

Contents

1	Introduction to the Renormalization Group with Applications to Non-relativistic Quantum Electron Gases	1
	Vincent Rivasseau	
1.1	Introduction to QFT and Renormalization	1
1.1.1	Gaussian Measures	1
1.1.2	Functional Integrals	2
1.1.3	Statistical Mechanics and Thermodynamic Quantities	3
1.1.4	Schwinger Functions	5
1.1.5	Feynman Graphs	7
1.1.6	Feynman Rules	9
1.1.7	Scale Analysis and Renormalization	12
1.1.8	Locality, Power Counting	14
1.1.9	Renormalization, Effective Constants	15
1.1.10	The BPHZ Theorem	16
1.1.11	The Landau Ghost and Asymptotic Freedom	18
1.1.12	Grassmann Representations of Determinants and Pfaffians	20
1.1.13	Trees, Forests and the Parametric Representation	23
1.1.14	BKAR Forest Formula	26
1.1.15	Gram and Hadamard Bounds	28
1.1.16	Single Scale Constructive Theory for a Toy Model	29
1.2	Interacting Fermions in Two Dimensions	33
1.2.1	Introduction	33
1.2.2	The Models: J_2 , J_3 , H_2 ...	34
1.2.3	Interaction, Locality	35
1.2.4	A Brief Review of Rigorous Results	37
1.2.5	Multiscale Analysis, Angular Sectors	38
1.2.6	Renormalization	39
1.2.7	2D Jellium Model: Why Sectors Work	40

1.2.8	3D Jellium Model: Why Sectors Fail	42
1.2.9	The Hadamard Method in x -Space	42
1.2.10	2D Hubbard Model	44
1.2.11	Scale Analysis	45
1.2.12	Sectors	47
1.2.13	Support Properties	49
1.2.14	Momentum Conservation Rules at a Vertex	49
1.2.15	Multiscale Analysis	51
	References	52
2	Cold Quantum Gases and Bose–Einstein Condensation	55
	Robert Seiringer	
2.1	Introduction	55
2.2	Quantum Many-Body Systems	56
2.2.1	The Hamiltonian	56
2.2.2	Quantities of Interest	56
2.2.3	Creation and Annihilation Operators on Fock Space	58
2.2.4	Ideal Quantum Gases	59
2.3	BEC for Interacting Systems	64
2.3.1	The Criterion for BEC	64
2.3.2	The Hard-Core Lattice Gas	65
2.4	Dilute Bose Gases	67
2.4.1	The Model	67
2.4.2	The Two-Particle Case	69
2.4.3	The Ground State Energy of a Dilute Gas	70
2.4.4	Further Rigorous Results	73
2.4.5	The Next Order Term	75
2.5	Dilute Bose Gases in Traps	76
2.5.1	The Gross–Pitaevskii Energy Functional	76
2.5.2	BEC of Dilute Trapped Gases	78
2.5.3	Rotating Bose Gases	79
2.5.4	Main Ideas in the Proof	81
2.5.5	Coherent States	84
2.5.6	Rapidly Rotating Bose Gases	87
	References	91
3	Quantum Coulomb Gases	93
	Jan Philip Solovej	
3.1	Introduction	93
3.2	Classical “Point” Charges	94
3.3	Charged Quantum Gases	97
3.3.1	Quantized Particles and Classical Fields	98
3.3.2	Statistics of Identical Particles	100
3.3.3	Grand Canonical Picture	101
3.3.4	Second Quantization and Quantization of Fields	102
3.3.5	Quantization of the Electromagnetic Field	104

3.3.6	Non-relativistic QED	105
3.3.7	Relativistic QED Hamiltonian.....	106
3.4	Stability	107
3.4.1	Stability of the First Kind for Non-relativistic Particles ...	108
3.4.2	Grand Canonical Stability	109
3.4.3	Existence of the Thermodynamic Limit	114
3.5	Instability	115
3.5.1	Examples of Instability of the First Kind	115
3.5.2	Fermionic Instability of the Second Kind.....	117
3.5.3	Instability of Bosonic Matter	118
	References	123
4	SUSY Statistical Mechanics and Random Band Matrices	125
	Thomas Spencer	
4.1	An Overview	125
4.1.1	Green's Functions	127
4.1.2	Symmetry and the 1D SUSY Sigma Model	128
4.1.3	SUSY Sigma Models in 3D	130
4.2	Classical Models of Quantum Dynamics	131
4.2.1	Manhattan Model	132
4.3	Introduction Random Matrix Ensembles and SUSY.....	133
4.3.1	Some Conjectures About RBM and Random Schrödinger.....	134
4.3.2	Conjectured Universality of GUE and GOE Models.....	135
4.3.3	Green's Functions and Gaussian Integrals	136
4.4	Averaging $\text{Det}(E_\epsilon - H)^{-1}$	137
4.4.1	Gaussian Band Matrices and Statistical Mechanics	139
4.5	The Density of States for GUE and RBM	141
4.5.1	Density of States for RBM	144
4.6	Statistical Mechanics, Sigma Models, and Goldstone Modes	145
4.7	Hyperbolic Symmetry	149
4.7.1	Random Band Case	152
4.8	Phase Transition for a SUSY Hyperbolic Sigma Model	155
4.8.1	Role of Ward Identities in the Proof	159
4.9	Efetov's Sigma Model	161
4.10	Appendix A: Gaussian and Grassmann Integration	163
4.10.1	Grassmann Integration	164
4.10.2	Polar Coordinates for Grassmann and Bosonic Matrices	166
4.11	Appendix B: Formal Perturbation Theory	168
4.11.1	Leading Contribution to Diffusion	171
4.11.2	Perturbation Theory for Random Band Matrices	171
4.12	Appendix C: Bounds on Green's Functions of Divergence Form ...	173
	References	175
	List of Participants	179

Quantum Many Body Systems

Cetraro, Italy 2010, Editors: Alessandro Giuliani, Vieri

Mastropietro, Jakob Yngvason

Rivasseau, V.; Seiringer, R.; Solovej, J.P.; Spencer, Th. -

Giuliani, A.; Mastropietro, V.; Yngvason, J. (Eds.)

2012, XIII, 180 p. 11 illus., 1 illus. in color., Softcover

ISBN: 978-3-642-29510-2
