1 Introduction	1
-----------------------------	---

Part 1 Cognitive Rationality and Society

2 Psychologism and Antipsychologism	53
2.1 The Psychologism of J.S. Mill	54
2.2 The Historicist Accusation	56
2.3 The Psychological Irreducibility of Unintentional Consequences	58
2.4 The Subalternity of Mental Causes to Situational Logic	60
2.5 Mental Atomism and Psychologism	64
2.6 In Defence of Psychologism	69
2.7 Beyond Methodological Individualism: The Methodological Cognitivism	71
3 The Mind-Society Problem	77
3.1 Applied Cognition to Social Events	78
3.2 Apparent Hermeneutic Surrender	80
3.3 The Mind–Body Problem	84
3.4 Strong Identity Theory and Mental Causation	88
3.5 Cognitive Therapy to Avoid Holistic Illusion	93
3.6 Conclusion: Far From a Unified Cognitive Theory of Social Action	98
4 Cognition and Rationality of Beliefs in the Social Sciences	101
4.1 Introduction	101
4.2 The Role of Procedural Rationality in Economics	104
4.3 Perceptive Rationality and Rationality of Beliefs	106
4.4 Limits of Perception and Memory in Humans	108
4.5 Minimal Model of the Social Actor and Rationality of Beliefs ..	111
5 Brain, Mind and Social Action	115
5.1 Introduction	115
5.2 Problems in Mindreading	116

5.3	Philosophies of Social Sciences and Mindreading	119
5.4	Brain-Driven Social Scientist Mindreading and Neurosociology .	122
5.5	Mirror Neurons and Social–Social Cognition	131
5.6	Conclusion: What Does Neurosociology Tell to Philosophy of Social Sciences?	135
 Part II Cognitive Economics		
6	Developing Simon’s Bounded Rationality	143
6.1	Control of Theoretical Support of the Rational Actor Hypothesis	144
6.2	Control of the Factual Consequences of the Rational Actor Hypothesis	153
6.3	Unsatisfactory Realism in Simon’s Bounded Rationality	156
6.4	Conclusion: A <i>Big Bang</i> of Rationality?	164
7	Feasibility and Realism in Cognitive Economics	167
7.1	A Growing Dissatisfaction with Economics	167
7.2	The Empirical Vacuum of Folk Psychology Used by Economics	169
7.3	A Priori Rationality is Unfeasible	172
7.4	Back to Galileo	174
7.5	Let’s Not Ape Physics!	179
7.6	Conclusion: Why Cognitive Economics?	181
8	Economic and Cognitive Rationality in Political Behaviour	183
8.1	Introduction	183
8.2	Formal Inconsistencies of the Economic Theory of Democracy	184
8.3	Empirical Falsifications of the Economic Theory of Democracy	185
8.4	Conventionalist Stratagems in the Economic Theory of Democracy	186
8.5	An Example of the Economic Theorist of Politics: Mancur Olson	188
8.6	Olson Revisited	191
8.7	Conclusion: The Fertility of the Cognitive Approach to Politics	194
9	Which Mind for Cognitive Economics?	199
9.1	Theories of Mind in the Economic Tradition	199
9.2	Philosophical Origins of the Primacy of Reason	201
9.3	Cognitive Limits of Human Reason and Bounded Rationality ...	203
9.4	Bounded Rationality on a Large Scale	207
9.5	Cognitive Economics: The Superiority of the Intuitive Mind	213

10	Epistemological Pluralism and Economics	221
10.1	Epistemological Pluralism in Science	221
10.2	The Epistemological Specificity of Economics	225
10.3	Experiments in Economics	229
11	Neurocognition and Financial Behaviour	233
11.1	The Forecasting Superiority of Dart-Throwing Monkeys	223
11.2	Semantic and Pragmatic Anchoring	234
11.3	Dostoevsky's Gambler	236
11.4	Does "Affect" Guide the Markets?	237
11.5	How to Avoid the Flock	239
11.6	The Contribution of Neuroeconomics	241
 Part III Mind, Culture and Epistemological Universals		
12	Subjective Rationality and Cultural Diversity	253
12.1	Subjective Rationality in Durkheim, Marx, and Weber	254
12.2	Cultural Differences in Reasoning	258
12.3	Universality of Thinking Between Cultures	261
12.4	Good Reasons and Decision Making	264
13	Biology and Culture of Human Inference	267
13.1	Innate Principles of Reasoning	267
13.2	Are Children Rational?	270
13.3	Reasoning Biases or Experimental Errors?	275
13.4	Cultural Differences in the Styles of Reasoning	276
13.5	The Apparent Diversity of Tribal and Civilised Styles of Reasoning	279
13.6	Lay Folks Reasoning	282
13.7	Evolution of Social Practices to Avoid Falsity	285
13.8	Universal and Local Cognitive Styles and Their Normative Consequences	287
13.9	Conclusion: Outside the Relativist Cages	289
14	Cognitive Diversity in Western and Eastern Thinking	295
14.1	Language, Pragmatics and Representation of Knowledge	295
14.2	Cultural Differences in Logical Reasoning	299
14.3	Cultural Differences in Causal Reasoning	301
14.4	Cultural or Perceptive Differences?	304
14.5	Background Knowledge and Cognitive Differences	306

15 Adaptive Theory Change as Epistemological Universal	309
15.1 Shared Norms of Theory Choice and Biases in Reasoning Among Professional Scientists	310
15.2 Good Theory Formation and Inductive Fallacies Among “Little Scientists”	313
15.3 Problem Solving Ability and Biases in Reasoning Among “Naive Scientists”	317
15.4 Cognitive Relativism or Universality Among “Exotic Scientists”?	318
15.5 Conclusion: Theory Change as a Criterion of Rationality	323
