<b>1</b>	<b>Existence for Parabolic–Elliptic Degenerate Diffusion Problems</b>	<b>1</b>
1.1	Well-Posedness for the Cauchy Problem	
	with Fast Diffusion	3
1.1.1	Hypotheses for the Parabolic–Elliptic Case	3
1.1.2	Functional Framework	5
1.1.3	Approximating Problem	11
1.1.4	Existence for the Approximating Problem	14
1.1.5	Convergence of the Approximating Problem	24
1.1.6	Construction of the Solution	36
1.1.7	Numerical Results	40
1.2	Well-Posedness for the Cauchy Problem	
	with Very Fast Diffusion	44
1.3	Existence of Periodic Solutions in the Parabolic–Elliptic Degenerate Case	47
1.3.1	Solution Existence on the Time Period $(0, T)$	48
1.3.2	Solution Existence on $\mathbb{R}_+$	53
1.3.3	Longtime Behavior of the Solution	
	to a Cauchy Problem with Periodic Data	54
1.3.4	Numerical Results	55
<b>2</b>	<b>Existence for Diffusion Degenerate Problems</b>	<b>57</b>
2.1	Well-Posedness for the Cauchy Problem	
	with Fast Diffusion	57
2.1.1	Functional Framework and Time Discretization Scheme	59
2.1.2	Stability of the Discretization Scheme	62
2.1.3	Convergence of the Discretization Scheme	68
2.1.4	Uniqueness	76
2.1.5	Error Estimate	77
2.1.6	Numerical Results	79

2.2	Existence of Periodic Solutions in the Diffusion	
	Degenerate Case .....	82
2.2.1	Asymptotic Behavior at Large Time .....	87
2.2.2	Numerical Results .....	90
<b>3</b>	<b>Existence for Nonautonomous Parabolic–Elliptic</b>	
	<b>Degenerate Diffusion Equations</b> .....	91
3.1	Statement of the Problem and Functional Framework .....	91
3.2	The Approximating Problem .....	94
3.3	Well-Posedness for the Nonautonomous Cauchy	
	Problem .....	98
3.3.1	Numerical Results .....	107
<b>4</b>	<b>Parameter Identification in a Parabolic–Elliptic</b>	
	<b>Degenerate Problem</b> .....	109
4.1	Statement of the Problem .....	109
4.2	The Approximating Control Problem .....	112
4.2.1	Existence in the Approximating State System .....	113
4.2.2	Existence of the Approximating Optimal	
	Control .....	114
4.3	The Approximating Optimality Condition .....	117
4.3.1	The First Order Variations System .....	117
4.3.2	The Dual System .....	120
4.3.3	The Necessary Optimality Condition .....	121
4.4	Convergence of the Approximating Control Problem .....	123
4.5	An Alternative Approach .....	126
4.5.1	The Approximating Problem ( $\tilde{P}_\varepsilon$ ) .....	128
4.5.2	Numerical Results .....	132
	<b>References</b> .....	135
	<b>List of Symbols</b> .....	141
	<b>Index</b> .....	143
