1	Introduction	1
2	Particle Physics and the Neutrino	3
2.1	Introduction to Particle Physics	3
2.1.1	Quarks	3
2.1.2	Leptons	3
2.1.3	Bosons	4
2.2	The Neutrino	4
2.2.1	Neutrino Oscillations	5
2.2.2	Measurement of Mixing Parameters	7
2.2.3	Neutrino Mass	7
	References	8
3	Ultra-High Energy Astro-Particle Physics	11
3.1	Cosmic-Rays	12
3.1.1	Acceleration Mechanism	13
3.1.2	UHECR Acceleration	14
3.1.3	Detection Methods	16
3.1.4	Cosmic-Ray-Induced Radio Emission	17
3.1.5	The GZK Effect	17
3.2	UHE Neutrinos	19
3.2.1	BZ Neutrinos	19
3.2.2	The Waxman-Bahcall Limit	21
3.2.3	Particle Physics with UHE Neutrinos	21
3.2.4	Detection of UHE Neutrinos	22
3.2.5	Radio Detection of UHE Neutrinos	23
	References	26

4	The Antarctic Impulsive Transient Antenna	29
4.1	Results from ANITA-1	29
4.2	Experiment Overview	31
4.2.1	Expected Signals	31
4.2.2	Design Obstacles	33
4.2.3	Gondola Design and Power Systems	34
4.2.4	CSBF Support	34
4.2.5	Position and Orientation Information	35
4.3	Radio Frequency Signal Chain	36
4.3.1	Front End Antennas	36
4.3.2	Analogue Processing	39
4.3.3	Data Acquisition	40
4.4	Triggering	43
4.4.1	Level 1	43
4.4.2	Level 2	44
4.4.3	Level 3	45
4.4.4	Trigger Masking	46
4.4.5	Trigger Testing	47
4.5	Flight Software and Data Storage	49
4.6	ANITA-2 Flight	50
4.6.1	Ground Calibration Pulses	51
4.6.2	Performance	51
	References	52
5	Event Simulation	55
5.1	Approach to Instrument Response Simulation	56
5.1.1	Signal Path	56
5.1.2	Thermal Noise Generation	56
5.1.3	Trigger Path	58
5.1.4	Threshold Setting	59
5.2	Simulated Hardware Efficiency	60
5.2.1	Implications for Exposure	62
5.3	Summary	64
	References	64
6	ANITA-2 Data Analysis	65
6.1	Analysis Approach	65
6.1.1	Blinding	66
6.1.2	ANITA Data and Calibration	66
6.2	Data Samples	66
6.2.1	Noise Training Sample	67
6.2.2	Signal Training Sample	67
6.2.3	Analysis Sample	68

6.3	Analysis Tools	70
6.3.1	Event Filtering	71
6.3.2	Interferometric Imaging	73
6.3.3	Coherently-Summed Waveform	74
6.4	Thermal Cuts	77
6.4.1	Thermal Cut Results	86
6.5	Anthropogenic Cuts	88
6.5.1	Pointing Resolution	89
6.5.2	Base and Flight Lists	89
6.5.3	Clustering Algorithm	90
6.5.4	Clustering Results	93
6.6	Efficiency and Background	94
6.6.1	Analysis Efficiency	95
6.6.2	Background Calculation	96
6.7	Events Passing Thermal and Anthropogenic Cuts	98
6.7.1	Inserted Taylor Dome Events	98
6.7.2	Isolated Signals	99
6.8	Impulsive Signal Cut	99
6.8.1	Effect of Cut	101
6.9	Discussion	102
	References	105
7	Cosmic-Ray Search	107
7.1	UHECR Search	107
7.1.1	Identification as UHECR	108
7.1.2	Antenna Response	111
7.1.3	Isolated Event Results	112
7.1.4	Non-Isolated Events	112
7.2	Discussion	117
7.2.1	Frequency Dependence	118
7.2.2	Event Energies and Directions	119
7.2.3	Outlook for ANITA-3	120
	References	121
8	Neutrino Search	123
8.1	Results of the Main Analysis	123
8.1.1	Neutrino Candidates	123
8.1.2	Diffuse UHE Neutrino Flux Limit	127
8.2	Point Source Limits	130
8.2.1	Reflected Neutrino Search	131
8.2.2	Neutrino Event Limits	133
8.2.3	Selected Source Limits	135
8.3	Discussion	138
	References	139

9 Conclusions 141
