

Contents

1	Introduction	1
1.1	Background	1
1.1.1	Fuel Cell Technology	2
1.1.2	Electrocatalyst Development	4
1.2	Outline and Objectives	7
	References	7
2	Differential Electrochemical Mass Spectrometry	9
2.1	Principle of Operation	9
2.2	Instrument Design Solutions	11
2.2.1	Electrochemical Cells	11
2.2.2	Membrane Interfaces	17
2.2.3	Vacuum Systems & Mass Spectrometer	20
2.3	Research Applications	21
2.3.1	Radio-Isotope Labelled Experimentation	21
2.3.2	Characterisation of Organic Adsorbates	22
2.3.3	Study of the Electro-oxidation of Small Organic Compounds	23
2.4	Conclusions	23
	References	25
3	Design and Construction of the DEMS Instrument	29
3.1	Design and Development Process	29
3.2	DEMS Instrument Overview	30
3.2.1	Principle Components	32
3.2.2	Operating Hardware and Software	34
3.3	Electrochemical Half-Cell Setup	34
3.3.1	Dual Thin-Layer Flow Cell Design	36
3.4	Membrane Interface	40

3.5	Vacuum System Design	43
3.5.1	Three-Stage Differential Pumping	44
3.5.2	Tubular Aperture	47
3.6	Instrumentation, Control and Data Acquisition	50
3.6.1	DEMS Measurement Setup	51
3.6.2	QMS Calibration Setup	64
3.6.3	Labview Software Architecture	69
3.7	Data Analysis	75
3.8	Summary	78
	References	79
4	Practical Aspects of the DEMS Instrument	81
4.1	Electrochemical Cell	81
4.1.1	Potential Control	82
4.1.2	Effect of Electrolyte Flow Rate	86
4.2	Performance of the Membrane Interface Material	94
4.3	Optimisation of the QMS	98
4.3.1	Ion Source Parameters	98
4.3.2	Quadrupole and SEM Parameters	100
4.4	Calibration of the DEMS Instrument	102
4.5	Calibration of the QMS	104
4.6	Further Considerations	108
4.6.1	Measurement Error	108
4.6.2	Maintenance	109
4.7	Summary	110
	References	112
5	Methanol Oxidation on HSAC Supported Pt and PtRu Catalysts	113
5.1	Introduction	113
5.1.1	Background	114
5.1.2	Motivation	117
5.2	Experimental	117
5.2.1	Measurement Procedure	118
5.3	Results and Discussion	119
5.3.1	Electrochemical Surface Area Determination	119
5.3.2	Cyclic Voltammetry	124
5.3.3	Chronoamperometry	129
5.3.4	Three-Dimensional Voltammetry	134
5.3.5	Tafel Slope	138
5.3.6	Activity	141
5.3.7	Potential Dependent Conversion	143
5.4	Conclusions	147
	References	149

6	The Electrochemical Oxidation of HSAC Catalyst Supports	153
6.1	Introduction	153
6.1.1	Motivation	156
6.1.2	Background	156
6.2	Experimental.	158
6.2.1	Electrochemical Oxidation Procedure	159
6.3	Results and Discussion.	160
6.3.1	Determination of the Apparent Double-Layer Capacitance	160
6.3.2	Substrate Background Contributions	164
6.3.3	Electrochemical Oxidation of HSAC Supports	166
6.3.4	Electrochemical Oxidation of HSAC Supported Pt Catalysts	190
6.3.5	Future Applications of DEMS in the Study of the COR	195
6.4	Conclusions	199
	References	200
7	Summary.	205
	Appendix A.	209
	Appendix B.	215
	Index	219

Design, Construction and Research Application of a
Differential Electrochemical Mass Spectrometer (DEMS)

Ashton, S.J.

2012, XX, 224 p., Hardcover

ISBN: 978-3-642-30549-8
