

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Scope of the Book	2
1.2	Degradation of Speech Signals	3
1.3	Need for Quality Assessment and Control of Speech Signals	4
1.4	Organization of the Book	5
	References	6
<b>2</b>	<b>Speech Quality</b>	<b>7</b>
2.1	Speech Quality Assessment	7
2.2	Objective Speech Quality Measures	8
2.2.1	SNR Measures	8
2.2.2	LP-Based Measures	11
2.2.3	Weighted Spectral Slope Measures	12
2.2.4	Articulation Index	12
2.2.5	Speech Transmission Index	13
2.2.6	PESQ	13
2.3	Subjective Speech Quality Measures	15
2.3.1	Opinion Scores	15
2.3.2	Speech Intelligibility	16
2.4	Conclusion	18
	References	19
<b>3</b>	<b>The Japanese Diagnostic Rhyme Test</b>	<b>21</b>
3.1	Rhyme Tests	21
3.2	Diagnostic Rhyme Tests	21
3.3	Japanese Consonant Taxonomy	24
3.4	Japanese DRT Word-Pair List	25
3.5	The Evaluation Procedure	27
3.6	Conclusion	27
	References	28

<b>4</b>	<b>The Effect of Word Familiarity on the DRT Scores. . . . .</b>	<b>29</b>
4.1	Word Familiarity and Its Effect on Speech Intelligibility . . . . .	29
4.2	Experimental Procedures . . . . .	29
4.3	Results and Discussions . . . . .	32
4.4	Conclusion . . . . .	34
	References . . . . .	34
<b>5</b>	<b>Examples of Noise-Degraded Speech Intelligibility Measurements Using the Japanese DRT . . . . .</b>	<b>37</b>
5.1	Overview . . . . .	37
5.2	Experimental Setup . . . . .	37
5.3	Results and Discussions . . . . .	40
5.3.1	Comparison of Intelligibility Versus SNR by Speaker Gender . . . . .	43
5.4	Conclusion . . . . .	45
	References . . . . .	45
<b>6</b>	<b>DRT Evaluation of Localized Speech Intelligibility in Virtual 3-D Acoustic Space. . . . .</b>	<b>47</b>
6.1	Multi-Party Audio Conferencing System Using Localized Speech in 3-D Virtual Acoustic Space . . . . .	47
6.2	Intelligibility of Localized Speech Without Audio Coding . . . . .	49
6.2.1	Experimental Setup . . . . .	49
6.2.2	Source Placement . . . . .	49
6.2.3	Speech Localization Using HRTFs . . . . .	50
6.2.4	Localization Using Real Sources. . . . .	52
6.2.5	Results. . . . .	53
6.3	Effect of Stereo Audio Coding on Speech Intelligibility. . . . .	59
6.3.1	The HE-AAC Coding Standard. . . . .	60
6.3.2	Joint Stereo Coding. . . . .	61
6.3.3	Parametric Stereo Coding. . . . .	62
6.3.4	Speech Intelligibility of Stereo-Coded Localized Speech Without Competing Noise . . . . .	63
6.3.5	Speech Intelligibility of Stereo-Coded Localized Speech with Competing Noise. . . . .	65
6.4	Conclusion . . . . .	71
	References . . . . .	72
<b>7</b>	<b>Other DRT Evaluation Examples . . . . .</b>	<b>75</b>
7.1	DRT Evaluation of Efficiency of Speaker-Dependent Maskers . . . . .	75
7.1.1	Speaker-Dependent Babble Noise . . . . .	76
7.1.2	Speech Intelligibility of Speech with Maskers in Simulated Non-Reverberant Environment. . . . .	77

7.1.3	Speech Intelligibility of Speech with Maskers in Actual Reverberant Environment . . . . .	78
7.2	DRT Evaluation of Guide Speech Over Parametric Speaker Arrays . . . . .	80
7.2.1	Parametric Speaker Arrays . . . . .	81
7.2.2	Speech Intelligibility with Speaker Array Facing Downwards . . . . .	82
7.2.3	The Effect of Beam Orientation on the Speech Intelligibility . . . . .	86
7.3	Conclusion . . . . .	91
	References . . . . .	91
<b>8</b>	<b>Estimation of DRT Scores Using Objective Measures . . . . .</b>	<b>93</b>
8.1	Overview . . . . .	93
8.2	Estimation of DRT Scores Using Objective Measures . . . . .	93
8.2.1	Description of Objective Measures Used in this Study . . . . .	94
8.2.2	Experimental Setup . . . . .	95
8.2.3	Correlation Analysis Between Objective Measures and DRT Scores . . . . .	95
8.2.4	Estimation of DRT Scores by Mapping Individual Per-Word Objective Measures . . . . .	97
8.2.5	Estimation of DRT Scores by Mapping Pooled Per-Feature Objective Measures . . . . .	101
8.2.6	Discussions . . . . .	113
8.3	Estimation of DRT Scores Using Automatic Speech Recognition . . . . .	116
8.3.1	Configuration of the Automatic Speech Recognizer for DRT Word-Pair Recognition . . . . .	121
8.3.2	Experimental Setup . . . . .	123
8.3.3	Recognition Accuracy of DRT Words Using the Speech Recognizer with Speaker-Independent Models . . . . .	125
8.3.4	Recognition Accuracy of DRT Words Using the Speech Recognizer with Speaker-Adapted Models . . . . .	127
8.3.5	Recognition Accuracy of DRT Words Using the Speech Recognizer with Speaker- and Noise-Adapted Models . . . . .	131
8.3.6	Recognition Accuracy of DRT Words Using the Speech Recognizer with Multi-Condition Adapted Models . . . . .	133
8.3.7	Summary of Results and Discussions . . . . .	136
8.4	Conclusion . . . . .	139
	References . . . . .	140

**9 Summary** . . . . . 143

    References . . . . . 147

**Index** . . . . . 149

Subjective Quality Measurement of Speech  
Its Evaluation, Estimation and Applications

Kondo, K.

2012, XIV, 154 p., Hardcover

ISBN: 978-3-642-27505-0
