
Contents

1	China as a Place to Innovate	1
1.1	China Is the Number One Place for New R&D Labs	1
1.1.1	Motivations for Establishing R&D Labs in China	2
1.1.2	Barriers for Managing R&D in China	8
1.2	Siemens' SMART Principle and Reverse Innovation	12
1.2.1	How to Enable Reverse Innovation?	14
2	Protection of Intellectual Property in China	17
2.1	Enforcement of IP-Rights in China	23
2.2	Appropriability Regimes and Their Mechanisms	24
2.3	Patents as an Indicator of R&D Capabilities	28
3	Dimensions of IP Protection in China	31
3.1	Legal IP-related Illicit and Licit Threats	31
3.2	Legal-Licit Related Threats	36
3.3	Patents and Trademarks Are Not Enough	38
4	The IP Protection Star	43
4.1	Legal-driven Protection	43
4.1.1	Legal-Proprietary Protection	43
4.1.2	Protection by Legal Enforcement	48
4.1.3	Legal-Contractual Protection Means	59
4.1.4	Summary Legally-driven Protection	61
4.2	Market-driven Protection	62
4.2.1	Market-Monitoring of IP-related Know-How	62
4.2.2	Market-Relational Efforts to Enhance IP Awareness	63
4.2.3	Market-Educational Efforts	64
4.2.4	Summary Market-driven Protection	65
4.3	Human-driven Protection	67
4.3.1	Human-Controlling Protection Means	67
4.3.2	Human-Motivational	69
4.3.3	Protection by Human-Educational Means	73
4.3.4	Summary Human-driven Protection	74
4.4	Technology-driven Protection	76
4.4.1	Application of Protective Technologies	77

4.4.2	Technology-Intrinsic Protection Means	79
4.4.3	Managing Technology and Technological Know-How Distribution	80
4.4.4	Summary Technology-driven Protection	80
4.5	Business-related Protection.	81
4.5.1	Protection by Differentiation	82
4.5.2	Protection by Operational Control	84
4.5.3	Protection by Prevention: The Avoidance Tactic	85
4.5.4	Summary Business-related Protection	87
5	Integrated Management of Piracy Intelligence.	89
5.1	Evaluation of Key Technologies and Know-How	90
5.2	Composition of Preventive Protection	92
5.3	Piracy Intelligence and IP Monitoring	94
5.4	Evaluation of Infringements and IP Threats	95
5.5	Application of Factual and Legal Protection Means.	97
5.6	Institutionalizing IP Protection	98
5.7	The Integrated Management Model for Piracy Intelligence	101
6	Using the IP Protection Star Effectively	103
6.1	Determine What Needs to be Protected	104
6.2	Be Creative in IPR Applications.	104
6.3	Protect IP Beyond IPR Protection.	106
6.4	Assimilate Cultural Differences	106
6.5	Create Awareness, Retain Key Employees and Exploit Advantages as a Foreign Firm	106
6.6	Establish Early Warning Signals by Means of Piracy Intelligence and IP Monitoring	107
6.7	Generate IP for Differentiation and Exploit Differentiation for Protection	107
6.8	Outperform Imitation by Process Excellence and Operational Control	108
6.9	Exploit IP Threats and Learn from Imitation	108
6.10	Define Protection Tasks and Roles	108
6.11	Establish Task Ownerships to Create Change.	108
6.12	Reduce Risk and Safeguard Business Opportunities by Avoidance or Tolerance	109
7	Outlook	111
