1 An Introduction to 50 Years of Research on Quasars.....	1
<i>Paola Marziani, Jack W. Sulentic, and Mauro D’Onofrio</i>	
1.1 The Roaring Sixties.....	1
1.2 An Operational Definition of Quasars?.....	4
1.3 Outline of the Book.....	6
References	9
2 Quasars in the Life of Astronomers.....	11
<i>Contributions by Mauro D’Onofrio, Paola Marziani, Jack W. Sulentic, Suzy Collin, Giancarlo Setti, Martin Gaskell, Joe Wampler, Martin Elvis, Iraida Pronik, Vladimir Pronik, Sergey Sergeev, Aleksander Volvach, Julian Krolik, Hagai Netzer, Alfonso Cavaliere, Paolo Padovani, Halton Arp, and Jayant Narlikar</i>	
2.1 Quasars seen from Europe	13
2.2 Quasars in the Early Radio Sky	18
2.3 Recollections of a US Astronomer.....	24
2.4 The Development of a New Instrument	35
2.5 Seyfert Galaxies as X-Ray Sources	41
2.6 AGN Astrophysics in the USSR at the Time of Quasar Discovery and Afterward.....	45
2.7 Early Modelling Attempts.....	51
2.8 The Interpretation of Quasar Spectra	53
2.9 Quasars in a Cosmological Context.....	55
2.10 The Affirmation of a Unified View	59

2.11	Challenging the Standard Paradigm	61
2.12	Alternative Views and Ideas	73
	References	81
3	Quasars: The Observational Perspectives	91
	Contributions by <i>Mauro D’Onofrio, Paola Marziani,</i> <i>Jack W. Sulentic, Greg Shields, Martin Gaskell,</i> <i>Todd Boroson, Ari Laor, Michael Hawkins, Vladimir Pronik,</i> <i>Sergey Sergeev, Deborah Dultzin, Dirk Grupe,</i> <i>Gordon Richards, Raffaella Morganti, Aleksander Volvach,</i> <i>Sebastian Zamfir, Heino Falcke, Elmar K�rding, Martin Elvis,</i> <i>Tracey Jane Turner, Ajit Kembhavi, Luigi Foschini,</i> <i>Yuri Neshpor, and Alberto Franceschini</i>	
3.1	Optical Phenomenology of Quasars	94
3.2	Techniques of Discovery	101
3.3	Organizing Quasar Broad-Line Diversity	106
3.3.1	More on the Importance of Eigenvector 1	112
3.4	Variability	114
3.5	A Photometric Monitoring Campaign	118
3.6	Micro-Variability and Its Anecdotes	120
3.7	Quasar Spectral Energy Distributions	124
3.8	Inferences from the Quasar UV Spectrum	125
3.8.1	The Baldwin Effect	125
3.8.2	Quasars’ Internal Emission-Line Shifts	128
3.9	Radio Properties of Quasars	131
3.9.1	Radio Variability and Its Implications	138
3.9.2	Radio Jets	139
3.9.3	Radio Quiet and Radio-Loud	142
3.9.4	Microquasars: Inclusion of Stellar Mass Black Holes	150
3.9.5	Radio Loudness and a Unified View of Black Holes	151
3.10	X-Rays Properties of Quasars	154
3.10.1	Discovering Quasars in the X-ray Domain	159
3.10.2	X-Ray Emission and Absorption Lines	164
3.10.3	Blurred Reflection and Absorption	169
3.10.4	More on X-ray Absorption: The “Warm Absorber”	173
3.10.5	More on the Fe K α Line	178
3.11	The γ Ray Domain	184
3.12	Observations at Infrared Wavelengths	190
3.12.1	Evidence of a Thick Torus	190
	References	192

4 Quasars Classes and Their Relationships	217
Contributions by <i>Mauro D’Onofrio, Paola Marziani,</i> <i>Jack W. Sulentic, Deborah Dultzin, Yuri Efimov,</i> <i>Martin Gaskell, Marianne Vestergaard, Damien Hutsemékers,</i> <i>Alberto Franceschini, Ari Laor, Dirk Grupe, Sebastian Lipari,</i> <i>Begoña García Lorenzo, Evencio Mediavilla, Todd Boroson,</i> <i>Mike Eracleous, Isabel Marquez-Perez, Elmar K�rding,</i> <i>and Heino Falcke</i>	
4.1 BL Lacs and Blazars	219
4.2 Unobscured and Obscured Quasars: Where are They?	222
4.3 Phenomenology of Absorption Lines in Quasars	223
4.3.1 The Broad Absorption Lines QSOs	224
4.4 Type-2 AGNs	230
4.4.1 Dust Obscuration	235
4.5 Narrow-Line Seyfert-1 Nuclei	240
4.6 The ULIRG–QSO Connection	248
4.7 Double-Peaked Emitters and the Greater AGN Population	255
4.8 LINERs	258
4.9 Quasars and Microquasars	266
4.9.1 Black Hole X-Ray Binaries	266
4.9.2 The Fundamental Plane of Black Hole Activity	267
References	272
5 From Observations to Physical Parameters	287
Contributions by <i>Mauro D’Onofrio, Paola Marziani,</i> <i>Jack W. Sulentic, Greg Shields, Shai Kaspi, Paolo Padovani,</i> <i>Damien Hutsem�kers, Ross McLure, Ari Laor,</i> <i>Marianne Vestergaard, Bozena Czerny, Krzysztof Hryniewicz,</i> <i>and Deborah Dultzin</i>	
5.1 Chemical Abundances	288
5.2 Reverberation Mapping	290
5.2.1 Size–Luminosity Relation	291
5.2.2 Stratification and Keplerian Kinematics of the BLR	292
5.3 An Alternative Method to Estimate the BLR Radius	293
5.4 Microlensing	295
5.5 Black Hole Mass Estimation	297
5.5.1 Difficulties and Uncertainties	298
5.5.2 Supermassive Black-Holes and the Host Galaxy Bulge	307
5.6 The Eddington Ratio	319
5.7 Narrow-Line Seyfert-1 as Extreme Radiators	323
5.8 Orientation Effects on Emission Lines	325
References	328

6	Models of Quasars	337
	Contributions by <i>Mauro D’Onofrio, Paola Marziani,</i> <i>Jack W. Sulentic, Julian Krolik, Martin Gaskell, Suzi Collin,</i> <i>Hagai Netzer, Bozena Czerny, Krzysztof Hryniewicz,</i> <i>Luigi Foschini, Michael Eracleous, Daniel Proga,</i> <i>Paolo Padovani, Serguei Komissarov, Isaac Shlosman,</i> <i>and Martin Elvis</i>	
6.1	The Formation of Optical–UV Emission Lines and the AGN Structure	339
6.2	BLR and NLR Properties	349
6.3	Radiation Pressure and Irregular Line Profiles	354
6.4	Line and Continuum Emission from an Accretion Disk	360
6.4.1	The Accretion Disk–BLR Relationship	362
6.4.2	Double-Peaked Profiles and Accretion Disk Line Emission	364
6.5	Origin of the Continuum	368
6.5.1	Accretion Disk Structure and Continuum Emission	370
6.6	QSO Outflows	373
6.6.1	Three Main Driving Mechanisms	374
6.6.2	The Quasar Outflows	375
6.6.3	Line-Driven and Magnetic Disk Winds	377
6.7	Interpretation of Radio Emission	381
6.7.1	Superluminal Motions	381
6.7.2	Blandford–Znajek Mechanism	390
6.7.3	Where is the Jet Launched?	395
6.8	Mechanisms of Black Hole Accretion	397
6.8.1	Accretion Drivers: Small Scales	398
6.8.2	Accretion Drivers: Large Scales	400
6.9	Modes of Disk Accretion	403
6.10	Relativistic Accretion Disk Theory	406
6.10.1	The Nature of Internal Stress in Disks	406
6.10.2	Stress at the ISCO?	408
6.11	The Obscuring Torus	410
6.12	A Quasar Model	414
6.12.1	Parsing the Torus, Dissecting the Donut	417
	References	420
7	Quasars in the Cosmic Environment	439
	Contributions by <i>Mauro D’Onofrio, Paola Marziani,</i> <i>Jack W. Sulentic, Deborah Dultzin, Gordon Richards,</i> <i>Johan Knapen, Isaac Shlosman, Raffaella Morganti,</i> <i>Renato Falomo, Mike Hawkins, Alfonso Cavaliere,</i> <i>Ross McLure, Greg Shields, Hagai Netzer, Daniel Proga,</i> <i>Alberto Franceschini, Xiaoui Fan, and Martin Elvis</i>	
7.1	The Environment Around Quasars and AGNs	441

7.2	The Observational Evidence of Infall from the Circumnuclear Environment	448
7.3	Evidence of Feedback	459
7.3.1	Interplay Between Radio Jet and the Environment	459
7.3.2	Feedback Due to Quasar Winds	462
7.4	Quasars from Well Dressed to Naked.....	464
7.5	Quasar Birth and Evolution	471
7.6	Black Hole Growth and Extremely Large Black Holes	478
7.6.1	Primordial (Seed) Black Holes	478
7.6.2	Black Hole Growth Through Galaxy Evolution	482
7.7	Dust-Enshrouded Quasars	484
7.8	High-Redshift QSOs.....	486
7.9	The Optical Luminosity Function of QSOs and Its Evolution....	490
7.10	QSO Large-Scale Environment and Clustering	493
7.11	What Are Quasars Telling Us on Structure Formation?	495
7.12	QSOs as Cosmological Probes	499
	References	505
8	The Future of Quasar Studies	521
	Contributions by <i>Mauro D’Onofrio, Paola Marziani, Jack W. Sulentic, Suzy Collin, Alberto Franceschini, Martin Elvis, Shai Kaspi, Marianne Vestergaard, Paolo Padovani, Johan Knapen, and Isaac Shlosman</i>	
8.1	The Past Achievements.....	522
8.2	Future Observational Prospects	524
8.2.1	Visual–Near IR	524
8.2.2	IR–mm Domain	526
8.2.3	X-Ray	528
8.3	Reverberation Mapping	531
8.3.1	Two-Dimensional Reverberation Mapping and Structure of the BLR.....	533
8.3.2	Dust Reverberation Mapping	536
8.3.3	X-Ray FeK α Reverberation Mapping.....	536
8.4	Digital Observatories	537
8.5	The Detection of Infalling Matter and the Accretion Scenario	542
	References	543
9	Fifty Years of Quasars: Current Impressions and Future Perspectives	549
	Contributions by <i>Jack W. Sulentic, Paola Marziani, and Mauro D’Onofrio</i>	
9.1	Summary of Achievements.....	549
9.2	Areas of Major Achievements	551
9.2.1	A Large Population of Quasars and Unification	551
9.2.2	A Universe Filled with Quasars	551

9.2.3	Probing Deep.....	552
9.2.4	Self-Similarity of Accretion Processes.....	553
9.3	The Weak Points or Some Questions That Remain for the Editors and Probably Many Readers as Well.....	553
9.3.1	The Nature of Radio Jets and the RL–RQ Dichotomy ...	553
9.3.2	The Origin of Continuum Emission in Radio-Quiet Quasars.....	554
9.3.3	The Broad-Line-Emitting Region(s)	555
9.3.4	Feedback and the Joint Evolution of Quasars and Their Host Galaxies	556
9.4	Areas Supported by Partial or Inconclusive Evidence	557
9.4.1	The Quasar Environment	557
9.4.2	The Smoking Gun of Infall	557
9.4.3	Is It Really a Black Hole?	558
9.4.4	The Quest for an H–R Diagram	558
9.5	The Future: Peering into the First of the Next 50 Years	559
9.5.1	Do We Really Need to Find More Quasars?.....	560
9.5.2	Toward a Deeper Physical Understanding	563
9.5.3	The New Redshift Frontier	564
9.5.4	Moore’s Law in Quasar Astronomy	566
9.5.5	Quasars, the Foundations of Cosmology and Fundamental Physics	567
	References	567

Fifty Years of Quasars

From Early Observations and Ideas to Future Research

D'Onofrio, M.; Marziani, P.; Sulentic, J.W. (Eds.)

2012, XXXII, 584 p., Hardcover

ISBN: 978-3-642-27563-0
