

Contents

1	Memories of the PS and of LEP	3
	J. Steinberger	
2	The CERN Proton Synchrotron: 50 Years of Reliable Operation and Continued Development.	29
	Günther Plass	
3	A Few Memories from the Days at LEP	49
	Emilio Picasso	
4	LEP Operation.	63
	Steve Myers	
5	Proton-Antiproton Colliders	79
	Carlo Rubbia	
6	Electron Colliders at CERN	101
	Burton Richter	
7	The LHC Adventure.	109
	Lyn Evans	
8	The Future of the CERN Accelerator Complex	119
	Rolf-Dieter Heuer	
9	Memories of the Events That Led to the Discovery of the ν_μ	129
	Leon Lederman	
10	The Discovery of CP Violation	137
	J. W. Cronin	

11	Unification: Then and Now	161
	Sheldon Glashow	
12	Peering Inside the Proton	169
	J. I. Friedman	
13	QCD: An Unfinished Symphony	189
	F. Wilczek	
14	The LHC and the Higgs Boson	199
	Martinus Veltman	
15	The Unique Beauty of the Subatomic Landscape	209
	Gerardus 't Hooft	
16	QCD: Now and Then	219
	David Gross	
17	Test of the Standard Model in Space: The AMS Experiment on the International Space Station	227
	Samuel Ting	
18	Changing Views of Symmetry	233
	Steven Weinberg	

From the PS to the LHC - 50 Years of Nobel Memories in
High-Energy Physics

Alvarez-Gaumé, L.; Mangano, M.; Tsesmelis, E. (Eds.)

2012, VIII, 241 p., Hardcover

ISBN: 978-3-642-30843-7
