

# Contents

<b>Introduction</b> .....	xiii
References .....	xxii
 <b>Part I    Surprise and Information of Descriptions</b>	
<b>1    Prerequisites from Logic and Probability Theory</b> .....	3
1.1    Logic and Probability of Propositions .....	3
1.2    Mappings, Functions and Random Variables .....	5
1.3    Measurability, Random Variables, and Expectation Value .....	7
1.4    Technical Comments .....	10
References .....	10
<b>2    Improbability and Novelty of Descriptions</b> .....	11
2.1    Introductory Examples .....	11
2.2    Definition and Properties .....	14
2.3    Descriptions .....	15
2.4    Properties of Descriptions .....	18
2.5    Information and Surprise of Descriptions .....	24
2.6    Information and Surprise of a Random Variable .....	30
2.7    Technical Comments .....	31
2.8    Exercises .....	32
References .....	34
<b>3    Conditional and Subjective Novelty and Information</b> .....	35
3.1    Introductory Examples .....	35
3.2    Subjective Novelty .....	36
3.3    Conditional Novelty .....	38
3.4    Information Theory for Random Variables .....	42
3.5    Technical Comments .....	44
3.6    Exercises .....	45
References .....	46

## Part II Coding and Information Transmission

<b>4</b>	<b>On Guessing and Coding</b>	51
4.1	Introductory Examples	51
4.2	Guessing Strategies	53
4.3	Codes and Their Relation to Guessing Strategies	54
4.4	Kraft's Theorem	56
4.5	Huffman Codes	57
4.6	Relation Between Codewordlength and Information	58
4.7	Technical Comments	60
4.8	Exercises	60
	References	62
<b>5</b>	<b>Information Transmission</b>	63
5.1	Introductory Examples	63
5.2	Transition Probability	65
5.3	Transmission of Information Across Simple Channels	67
5.4	Technical Comments	71
5.5	Exercises	72
	Reference	74

## Part III Information Rate and Channel Capacity

<b>6</b>	<b>Stationary Processes and Their Information Rate</b>	77
6.1	Introductory Examples	77
6.2	Definition and Properties of Stochastic Processes	78
6.3	The Weak Law of Large Numbers	80
6.4	Information Rate of Stationary Processes	81
6.5	Transinformation Rate	84
6.6	Asymptotic Equipartition Property	85
6.7	Technical Comments	87
6.8	Exercises	87
	References	88
<b>7</b>	<b>Channel Capacity</b>	89
7.1	Information Channels	89
7.2	Memory and Anticipation	90
7.3	Channel Capacity	91
7.4	Technical Comments	94
7.5	Exercises	94
	References	95
<b>8</b>	<b>How to Transmit Information Reliably with Unreliable Elements (Shannon's Theorem)</b>	97
8.1	The Problem of Adapting a Source to a Channel	97
8.2	Shannon's Theorem	98

8.3	Technical Comments .....	101
8.4	Exercises .....	101
	References .....	101

## Part IV Repertoires and Covers

<b>9</b>	<b>Repertoires and Descriptions</b> .....	105
9.1	Introductory Examples .....	106
9.2	Repertoires and Their Relation to Descriptions .....	109
9.3	Tight Repertoires .....	115
9.4	Narrow and Shallow Covers .....	117
9.5	Technical Comments .....	119
9.6	Exercises .....	120
	References .....	120
<b>10</b>	<b>Novelty, Information and Surprise of Repertoires</b> .....	123
10.1	Introductory Examples .....	123
10.2	Definitions and Properties .....	125
10.3	Finding Descriptions with Minimal Information .....	133
10.4	Technical Comments .....	138
10.5	Exercises .....	138
	References .....	139
<b>11</b>	<b>Conditioning, Mutual Information, and Information Gain</b> .....	141
11.1	Introductory Examples .....	141
11.2	Conditional Information and Mutual Information .....	142
11.3	Information Gain, Novelty Gain, and Surprise Loss .....	146
11.4	Conditional Information of Continuous Random Variables .....	152
11.5	Technical Comments .....	154
11.6	Applications in Pattern Recognition, Machine Learning, and Life-Science .....	155
11.7	Exercises .....	156
	References .....	157

## Part V Information, Novelty and Surprise in Science

<b>12</b>	<b>Information, Novelty, and Surprise in Brain Theory</b> .....	161
12.1	Understanding Brains in Terms of Processing and Transmission of Information .....	161
12.2	Neural Repertoires .....	166
12.3	Experimental Repertoires in Neuroscience .....	167
12.3.1	The Burst Repertoire .....	168
12.3.2	The Pause Repertoire .....	170
12.3.3	The Coincidence Repertoire .....	170
12.3.4	The Depolarization Repertoire .....	173
12.4	Neural Population Repertoires: Semantics and Syntax .....	173

12.5	Conclusion .....	175
12.6	Technical Comments .....	175
12.6.1	Coincidence .....	179
12.6.2	Coincidental Patterns .....	179
12.6.3	Spatio-Temporal Patterns .....	179
	References .....	181
<b>13</b>	<b>Surprise from Repetitions and Combination of Surprises .....</b>	<b>189</b>
13.1	Combination of Surprises .....	189
13.2	Surprise of Repetitions .....	191
13.3	Technical Comments .....	194
	References .....	194
<b>14</b>	<b>Entropy in Physics .....</b>	<b>195</b>
14.1	Classical Entropy .....	195
14.2	Modern Entropies and the Second Law .....	198
14.3	The Second Law in Terms of Information Gain .....	201
14.4	Technical Comments .....	204
	References .....	204
 <b>Part VI Generalized Information Theory</b>		
<b>15</b>	<b>Order- and Lattice-Structures .....</b>	<b>207</b>
15.1	Definitions and Properties .....	207
15.2	The Lattice $\mathfrak{D}$ of Descriptions .....	213
15.3	Technical Comments .....	214
	Reference .....	215
<b>16</b>	<b>Three Orderings on Repertoires .....</b>	<b>217</b>
16.1	Definition and Basic Properties .....	217
16.2	Equivalence Relations Defined by the Orderings .....	220
16.3	The Joins and Meets for the Orderings .....	222
16.4	The Orderings on Templates and Flat Covers .....	226
16.5	Technical Comments .....	227
16.6	Exercises .....	228
	References .....	228
<b>17</b>	<b>Information Theory on Lattices of Covers .....</b>	<b>229</b>
17.1	The Lattice $\mathfrak{C}$ of Covers .....	229
17.2	The Lattice $\mathfrak{F}_f$ of Finite Flat Covers .....	231
17.3	The Lattice $\mathfrak{R}$ of (Clean) Repertoires .....	232
17.4	The Lattice $\mathfrak{T}$ of Templates .....	233
17.5	The Lattice $\mathfrak{P}$ of Partitions .....	234
17.6	Technical Comments .....	235
17.7	Exercises .....	235
	References .....	235

**Appendices**

**A Fuzzy Repertoires and Descriptions** ..... 237

    A.1 Basic Definitions ..... 238

    A.2 Definition and Properties of Fuzzy Repertoires..... 240

    Reference ..... 242

**Glossary** ..... 243

**Index** ..... 245
