

Contents

1 Exordium	1
1.1 Electromagnetism and System of Units	2
1.2 Spin and Fundamental Magnetism	6
1.3 Magnetic Recording Materials and Devices	9
1.3.1 Thin Film Media	11
1.3.2 Write and Read Heads	13
References	18
2 Maxwell Equations and Landau–Lifshitz Equations	21
2.1 Maxwell Equations and Vector Analysis	22
2.1.1 Vector Analysis	23
2.1.2 Maxwell’s Equations	26
2.2 Green’s Function and Demagnetizing Matrix	29
2.3 Landau–Lifshitz Equations	34
2.3.1 Free Energy and Effective Field	35
2.3.2 LL Equation and LLG Equation	38
2.3.3 History of Micromagnetics	41
References	51
3 Microstructure and Hysteresis Loop	53
3.1 Program Structure for Micromagnetics	54
3.1.1 FFT and Periodic Boundary Condition	56
3.1.2 muMAG Standard Problems No. 2	58
3.1.3 Anisotropy Field’s Orientation and Magnitude Distribution	59
3.2 Perpendicular Recording Media	62
3.3 Soft Magnetic FeCo Thin Film	67
3.4 Tunneling Magnetoresistive Spin Valve	71
References	77

4 Domain Structure and Dynamic Process	79
4.1 Reliability and Stability of Domain Calculation	80
4.1.1 muMAG Standard Problems No. 3	87
4.1.2 muMAG Standard Problems No. 4	89
4.2 Static Domain and Reversal Property of Write Head	89
4.3 Domain and Field of Magnetic Force Microscope Tip	95
References	104
Index	107

Micromagnetics and Recording Materials

Wei, D.

2012, VIII, 110 p. 55 illus., 15 illus. in color., Softcover

ISBN: 978-3-642-28576-9
