

Table of Contents

I Mechanisms of Sepsis and Critical Illness

Molecular Mechanisms Underlying Severe Sepsis: Insights from Epigenetics W.F. CARSON IV and S.L. KUNKEL	3
The Neuroendocrine Axis: The Nervous System and Inflammation K. WEISMÜLLER, M.A. WEIGAND, and S. HOFER	12
The mHLA-DR System in the Critically Ill A. GOUEL, A. LEPAPE, and B. ALLAOUCHICHE	19
Gut Microbiome and Host-defense Interactions during Critical Illness T.J. SCHUIJT, T. VAN DER POLL, and W.J. WIERSINGA	29

II Metabolomics

The Metabolomic Approach to the Diagnosis of Critical Illness N. NIN, J.L. IZQUIERDO-GARCÍA, and J.A. LORENTE	43
Metabolomics in Critically ill Patients: Focus on Exhaled Air L.D.J. BOS, P.J. STERK, and M.J. SCHULTZ	53

III Sepsis Management

Cardiovascular Effects of Norepinephrine in Septic Shock X. MONNET and J.-L. TEBOUL	65
Vasopressin Therapy in Septic Shock S. REHBERG, M. WESTPHAL, and C. ERTMER	76
Antimicrobial Peptides and their Potential Application in Inflammation and Sepsis T. SCHUERHOLZ, K. BRANDENBURG, and G. MARX	85
Hypogammaglobulinemia in Sepsis M. PÄSLER, S. DIETZ, and K. WERDAN	98
Timing IgM Treatment in Sepsis: Is Procalcitonin the Answer? Z. MOLNÁR and J. FOGAS	109
Sepsis Stewardship Programs: Methods and Results M. GIRARDIS, S. BUSANI, and A. PAN	116

IV Endocrine Support

The Corticotropin Test in Critical Illness: Traps and Tricks B. VENKATESH and J. COHEN	127
Glitazones: Could They Have a Rosy Future in Critical Care? S.K.M. MARMENT, A.J. SEMARK, and P.S. KRUGER	138

V Acute Respiratory Distress Syndrome

The Complex Interaction Between Sepsis and Lung Injury R. HERRERO, I. MARTIN-LOECHES, and A. ARTIGAS	149
Biomarkers of Acute Lung Injury J.A. LORENTE, N. NIN, and A. ESTEBAN	160
Role of the Renin-angiotensin System in ARDS V. ZAMBELLI, A. GRASSI, and G. BELLANI	171
The Rise and Fall of β -Agonists in the Treatment of ARDS C.R. BASSFORD, D.R. THICKETT, and G.D. PERKINS	182
Repair after Acute Lung Injury: Molecular Mechanisms and Therapeutic Opportunities A. GONZÁLEZ-LÓPEZ and G.M. ALBAICETA	194

VI Respiratory Support

Non-invasive Ventilation Outside the ICU G. LANDONI, A. ZANGRILLO, and L. CABRINI	207
Dyspnea in the Mechanically Ventilated Patient A. DEMOULE, M. SCHMIDT, and T. SIMIŁOWSKI	219
How to Improve Oxygenation before Intubation in Patients at Risk B. JUNG, I. AZUELOS, and S. JABER	228
Position and the Compromised Respiratory System G.A. CORTES, D.J. DRIES, and J.J. MARINI	238

VII Pneumonia

Severe Community-acquired Pneumonia J. VERGRAGT, J. KESECIOGLU, and D.W. DE LANGE	253
Empiric Therapy for Gram-positive Bloodstream Infections and Pneumonia M. BASSETTI and G. VILLA	264
Oral Biofilms, Systemic Disease, and Pneumonia M.P. WISE and D.W. WILLIAMS	278
Novel Preventive Strategies for Ventilator-associated Pneumonia A. COPPADORO, E.A. BITTNER, and L. BERRA	289
Viral-associated Ventilator-associated Pneumonia M. ESPERATTI, A. LÓPEZ-GIRALDO, and A. TORRES	299

VIII Fungal Infections

Early Recognition of Invasive Candidiasis in the ICU P.-E. CHARLES, R. BRUYERE, and F. DALLE	311
Management of Invasive Candidiasis in the Critically Ill J. GARNACHO-MONTERO, A. DÍAZ-MARTÍN, and J.A. MÁRQUEZ-VÁCARO	324
Use of Antifungal Drugs during Continuous Hemofiltration Therapies P.M. HONORÉ, R. JACOBS, and H.D. SPAPEN	337

IX Hemodynamic Optimization

Guytonian Approach to the Circulation H.D. AYA, A. RHODES, and M. CECCONI	347
Perioperative Hemodynamic Optimization: A Way to Individual Goals J. BENES, R. PRADL, and I. CHYTRA	357
Perioperative Goal-directed Therapy: Monitoring, Protocolized Care and Timing M. CECCONI, C. CORREDOR, and A. RHODES	368
Blood Lactate Levels: A Manual for Bedside Use J. BAKKER and T.C. JANSEN	383

X Fluids and Blood Transfusion

The Meaning of Fluid Responsiveness R. GIRAUD, N. SIEGENTHALER, and K. BENDJELID	393
Respiratory Variation in the Perioperative and Critical Care Settings R.H. THIELE, J. RAPHAEL, and A.D. SHAW	402
Fluid Resuscitation: Think Microcirculation S. TANAKA, A. HARROIS, and J. DURANTEAU	412
Human Albumin in the Management of Complications of Liver Cirrhosis M. BERNARDI, C. MAGGIOLI, and G. ZACCHERINI	421
The Ability of Red Blood Cell Transfusions to Reach the Microcirculation K. YURUK, R. BEZEMER, and C. INCE	431
Transfusion-related Pulmonary Complications A.D. GOLDBERG, L. CLIFFORD, and D.J. KOR	441

XI Pulmonary Edema

Confounders in the Diagnosis of Pulmonary Edema in Surgical Patients F.Y. LUI, G. LUCKIANOW, and L.J. KAPLAN	461
Neurogenic Pulmonary Edema D.L. DAVISON, M. TEREK, and L.S. CHAWLA	471

XII Emergencies

Pre-hospital Resuscitative Interventions: Elemental or Detrimental M.J. LIPPMANN, G.A. SALAZAR, and P.E. PEPE	483
--	-----

Afferent Limb of Rapid Response System Activation
J. MOORE, M. HRAVNAK, and M.R. PINSKY 494

Bradykinin-mediated Angioedema
B. FLOCCARD, E. HAUTIN, and B. ALLAOUCHICHE 504

XIII Cardiac Arrest

Controlled Oxygenation after Cardiac Arrest
C.E. HOMMERS and J.P. NOLAN 519

Is There Still a Place for Vasopressors in the Treatment of Cardiac Arrest?
C. SANDRONI, F. CAVALLARO, and M. ANTONELLI 535

Cerebral Blood Flow after Cardiac Arrest
L.L.A. BISSCHOPS, C.W.E. HOEDEMAEKERS, and J.G. VAN DER HOEVEN ... 545

Post-resuscitation Care: What's Most Important for a Good Outcome?
P. MEYBOHM, J.-T. GRAESNER, and B. BEIN 556

XIV Pathogenesis of AKI

Role of Leukocytes in the Pathogenesis of Acute Kidney Injury
G.R. KINSEY and M.D. OKUSA 569

Worsening Renal Function during Decompensated Heart Failure:
The Cardio-abdomino-renal Syndrome
F.H. VERBRUGGE, W. MULLENS, and M. MALBRAIN 577

XV Diagnosis of AKI

Subclinical Damage in Acute Kidney Injury: A Novel Paradigm
S.M. BAGSHAW and M. HAASE 591

A Troponin for the Kidney: Not There Yet
L.G. FORNI, M. OSTERMANN, and B.J. PHILIPS 597

Possible Role of NGAL as an Early Renal Biomarker
S. KOKKORIS, S. NANAS, and P. ANDREWS 609

NGAL Curve for the Early Diagnosis of AKI in Heart Failure Patients
C. RONCO and B. NOLAND 618

Urine Output and the Diagnosis of Acute Kidney Injury
J.R. PROWLE and R. BELLOMO 628

XVI Management of AKI

Fluid Overload in Heart Failure and Cardiorenal Syndrome: The "5B" Approach
C. RONCO and W.F. PEACOCK 643

Coupled Plasma Filtration-adsorption
G. BERLOT, A. TOMASINI, and A. AGBEDJRO 653

XVII Nutrition

Best Timing for Energy Provision during Critical Illness M.M. BERGER and C. PICHARD	661
Pharmaconutrition with Selenium in ICU Patients W. MANZANARES, I. HARDY, and G. HARDY	672

XVIII Trauma

A New Understanding of Coagulopathy in Trauma M.C. READE and A.D. HOLLEY	689
Diagnosis of Occult Bleeding in Polytrauma F. CORRADI, C. BRUSASCO, and P. PELOSI	699
Mitochondrial Dysfunction after Traumatic Brain Injury J. SAHUQUILLO, M.-A. MERINO, and C. AIRADO	710
The First 24 Hours after Severe Head Trauma B. VIGUÉ, C. RACT, and K. TAZAROURTE	722

XIX Neurological Aspects

Brain Tissue Oxygen Monitoring in Neurocritical Care P. GEUKENS and M. ODDO	735
Quantitative EEG for the Detection of Brain Ischemia B. FOREMAN and J. CLAASSEN	746
Transitory Vegetative State/unresponsive Wakefulness Syndrome: Does it Exist? M.-A. BRUNO, D. LEDOUX, and S. LAUREYS	759

XX Sedation

Comparative Efficacy and Safety of Sedative Agents in Severe Traumatic Brain Injury D.J. ROBERTS and D.A. ZYGUN	771
‘Cooperative Sedation’: Optimizing Comfort while Maximizing Systemic and Neurological Function H.E. GOODWIN, J.J. LEWIN III, and M.A. MIRSKI	783

XXI Management, Method and Morale

Pre-hospital Care and Orientation of Critically Ill Geriatric Patients J. MANTZ, F.-X. DUCHATEAU, and A. BURNOD	797
Total Rehabilitation of the Critically Ill R.D. GRIFFITHS, C. JONES, and A. GILMORE	803
Psychological Burnout in Acute Care Medicine: “ <i>Physician Heal Thyself</i> ” P.G. BRINDLEY, B. PATEL, and P.A. FARNAN	811
Designing a Safer Intensive Care Unit M. FERRI and H.T. STELFOX	819

Challenges in Implementing Evidence-based Medicine
A.C. KAJDACS-BALLA AMARAL and G.D. RUBENFELD 828

Subject Index 837

Annual Update in Intensive Care and Emergency
Medicine 2012

Vincent, J.L. (Ed.)

2012, XXVII, 845 p., Softcover

ISBN: 978-3-642-25715-5
