

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	The Growth of Linear Fluctuations	2
1.2	The Accelerating Expansion of the Universe.	4
1.3	Cosmological Models.	8
1.4	Testing the Concordance Cosmological Model	12
1.5	Current and Future Observational Probes	13
1.6	Outline of Thesis.	15
	References	16
<b>2</b>	<b>The Growth of Matter Perturbations in the Universe</b>	19
2.1	Numerical Methods	19
2.1.1	The Simulation Code.	19
2.1.2	Modifying Gadget-2	21
2.1.3	The Initial Conditions	22
	References	25
<b>3</b>	<b>Simulations of Quintessential Cold Dark Matter</b>	27
3.1	Introduction	27
3.2	Quintessence Models of Dark Energy	28
3.2.1	Parametrization of $w$	30
3.2.2	The Expected Impact of Dark Energy on Structure Formation	33
3.2.3	Simulation Details.	37
3.3	Results	38
3.3.1	Stage I: Changing the Expansion Rate of the Universe	38
3.3.2	Stage II: Use of a Self-Consistent Linear Theory $P(k)$	43

3.3.3	Stage III: Consistency with Observational Data . . . . .	45
3.3.4	Mass Function of Dark Matter Haloes . . . . .	46
3.3.5	The Appearance of Baryonic Acoustic Oscillations in Quintessence Models . . . . .	50
3.4	Summary . . . . .	55
	References . . . . .	58
<b>4</b>	<b>Modelling Redshift Space Distortions in Hierarchical Cosmologies . . . . .</b>	<b>61</b>
4.1	Introduction . . . . .	61
4.2	Redshift Space Distortions . . . . .	62
4.2.1	Linear Growth Rate as a Probe of Gravity . . . . .	63
4.2.2	Linear Redshift Space Distortions . . . . .	64
4.2.3	Modelling Non-Linear Distortions to the Power Spectrum in Redshift Space . . . . .	66
4.3	Results I: The Matter Power Spectrum in Real and Redshift Space . . . . .	68
4.3.1	Testing the Linear Theory Redshift Space Distortion. . . . .	68
4.3.2	Nonlinear Models of $P_s(k, \mu)$ . . . . .	69
4.4	Results II: The Density Velocity Relation. . . . .	74
4.4.1	Dependence on Cosmological Model. . . . .	74
4.4.2	Approximate Formulae for $P_{\delta\theta}$ and $P_{\theta\theta}$ for Arbitrary Redshift. . . . .	75
4.5	Summary . . . . .	79
	References . . . . .	81
<b>5</b>	<b>Testing Gravity Using the Growth of Large Scale Structure in the Universe . . . . .</b>	<b>83</b>
5.1	Introduction . . . . .	83
5.2	Testing Modifications to General Relativity . . . . .	84
5.2.1	The Linear Growth Rate . . . . .	84
5.2.2	Time Variation of Newton's Constant . . . . .	85
5.3	Results . . . . .	88
5.3.1	Simulation Details. . . . .	88
5.3.2	Redshift Space Distortions . . . . .	89
5.3.3	Measuring the Growth Rate . . . . .	91
5.4	Summary . . . . .	94
	References . . . . .	95
<b>6</b>	<b>Conclusions . . . . .</b>	<b>97</b>
	References . . . . .	100

<b>Appendix A: WMAP Distance Priors. . . . .</b>	<b>101</b>
<b>Appendix B: Approximate Formula for <math>P_{\delta\theta}</math> and <math>P_{\theta\theta}</math> for Arbitrary Redshift . . . . .</b>	<b>107</b>
