

Contents

1	Introduction	1
1.1	The Motivations for This Study	1
1.1.1	The Importance of China's Energy Economy	1
1.1.2	China's Energy Economics Is Still in Its Transition	5
1.1.3	The Importance of Understanding China's Energy Economy	5
1.2	The Foci of This Study	6
1.3	The Motivation for Each Topic	6
1.3.1	A Survey of the Literature	6
1.3.2	China's Energy Situation in the New Millennium	7
1.3.3	Energy Reforms and Market Development	7
1.3.4	Tests for the Emergence of an Energy Market	7
1.3.5	Factor Substitution and the Demand for Energy	8
1.3.6	The Changes and Determinants of Energy Intensity	9
1.4	Organization of the Study	12
1.5	Published Work	13
2	A Survey of the Literature	15
2.1	The Topics to Be Reviewed and the Approaches to Be Used	15
2.1.1	The Topics to Be Reviewed	15
2.1.2	The Organizing Approaches Used in This Survey	16
2.2	Economic Growth and Energy Consumption	16
2.2.1	What Do Existing Surveys of the Literature Show?	16
2.2.2	What Can Be Learnt from This Survey?	18
2.2.3	Why Do the Results Differ?	23
2.3	The Changes in Energy Intensity of China	25
2.3.1	The Definition of Energy Intensity	26
2.3.2	The Methods Used to Decompose Energy Intensity	26
2.3.3	What Can Be Learnt from Existing Studies?	28
2.3.4	Some Observations	33

2.4	Substitution of and Demand for Energy	34
2.4.1	The Existing Studies	34
2.4.2	Some Observations	37
2.5	Energy Price Convergence in China	39
2.5.1	The Importance of Energy Price Convergence	39
2.5.2	An Area Where Less Research Has Been Undertaken	39
2.5.3	Where More Work Needs to Be Done	40
2.6	The Reforms in China's Energy Industry	40
2.6.1	The Reforms of the Regulatory System	41
2.6.2	The Reforms of Pricing Deregulation	42
2.6.3	Some Observations and Conclusions	42
2.7	Main Findings of the Existing Studies	43
3	China's Energy Situation in the New Millennium	49
3.1	An Historical Perspective of China's Energy Situation	49
3.2	China's Energy Resources	51
3.2.1	Coal Reserves	52
3.2.2	Petroleum Reserves	52
3.2.3	Natural Gas Reserves	53
3.2.4	Renewable Energy	54
3.3	Energy Industry Regulation	56
3.4	Capacity Building in the Energy Sector	56
3.5	Energy Transportation	58
3.6	Energy Pricing Mechanisms	62
3.7	Energy Efficiency	63
3.8	Energy Supply, Demand and Trade	68
3.8.1	Primary Energy Supply and Demand	68
3.8.2	Electricity Supply and Demand	73
3.8.3	Energy Trade Patterns	73
3.9	Renewable Energy Laws, Programs and Policy	75
3.9.1	Unfavorable Energy Situation	75
3.9.2	Renewable Energy Laws and Regulations	75
3.9.3	Renewable Energy Research and Programs	76
3.9.4	Renewable Energy Development Policies	77
3.10	Looking Ahead: Challenges and Opportunities	79
3.10.1	Factors Affecting Energy Demand	79
3.10.2	Factors Affecting Energy Supply	81
4	Methods and Estimation	85
4.1	Univariate Unit Root Tests	86
4.2	Panel Unit Root and Cointegration Tests	87
4.3	The Second Order Translog Cost Function	91
4.4	Aggregate Energy Price Index	92
4.5	Elasticities of Substitution and Demand	93
4.6	Assumptions for Regional Dummy Variables	94

4.7	Estimation Procedure	96
4.8	Model Specification Tests	96
4.9	Decomposition of Energy Intensity	98
5	Data Description	101
5.1	The Importance of Data	101
5.2	Energy Prices	102
5.3	Energy Consumption	103
5.4	Factor Inputs	107
5.5	Output and Deflator	112
5.6	Cost Series Construction	114
5.6.1	Total Factor Cost Series	114
5.6.2	Total Energy Cost Series	115
6	Energy Reforms and Changing Prices	125
6.1	Changing Energy Regulation in China	125
6.1.1	The Previous Regulatory System	125
6.1.2	The Emergence of a New Regulatory System	126
6.1.3	Deregulation of Specific Sectors	128
6.2	Reforms of the Energy Pricing Mechanism	130
6.2.1	The Features of Energy Reforms	130
6.2.2	Evolution of Energy Price Policies	131
6.3	The Changes in Energy Prices	133
6.3.1	Historical Observations	134
6.3.2	Observations Across Provinces	134
6.4	Reconciling Energy Reforms and Price Changes	135
7	Factor Substitution and the Demand for Energy	141
7.1	Estimates for the Aggregate Economy	141
7.1.1	Inter-factor Substitution and Demand	141
7.1.2	Inter-fuel Substitution and Demand	145
7.2	Estimates for the Regional Aggregate Economy	149
7.2.1	Inter-factor Substitution and Demand	149
7.2.2	Inter-fuel Substitution and Demand	152
7.3	Estimates for the National Industrial Economy	152
7.3.1	Inter-factor Substitution and Demand	154
7.3.2	Inter-fuel Substitution and Demand	156
7.4	Further Discussion	159
7.5	Conclusions and Implications	160
8	Technological Change and the Decomposition of Energy Intensity	163
8.1	Decomposition for the Aggregate Economy	163
8.2	Decomposition in the Industrial Economy	164
8.3	A Comparison of Decompositions Between the Two Sectors	165

8.4 Further Discussion	167
8.5 Conclusions and Implications	170
9 Gradual Reforms and the Emergence of Energy Market	171
9.1 Spatial Price Trends	171
9.1.1 Coal	172
9.1.2 Gasoline	174
9.1.3 Diesel	177
9.1.4 Electricity	179
9.2 Unit Root Tests	181
9.2.1 The ADF Unit Root Tests	181
9.2.2 Panel Unit Root Tests	190
9.3 Inter-fuel Price Trends and Cointegration Tests	195
9.3.1 Inter-fuel Price Trends	195
9.3.2 Panel Cointegration Tests	204
9.4 Comparisons with Other Studies	209
9.5 Conclusions and Implications	209
10 Conclusions and Implications	211
10.1 Main Findings and Conclusions	211
10.2 An International Perspective on Energy Markets	212
10.2.1 The Energy Industry as a Special Case?	212
10.2.2 Market vs. Regulation?	213
10.2.3 Why Regulate the Energy Sector More Than Others?	213
10.2.4 How to Evaluate China's Energy Reforms?	214
10.3 Policy Implications	214
10.4 Policy Directions	216
10.5 Some Future Work	217
Appendices	219
References	255

China's Energy Economy

Situation, Reforms, Behavior, and Energy Intensity

Ma, H.; Prof. Les Oxley

2012, XXII, 270 p., Hardcover

ISBN: 978-3-642-25886-2
