1	An Overview: Building a Global Knowledge Base of Lessons Learned from Good Practices in Multi-Hazard Early Warning Systems	1
	Maryam Golnaraghi	
1.1	International Attention to Early Warning Systems	2
1.2	Methodology for Identification and Documentation of Good Practices in Multi-Hazard EWS	5
1.2.1	The First International Experts' Symposium on Multi-Hazard EWS	5
1.2.2	The Second International Experts' Symposium on Multi-Hazard EWS: with focus on the Role of NMHS	6
1.3	Documentation of Good Practices	7
	References	7
	List of Acronyms	8
2	The Tropical Cyclone Early Warning System of Cuba	9
	José Maria Rubiera Torres and Miguel A. Puig	
2.1	Overview	9
2.1.1	Background to the Establishment of EWS in Cuba	10
2.2	Governance and institutional Arrangements (National to Local Levels)	10
2.2.1	Policy, institutional and legal Frameworks to Support Emergency Planning and Response	10
2.2.2	National to Local Emergency Planning and Related Linkages to EWS	11
2.2.3	Organizational Structure for Implementing the Plans	13
2.2.4	Institutional Capacities and Concept of Operations (Coordination and Operational Collaboration)	14
2.2.5	Key Factors considered for Sustainability of different Components of Early Warning Systems with a Multi-Hazard Approach	16
2.3	Utilization of Risk Information in Emergency Planning and Warnings	17
2.3.1	Organizational Responsibilities and Arrangements for the Development of Risk Information	17
2.3.2	Hazard Assessment, Quantification and Mapping (National to Local)	17
2.3.3	Assessment of Vulnerabilities and Exposure (National to Local)	18
2.3.4	Storage and Accessibility of Disaster and National Hazard Risk Information	19
2.3.5	Development and Utilization of Hazard/Risk Information to support Emergency Planning and Warnings	19
2.4	Hazard Monitoring, Forecasting, and Mandates for Warning Development	20
2.4.1	Organizational Responsibilities for Monitoring, Forecasting and Development of Hazard Warnings	20
2.4.2	Organizational Collaboration and Coordination for Monitoring, Forecasting and Development of Hazard Warnings	20
2.5	Development of timely authoritative, recognizable, and understandable Warnings	21
2.5.1	Warning Message Development Cycle	21
2.5.2	Warning Message Improvement Cycle	23
2.6	Warning Dissemination Mechanisms	23
2.7	Emergency Preparedness and Response Activities (National to Local)	24
2.7.1	Disaster Preparedness and Response Planning and Emergency Response Activation	24
2.7.2	Community Response Capacities	24
2.7.3	Public Awareness and Education	25

2.8	Development of Warnings and related Products and Services for Disaster Risk Management.....	26
2.9	Improvement of overall operational Framework of the EWS.....	26
2.10	Examples of previous Events where the operational EWS Led to Improvements in Emergency Preparedness and Prevention.....	26
2.11	Overall Lessons learned and Future Steps for Improving NMHS Contribution in EWS Particularly Focusing on institutional Coordination and Cooperation.....	28
	List of Acronyms	28
3	The Bangladesh Cyclone Preparedness Program. A Vital Component of the Nation's Multi-Hazard Early Warning System	29
	Arjumand Habib, Md. Shahidullah and Dilder Ahmed	
3.1	Overview	29
3.1.1	Background to the Establishment of EWS in Bangladesh	31
3.2	Governance and Institutional Arrangements (National to Local Levels)	32
3.2.1	Policy, institutional and legal Frameworks to support Emergency Planning and Response.....	32
3.2.2	National to Local Emergency Planning and related Linkages to EWS	34
3.2.3	Organizational Structure for Implementing the Plans	34
3.2.4	Institutional Capacities and Concept of Operations (Coordination and operational Collaboration).....	36
3.2.5	Key Factors considered for Sustainability of different Components of Early Warning Systems with a Multi-Hazard Approach	37
3.3	Utilization of Risk Information in Emergency Planning and Warnings	38
3.3.1	Organizational Responsibilities and Arrangements for the Development of Risk Information	38
3.3.2	Hazard Assessment, Quantification and Mapping (National to Local)	38
3.3.3	Assessment of Vulnerabilities and Exposure (National to Local).....	38
3.3.4	Storage and Accessibility of Disaster and national Hazard Risk Information	38
3.3.5	Development and Utilization of Hazard/Risk Information to support Emergency Planning and Warnings	38
3.4	Hazard Monitoring, Forecasting, and Mandates for Warning Development.....	39
3.4.1	Organizational Responsibilities for Monitoring, Forecasting and Development of Hazard Warnings	39
3.4.2	Organizational Collaboration and Coordination for Development of Hazard Warnings	39
3.5	Development of Understandable, Authoritative, Recognizable and Timely Warnings	40
3.5.1	Warning Message Development Cycle	40
3.5.2	Warning Message Improvement Cycle	41
3.6	Warning Dissemination Mechanisms	41
3.7	Emergency Preparedness and Response Activities (National to Local)	44
3.7.1	Disaster Preparedness and Response Planning and Emergency Response Activation.....	44
3.7.2	Community Response Capacities	44
3.7.3	Public Awareness and Education	45
3.8	Development of Warnings and Related Products and Services for Disaster Risk Management User Community.....	45
3.9	Improvement of Overall Operational Framework of EWS.....	46
3.10	Examples of Previous Events where the Operational EWS Has Led to Improvements in Emergency Preparedness and Prevention.....	46
3.11	Overall Lessons Learned and Future Steps for Improving NMHS Contribution in EWS Particularly Focusing on Institutional Coordination and Cooperation.....	47
	List of Acronyms	47
	Appendix 1 National Plans	49
	Purpose of the Corporate Plan	49
	Key Result Areas	49
	District Disaster Management Plan (DDMP)	49
	Upazila Disaster Management Plan (UZDMP)	50
	Union Disaster Management Plan (UDMP)	51
	Paurashava/City Corporation Disaster Management Plan	52

Plan for Women, Children, Elderly and Disabled	53
Casualty Information Management Plan	53
Involvement of Ansar-VDP in the Programme	53
Sectoral Development Plans incorporating Disaster Risk Reduction	53
Hazard Specific Multi-sectoral Disaster Management Plans	54
Cyclone and Flood Shelter Management Plan	54
Management Aspects of Shelter Center in Coastal Zones	54
Implementation and Follow-Up	55
Budget for MHEWS Operation	55
Appendix 2 Standing Orders for Relevant Cyclone Preparedness Programme	56
Disaster Management Bureau	56
Cyclone Preparedness Programme (CPP)	57
4 The French Vigilance System. Contributing to the Reduction of Disaster Risks in France	63
Catherine Borretti	
4.1 Overview	63
4.1.1 Background to the Establishment of the Vigilance System	63
4.2 Governance and Institutional Measures from National to Local Level	64
4.2.1 Policy, Institutional and Legal Frameworks in Support of Emergency Relief Planning and Implementation	64
4.2.2 National to Local Planning of Emergency Relief and Related Links With the EWS	67
4.2.3 Organizational Structure of the Vigilance Early Warning System	68
4.2.4 Institutional Capacities and the Operational Concept (Coordination and Operational Cooperation)	69
4.2.5 Financial and Budgetary Aspects	70
4.3 Use of Risk-Related Information to Prepare Emergency Relief and Warnings	70
4.3.1 Organizational Responsibilities and Steps for the Development of Risk-Related Information	70
4.3.2 Assessment of Risks, Quantification and Mapping (National to Local)	71
4.3.3 Assessment of Vulnerability and Exposure	73
4.3.4 Storage and Availability of Information on Disasters and Related Risks at the National Level	73
4.3.5 Development and Use of Information on Dangers/Risks to Support Emergency Intervention Planning and Alerts	73
4.4 Observation and Forecasting of Weather Hazards and Mandates for the Development of Warnings	74
4.4.1 Organizational responsibilities to observe, predict risks and issue warnings	74
4.4.2 Organizational Cooperation and Coordination for the Development of Warnings	75
4.5 Development of Authoritative, Understandable, Recognizable and Timely Warnings	76
4.5.1 Development Cycle for Vigilance Products	76
4.5.2 Cycle for Improving Vigilance Products	78
4.6 Mechanisms for the Dissemination of Warning Messages	79
4.7 Activities to Prepare and Implement Emergency Intervention	79
4.7.1 Planning of Disaster Preparedness and Implementation and Activation of Emergency Intervention	79
4.7.2 Awareness-Building and Education Activities Aimed at the General Public	80
4.8 Development of Warnings and Related Products and Services for the Disaster Risk Management User Community	80
4.9 Improvements to the Operational Framework of the Early Warning System	81
4.10 Examples of Prior Events Where the Operational EWS Has Led to Improvements in Emergency Preparedness and Prevention	81
4.11 General Experience Acquired and Future Steps to Improve the Contribution of the Weather and Hydrological Services to the EWS, With a Focus on Institutional Coordination and Cooperation	82
List of Acronyms	83
Appendix An Adaptation of the French “Vigilance” System in the French Antilles and French Guiana	84
1. Background	84
Meteorology	85

2.	Involvement of Météo-France in Early-Warning Systems (EWS) in the Antilles and French Guiana	86
3.	Differentiation of Hazard Types in Relation to the Role of Météo-France	86
4.	Application of the French “Vigilance” System to the French West Indies	87
	List of Acronyms for the Appendix	92
5	The Warning Management of the Deutscher Wetterdienst	95
	Gerhard Steinhorst and Rainer Vogelgesang	
5.1	Overview of the German Weather Warning System and the Role of the Deutscher Wetterdienst	95
5.1.1	Background to the Establishment of the Weather Warning System of the Deutscher Wetterdienst	95
5.2	Governance and Institutional Arrangements (National to Local Levels)	95
5.2.1	Policy, Institutional and Legal Framework to Support Emergency Planning and Response	95
5.2.2	National to Local Emergency Planning and Related Linkages to Early Warning Systems	96
5.2.3	Organizational Structure of DWD’s Warning Management	96
5.2.4	Institutional Capacities and Concept of Operations (Coordination and Operational Collaboration).....	99
5.2.5	Utilization of a Multi-Hazard Approach (Financial and Budgetary Aspects).....	99
5.2.6	Key Factors Considered for Sustainability of Different Components of Early Warning Systems With a Multi-Hazard Approach.....	100
5.3	Utilisation of Risk Information in Emergency Planning and Warnings	100
5.3.1	Organizational Responsibilities and Arrangements for the Development of Risk Information	100
5.3.2	Hazard Assessment, Quantification and Mapping (National to Local)	101
5.3.3	Assessment of Vulnerabilities and Exposure (National to Local).....	101
5.3.4	Storage and Accessibility of Disaster and National Hazard Risk Information.....	101
5.3.5	Development and Utilization of Hazard/Risk Information to Support Emergency Planning and Warnings	101
5.4	Hazard Monitoring, Forecasting, and Mandates for Warning Development	102
5.4.1	Organizational Responsibilities for Monitoring, Forecasting and Development of Hazard Warnings	102
5.4.2	Organizational Collaboration and Coordination for Development of Hazard Warnings	103
5.5	Development of Understandable, Authoritative, Recognisable and Timely Warnings	105
5.5.1	Warning Message Development Cycle	105
5.5.2	Warning Message Improvement Cycle	109
5.6	Warning Dissemination Mechanisms	110
5.7	Emergency Preparedness and Response Activities (National to Local)	110
5.7.1	Disaster Preparedness and Response Planning and Emergency Response Activation.....	110
5.7.2	Community Response Capacities	110
5.7.3	Public Awareness and Education	111
5.8	Development of Warnings and Related Products and Services for the Disaster Risk Management User Community.....	111
5.9	Improvement of Overall Operational Framework of Early Warning Systems	111
5.10	Examples of Previous Events Where the Operational Early Warning System Has Led to Improvements in Emergency Preparedness and Prevention	112
5.11	Overall Lessons Learned and Future Steps for Improving National Meteorological and Hydrological Services Contribution in Early Warning Systems Particularly Focusing on Institutional Coordination and Cooperation.....	112
	List of Acronyms	113
6	Multi-Hazard Early Warning System of the United States National Weather Service	115
	Harold ‘Jim’ Keeney Jr., Steve Buan and Laura Diamond	
6.1	Overview of Early Warning Systems and the Role of National Meteorological and Hydrological Services	116
6.1.1	Background	116
6.1.2	History of the U.S. National Meteorological and Hydrological Services	116

6.2	Governance and Institutional Arrangements (National to Local Levels)	116
6.2.1	Policy, Institutional and Legal Frameworks to Support Emergency Planning and Response	116
6.2.2	National to Local Emergency Planning and Related Linkages to Early Warning Systems	119
6.2.3	Organizational Structure for Implementing the Plans	120
6.2.4	Institutional Capacities and Concept of Operations (Coordination and Operational Collaboration).....	121
6.2.5	Utilization of a Multi-Hazard Approach	121
6.2.6	Key Factors Considered for Sustainability of Different Components of Early Warning Systems with a Multi-Hazard Approach	122
6.3	Utilization of Risk Information in Emergency Planning and Warnings	122
6.3.1	Organizational Responsibilities and Arrangements for the Development of Risk Information	122
6.3.2	Hazard Assessment, Quantification and Mapping (National to Local)	124
6.3.3	Assessment of Vulnerabilities and Exposure (National to Local).....	127
6.3.4	Storage and Accessibility of Disaster and National Hazard Risk Information.....	127
6.3.5	Development and Utilization of Hazard/Risk Information to Support Emergency Planning and Warnings	128
6.4	Hazard Monitoring, Forecasting, and Mandates for Warning Development	128
6.4.1	Organizational Responsibilities for Monitoring, Forecasting and Development of Hazard Warnings	128
6.4.2	Organizational Collaboration and Coordination for Monitoring, Forecasting and Development of Hazard Warnings	128
6.5	Development of Timely, Authoritative, Recognizable, and Understandable Warnings	131
6.5.1	Warning Message Development Cycle	131
6.5.2	Warning Message Improvement Cycle	132
6.6	Warning Dissemination Mechanisms	132
6.7	Emergency Preparedness and Response Activities (National to Local)	136
6.7.1	Disaster Preparedness and Response Planning and Emergency Response Activation	136
6.7.2	Community Response Capacities	137
6.7.3	Public Awareness and Education	139
6.8	Development of Warnings and Related Products and Services for the Disaster Risk Management User Community.....	140
6.9	Improvement of Overall Operational Framework of the Early Warning System	141
6.10	Examples of Previous Events Where the Operational Early Warning System Has Led to Improvements in Emergency Preparedness and Prevention	141
	2004 Indian Ocean Tsunami	141
	2005 Hurricane Katrina.....	142
	2008 Midwestern Floods.....	142
	2008 Super-Tuesday Tornado Outbreak	142
	2009 Spring Snowmelt Flood Red River of the North	142
6.11	Overall Lessons Learned and Future Steps for Improving National Meteorological and Hydrological Service Contribution in Early Warning System Particularly Focusing on Institutional Coordination and Cooperation	143
