

Contents

1	String Theory	101	1
	Neil Lambert		
1.1	Introduction: Why String Theory?		1
1.2	Classical and Quantum Dynamics of Point Particles		3
1.2.1	Classical Action		3
1.2.2	Electromagnetic Field		5
1.2.3	Quantization		6
1.3	Classical and Quantum Dynamics of Strings		9
1.3.1	Classical Action		9
1.3.2	Spacetime Symmetries and Conserved Charges		12
1.3.3	Quantization		13
1.3.4	Open Strings		23
1.3.5	Closed Strings		27
1.4	Light-Cone Gauge		30
1.4.1	$D = 26, a = 1$		33
1.4.2	Partition Function		34
1.5	Curved Spacetime and an Effective Action		36
1.5.1	Strings in Curved Spacetime		36
1.5.2	A Spacetime Effective Action		38
1.6	Superstrings		39
1.6.1	Type II Strings		40
1.6.2	Type I and Heterotic String		45
1.6.3	The Spacetime Effective Action		47
	References		48
2	D-Branes and Orientifolds		49
	Ralph Blumenhagen		
2.1	The Free Boson with Boundaries		49
2.1.1	Boundary Conditions		49
2.1.2	Partition Function		55

2.2	Boundary States for the Free Boson	58
2.2.1	Boundary Conditions	58
2.2.2	Tree-Level Amplitudes	64
2.3	Boundary States for RCFTs	69
2.4	CFTs on Non-orientable Surfaces	73
2.5	Crosscap States for the Free Boson	82
2.6	Crosscap States for RCFTs	88
2.7	The Orientifold of the Bosonic String	91
	References	98
3	Introduction to Gauge/Gravity Duality	99
	Johanna Erdmenger	
3.1	Introduction	99
3.2	Preparations	101
3.2.1	Conformal Field Theory in d Dimensions	101
3.2.2	$\mathcal{N} = 4$ Super Yang–Mills Theory	105
3.2.3	Anti-de Sitter Space	114
3.2.4	D-branes	117
3.3	The AdS/CFT Correspondence	120
3.3.1	General Idea	120
3.3.2	Maldacena’s Original Argument	121
3.3.3	Field-Operator Map	124
3.4	Tests of the Correspondence	131
3.4.1	Three-Point Function of 1/2 BPS Operators	131
3.5	Introduction to Gauge/Gravity Duality	139
3.5.1	Gauge/Gravity Duality at Finite Temperature	140
3.5.2	Finite Density and Chemical Potential	142
3.6	Conclusion	144
	References	145
4	Holography for Strongly Coupled Media	147
	Dam Thanh Son	
4.1	Motivation	147
4.2	Thermal Field Theory	148
4.3	Hydrodynamics	149
4.3.1	Hydrodynamics and Two Point Functions	150
4.4	AdS/CFT Prescription for Correlation Function	151
4.4.1	Euclidean Green’s Function	151
4.4.2	Real-Time Green’s Function	152
4.4.3	Viscosity	154
4.5	Fluid-Gravity Correspondence: Diffusion	155
4.6	Nonrelativistic Conformal Invariance	157
4.6.1	Quantum Mechanics Formulation: Boundary Condition	157

4.6.2	Symmetries of Unitary Fermions	159
4.6.3	Local Operators	160
4.6.4	Schrödinger Space.	161
4.7	Summary	162
	References	163
5	Quantum Black Holes	165
	Atish Dabholkar and Suresh Nampuri	
5.1	Introduction	165
5.2	Classical Black Holes	167
5.2.1	Schwarzschild Metric	168
5.2.2	Rindler Coordinates.	169
5.2.3	Exercises	170
5.2.4	Kruskal Extension.	170
5.2.5	Event Horizon	172
5.2.6	Black Hole Parameters	173
5.2.7	Laws of Black Hole Mechanics	173
5.2.8	Historical Aside	174
5.3	Semiclassical Black Holes	176
5.3.1	Hawking Temperature	176
5.3.2	Bekenstein–Hawking Entropy.	178
5.3.3	Exercises	179
5.3.4	Bekenstein–Hawking–Wald Entropy	180
5.3.5	Extremal Black Holes	181
5.3.6	Wald Entropy for Extremal Black Holes	183
5.4	Elements of String Theory	186
5.4.1	BPS States in $\mathcal{N} = 4$ String Compactifications	186
5.4.2	Exercises	190
5.4.3	String–String Duality.	190
5.4.4	Kaluza–Klein Monopole and the Heterotic String	192
5.4.5	Supersymmetry and Extremality	193
5.4.6	BPS Dyons in $\mathcal{N} = 4$ Compactifications	195
5.5	Spectrum of Half-BPS Dyons	196
5.5.1	Perturbative Half-BPS States	196
5.5.2	Cardy Formula	199
5.6	Spectrum of Quarter-BPS Dyons	201
5.6.1	Siegel Modular Forms and Dyons	201
5.6.2	A Representative Charge Configuration	202
5.6.3	Bound States of D1-Branes and D5-Branes	205
5.6.4	Dynamics of the KK-Monopole	208
5.6.5	D1–D5 Center-of-Mass Oscillations	208
5.6.6	Wall-Crossing and Contour Prescription	208
5.6.7	Asymptotic Expansion.	211

5.7	Quantum Black Holes	212
5.7.1	Wald Entropy to Leading Order	212
5.7.2	Subleading Corrections to the Wald Entropy	216
5.7.3	Wald Entropy of Small Black Holes	218
5.8	Mathematical Background	219
5.8.1	$\mathcal{N} = 4$ Supersymmetry	219
5.8.2	Modular Cornucopia	221
5.8.3	A Few Facts About $K3$	227
	References	230
