

Contents

Part I Introductory Overview

- 1 The Origin of the SCAR Programme “Evolution and Biodiversity in the Antarctic”** 3
Guido di Prisco and Peter Convey

Part II Theme 1: Biodiversity and the Environment

- 2 Southern Ocean Deep-Sea Isopod Biodiversity Research: From Census to Ecosystem Functioning** 21
Angelika Brandt
- 3 The TUNU-Programme: Euro-Arctic Marine Fishes—Diversity and Adaptation** 35
Jørgen S. Christiansen
- 4 Sea-Ice Interactions with Polar Fish: Focus on the Antarctic Silverfish Life History.** 51
Marino Vacchi, Philippe Koubbi, Laura Ghigliotti and Eva Pisano
- 5 Connectivity and Molecular Ecology of Antarctic Fishes** 75
Filip A. M. Volckaert, Jennifer Rock and Anton P. van de Putte
- 6 Phylogeny and Systematics of Antarctic Teleosts: Methodological and Evolutionary Issues** 97
Guillaume Lecointre

Part III Theme 2: Response to Stress—Adaptations

7	Evolutionary Adaptation and Disaptation in the Cold: the Icefish Paradigm.	121
	Bruno Tota, Daniela Amelio, Filippo Garofalo and Daniela Pellegrino	
8	Aspects of Protein Cold Adaptation in Antarctic Fish	143
	Craig Marshall	
9	Understanding Adaptations and Responses to Change in Antarctica: Recent Physiological and Genomic Advances in Marine Environments.	157
	Lloyd S. Peck and Melody S. Clark	
10	The Challenges of Low Temperature in the Evolution of Bacteria	183
	Guido di Prisco, Daniela Giordano, Roberta Russo and Cinzia Verde	
11	The Adaptive Evolution of Polar Fishes: Lessons From the Function of Hemoproteins.	197
	Cinzia Verde, Daniela Giordano, Roberta Russo and Guido di Prisco	
	Conclusions.	215
	Perspectives and Implications	217

Adaptation and Evolution in Marine Environments,
Volume 1

The Impacts of Global Change on Biodiversity

di Prisco, G.; Verde, C. (Eds.)

2012, XXIV, 224 p., Hardcover

ISBN: 978-3-642-27351-3
