

Contents

1	Introduction	1
1.1	Introduction to Carbon Dioxide	1
1.2	Supercritical CO ₂ /Poly(Ethylene Glycol) in Biphasic Catalysis	2
	References	3
2	Phase Behavior of PEG/CO₂ System	7
2.1	Phase Behavior of Different PEG/CO ₂ System	8
2.2	Phase Behavior of PEG/CO ₂ /Organic Solvent	11
	References	14
3	PEG/scCO₂ Biphasic Solvent System	17
3.1	PEG as a Green Replacement for Organic Solvents	17
3.2	PEG as Phase-Transfer Catalyst	23
3.3	PEG as Surfactant	25
3.4	PEG as Support	27
3.5	PEG as Radical Initiator: PEG Radical Chemistry in Dense CO ₂	33
	References	36
4	CO₂ Capture with PEG	41
4.1	Physical Solubility of CO ₂ in PEGs	42
4.2	PEG-Modified Solid Absorbents	43
4.3	PEG-Functionalized Gas-Separation Membranes	44
4.4	PEG-Functionalized Liquid Absorbents	45
	References	50
5	Functionalized-PEG as Catalysts for CO₂ Conversion	55
5.1	Synthesis of Cyclic Carbonates from CO ₂ and Epoxides	56
5.2	Synthesis of Dimethylcarbonate from CO ₂ , Epoxides and Methanol	60

5.3	Synthesis of Cyclic Carbonates from CO ₂ and Halohydrin	62
5.4	Synthesis of Oxazolidinones from CO ₂ and Aziridines.	64
5.5	Synthesis of Carbamates from Amines, CO ₂ and Alkyl Halides	65
5.6	Synthesis of Urea Derivatives from CO ₂ and Amines	66
	References	68
6	CO₂ Capture, Activation, and Subsequent	
	Conversion with PEG.	71
	References	75
	Author Biography	77

Capture and Utilization of Carbon Dioxide with
Polyethylene Glycol

Yang, Z.-Z.; Song, Q.-W.; He, L.

2012, XIV, 78 p. 52 illus., Softcover

ISBN: 978-3-642-31267-0
