

Contents

1	Introduction	1
1.1	The Dönje Power Plant Scenario	3
1.2	Structure of the Book	6
2	Origins of CBA of Water Use Conflicts	7
2.1	The United States	8
2.2	Europe	14
2.2.1	The Water Framework Directive and CBA	15
2.2.2	A Salmon-Hydropower Conflict: Dynamic Model	16
3	A Simple Cost-Benefit Rule	19
3.1	The Basic Rule	19
3.2	Further Details	22
3.3	Some Further Observations	26
4	The Main Items in the Cost-Benefit Analysis	29
4.1	Calculation of the Loss of Hydroelectricity	29
4.2	Price Forecasts	30
4.2.1	Some Basic Facts	30
4.2.2	Two Price Trajectories	35
4.3	Choice of Discount Rate	38
4.4	Hydroelectricity Production Costs	40
4.5	WTP/WTa for Environmental and Recreational Effects	41
5	Towards Empirical Measurement of Externalities	43
5.1	Use Values and Non-Use Values	43
5.2	Empirical Approaches for the Valuation of Environmental Benefits	45
5.3	The Impact of Changed Water Flow at the Hydropower Plant	50
5.4	Contingent Valuation Study of Improved Downstream River Basin	51
5.4.1	The Focus Group Study	51
5.4.2	The Pilot Study	53

5.4.3	Interval WTP Questions	54
5.4.4	Belyaev-Kriström Estimator for Self-Selected Intervals	58
5.4.5	Valuation Question	61
5.4.6	Estimating WTP	63
5.5	The Benefits of Smoother Downstream Flow	65
5.6	Externalities from Replacement Power	66
6	Blueprint for a CBA	69
6.1	Point Estimates	69
6.1.1	SCENARIO 1	69
6.1.2	SCENARIO 2	71
6.2	Sensitivity Analysis	72
6.2.1	Some Different Approaches to Sensitivity Analysis	72
6.2.2	Illustrations	74
6.2.3	Demand Changes	76
6.2.4	A Simple Krutilla-Fisher Robustness Check	78
6.2.5	A Stochastic Sensitivity Analysis	79
6.2.6	A Stochastic Sensitivity Analysis Based on Simulation Techniques	83
6.2.7	Risk Aversion	85
6.3	On the Choice of Discount Rate and the Possibility of a Local Deal	86
6.3.1	On the Marginal Cost of Capital	86
6.3.2	On the Possibility of a Deal Between Local Residents and the Hydropower Firm	88
7	Concluding Remarks	91
	Appendices	93
A	The Model	93
B	Calculating Present Values: Detailed Presentation	103
C	Spot Prices	109
D	The Survey Questions	111
E	Data	115
F	Programs	117
F.1	Reading the Data	117
F.2	Jammalamadaka Estimator	117
F.3	Estimating the Weibull Distribution	118

F.4	Programs for the Belyaev-Kriström Estimator	118
F.4.1	Helper Function intervme.R.....	119
F.4.2	Behavioral Model BM1..BM5	120
Bibliography		125
Index		133

The Economics of Evaluating Water Projects

Hydroelectricity Versus Other Uses

Johansson, P.-O.; Kriström, B.

2012, XIV, 138 p., Hardcover

ISBN: 978-3-642-27669-9
