Example of an Admissible Domain	67
3.6	Relation to Magnetically Dominated Plasmas	68
3.6.1	The Axisymmetric Case	71
3.6.2	An Open Dirichlet Problem for Cinquini-Cibrario’s Equation Which Is Classically Well-Posed	72
3.7	The Fundamental Solution	75
3.7.1	The Effect of a First-Order Term	82
	References	83
4	The Cold Plasma Model	87
4.1	Why Study the Cold Plasma Model?	88
4.1.1	Very Brief Historical Remarks	88
4.2	Waves in a Cold Anisotropic Plasma	88
4.2.1	Electrostatic Waves	90
4.2.2	Electromagnetic Waves	93
4.3	A Closed Dirichlet Problem Which Is Weakly Well Posed	99
4.4	Similarity Solutions	113
4.4.1	Reduction to an Ordinary Differential Equation	113
4.4.2	Computing the Weight Class	115
4.5	Will These Methods Work for Cinquini-Cibrario’s Equation?	116
	References	120

The Dirichlet Problem for Elliptic-Hyperbolic Equations of
Keldysh Type

Otway, Th.H.

2012, IX, 214 p. 26 illus., 11 illus. in color., Softcover

ISBN: 978-3-642-24414-8
