

Contents

1	Introduction	1
1.1	Reasons for, Nature and Consequences of Solids Production	3
1.2	Wellbore Stability and Sand Failure Criteria	5
	References	16
2	Formation Sampling and Sand Analysis	19
2.1	Sieve Analysis	20
	References	26
3	Sand Control Methods	29
3.1	Restriction of Production Rate	35
3.2	Mechanical Methods of Sand Control	35
3.2.1	Slotted Liners	38
3.2.2	Screens	41
3.2.3	Screen Design and Selection	49
3.2.4	Gravel Packs	54
3.3	Gravel Pack Methods	65
3.3.1	Through-Tubing Sand Control	70
	References	81
4	Chemical Consolidation	85
4.1	Introduction	85
4.2	Resins	87
4.2.1	Thermosetting Resins	87
4.2.2	Thermoplastic Resins	87
4.2.3	Resins Curing Process	88
4.3	Treatment Execution	88
4.4	Additives	90
4.5	Resin-Coated Proppant Packs	91
4.6	Advantages and Disadvantages	92
4.7	Surface Equipment	93
	References	94

5	Frac-and-Pack Completion	95
5.1	Introduction	96
5.2	Well Selection Criteria	97
5.3	Inflow Performance	98
5.3.1	Fracture Skin Factor	103
5.3.2	Perforation Flow Skin Factor	104
5.3.3	Choked Fracture Skin Factor	105
5.3.4	Fluid Leakoff Damage	107
5.3.5	Partial Penetration and Non-Darcy Skin Factor	107
5.4	Frac-and-Pack for Sand Control	108
5.5	Key Issues in Frac-and-Pack Completion	109
5.5.1	Tip-Screenout	109
5.5.2	Net Pressure and Fluid Leakoff Considerations	111
5.6	Treatment Design and Execution	113
5.6.1	Perforations	113
5.6.2	Mechanical Considerations	114
5.6.3	Pretreatment Diagnostic Tests	115
5.6.4	Tip-Screenout Design	119
5.6.5	Pumping a TSO Treatment	122
5.7	Fracture Conductivity and Materials Selection	122
5.7.1	Optimum Fracture Dimensions	122
5.7.2	Proppant Selection	126
5.7.3	Fluid Selection	126
5.8	Fracture Design Simulators	128
5.8.1	Methodology	129
5.8.2	Design Criteria	129
5.8.3	Procedures	130
5.8.4	Numerical Simulation	132
5.8.5	Results and Conclusions	136
5.9	Evaluation of Frac-and-Pack Treatments	139
5.9.1	Production Results	139
5.9.2	Evaluation of Real-Time Treatment Data	141
5.9.3	Post-treatment Pressure-Transient Analysis	142
5.10	Emerging Frac-and-Pack Technologies	145
5.10.1	Screenless and Rigless Frac-and-Pack Completions	145
5.10.2	Complex Well-Fracture Configurations	145
	References	148
6	Treating Fluid Selection	151
6.1	Introduction	151
6.2	Available Fluid Systems	152
6.2.1	Conventional Linear Gels	152
6.2.2	Borate-Crosslinked Fluids	153
6.2.3	Organometallic-Crosslinked Fluids	153

6.2.4 Aluminum Phosphate-Ester Oil Gels	154
6.2.5 Foamed and Other Fluids	154
6.3 Breakers	154
6.4 Fluid Loss	156
6.4.1 Linear HEC Fluids	156
6.4.2 Guar-Based Linear Gels	157
6.4.3 Crosslinked Fluid Systems	158
6.5 Formation Damage	159
6.6 Fracture Conductivity	160
6.7 Gravel-Pack Completions	160
6.8 Conclusions and Recommendations	161
References	161
7 Perforating for Sand Control	163
7.1 Perforation Requirements	166
References	170
8 Downhole and Surface Equipment	171
8.1 Introduction	172
8.2 Well Completion Tools and Accessories	172
8.2.1 Fluid Flow Control Devices	173
8.2.2 Packers	173
8.2.3 Service Tool Assemblies	177
8.2.4 Seal Assemblies	178
8.2.5 Safety Joints	178
8.2.6 Blast Joints	178
8.2.7 Landing Nipples	179
8.2.8 Ported Subs	180
8.2.9 Setting Shoes	180
8.3 Surface Equipment	182
8.3.1 Mixing Equipment	182
8.3.2 Materials Storage and Transport Equipment	184
8.3.3 Pumping Equipment	185
8.3.4 Shearing and Filtering Equipment	187
8.3.5 Monitoring Equipment	189
8.4 Equipment Pressure and Temperature Rating	190
8.4.1 Temperature and Pressure Impact	191
8.4.2 Equipment Rating	191
References	193
Index	195

Sand Control in Well Construction and Operation

Matanovic, D.; Cikes, M.; Moslavac, B.

2012, VII, 200 p., Hardcover

ISBN: 978-3-642-25613-4
