# Contents

**1 Introduction** . . . . . 1
1.1 Edible Oils . . . . . 1
1.1.1 Introduction . . . . . 1
1.1.2 Constituents of Edible Oils . . . . . 1
1.1.3 Methods of Analysis of Main Edible Oil Constituents . . . . . 5
1.1.4 Detection of Adulteration . . . . . 7
1.2 Olive Oil . . . . . 8
1.2.1 Legal Classification of Olive Oil . . . . . 8
1.2.2 Sensory Assessment of Virgin Olive Oils . . . . . 10
1.2.3 Genetic Varieties . . . . . 12
1.2.4 Geographical Origin . . . . . 14
1.2.5 Oxidation Compounds from Olive Oil . . . . . 14
1.3 Analytical Techniques . . . . . 17
1.3.1 CEC . . . . . 17
1.3.2 LC . . . . . 20
1.3.3 Chromatographic Parameters . . . . . 21
1.3.4 IR Spectroscopy . . . . . 23
1.3.5 MS . . . . . 26
1.3.6 Electronic Olfactometry . . . . . 30
1.3.7 Data Statistical Treatment . . . . . 33
References . . . . . 38

**2 Objectives and Work Plan** . . . . . 45

**3 Materials and Methods** . . . . . 47
3.1 Reagents and Materials . . . . . 47
3.1.1 Standards . . . . . 47
3.1.2 Solvents . . . . . 47
3.1.3 Monomers, Crosslinkers and Initiators . . . . . 48
3.1.4 Other Reagents . . . . . 48

3.2 Samples . . . 48
3.3 Sample Preparation . . . 49
3.3.1 Ts . . . 49
3.3.2 Sterols and Alcohols . . . 49
3.3.3 Amino Acids . . . 50
3.3.4 Oil Treatment for Direct Infusion MS . . . 51
3.3.5 Phenolic Compounds . . . 51
3.3.6 Elimination of EVOO Phenolic Compounds . . . 52
3.3.7 Fatty Acids . . . 52
3.3.8 OFAs . . . 52
3.3.9 Other Analytical Parameters . . . 53
3.4 Column Treatment . . . 53
3.4.1 Column Conditioning . . . 53
3.4.2 Monolithic Column Preparation . . . 54
3.5 Instrumentation and Working Conditions . . . 54
3.5.1 CEC . . . 54
3.5.2 Nano-LC . . . 55
3.5.3 UPLC-MS . . . 55
3.5.4 FTIR Spectroscopy . . . 56
3.5.5 Direct Infusion MS . . . 57
3.5.6 GC . . . 58
3.5.7 HPLC–UV–Vis and HPLC–MS . . . 58
3.5.8 Electronic Nose . . . 60
3.5.9 OSI . . . 62
3.6 Sensory Analysis . . . 63
3.7 Treatment of Variables for Statistical Analysis . . . 63
References . . . 64

**4 Development of Methods for the Determination of Ts, $T_3$s and Sterols in Vegetable Oils** . . . 67
4.1 Determination of Ts by CEC Using Methacrylate Monolithic Columns . . . 67
4.1.1 Influence of Pore Size . . . 67
4.1.2 Influence of Mobile Phase Composition . . . 69
4.1.3 Quantitation Studies and Application to Real Samples . . . 70
4.2 Determination of Ts and $T_3$s by Nano-LC Using a Silica Monolithic Column . . . 74
4.2.1 Optimization of the Separation Conditions . . . 74
4.2.2 Quantitation Studies and Application to Real Samples . . . 76
4.3 Methacrylate Monolithic Columns for Nano-LC Determination of Ts and $T_3$s . . . 77
4.3.1 Influence of Mobile Phase Composition . . . 79

4.3.2 Quantitation Studies and Application to Real Samples . . . 80
4.4 Determination of Sterols by CEC Using Methacrylate Monolithic Columns . . . 83
4.4.1 Optimization of the Separation Conditions . . . 83
4.4.2 Quantitation Studies and Application to Real Samples . . . 89
4.5 Determination of Sterols by UPLC-MS . . . 91
4.5.1 Optimization of the Separation Conditions . . . 92
4.5.2 Quantitation Studies and Application to Real Samples . . . 94
References . . . 101

**5 Development of Methods for the Classification of Vegetable Oils According to Their Botanical Origin** . . . 105
5.1 Classification Using FTIR Spectroscopy Data . . . 105
5.1.1 Data Treatment and Construction of Data Matrices . . . 105
5.1.2 Construction of LDA Models . . . 107
5.1.3 Use of MLR to Determine EVOO Adulteration . . . 109
5.2 Classification Using Sterol Profiles Established by Direct Infusion MS . . . 111
5.2.1 Selection and Normalization of the Variables . . . 112
5.2.2 Construction of Data Matrices and LDA Models . . . 113
5.3 Classification Using Alcoholic Fraction Profiles Established by HPLC-MS . . . 117
5.3.1 Optimization of the Esterification Procedure . . . 117
5.3.2 Optimization of the Separation Conditions . . . 119
5.3.3 Construction of Data Matrices and LDA Models . . . 120
5.4 Classification Using Amino Acid Profiles Established by Direct Infusion MS . . . 124
5.4.1 MS Amino Acid Profiles . . . 124
5.4.2 Construction of Data Matrices and LDA Models . . . 124
5.5 Classification Using Amino Acid Profiles Established by HPLC-UV-Vis . . . 130
5.5.1 HPLC-UV-Vis Amino Acid Profiles . . . 131
5.5.2 Construction of Data Matrices and LDA Models . . . 132
References . . . 135

**6 Development of Methods for Olive Oil Quality Evaluation** . . . 137
6.1 Classification of Olive Oils According to Their Quality Grade Using Fatty Acid Profiles Obtained by Direct Infusion MS . . . 137
6.1.1 Ms Fatty Acid Profiles . . . 137
6.1.2 Construction of Data Matrices and LDA Models . . . 139
6.1.3 Evaluation of Binary Mixtures of Olive Oils of Different Quality Grade . . . 140

6.2 Electronic Nose Applied to Defect Detection and Quantitation in Olive Oils and Comparison with Sensory Panel Data . . . . . 142
6.2.1 Establishment of the Sensory Threshold by Trained Panelists . . . . . 142
6.2.2 Classification of Oils Containing VOO Defects According to Their Sensory Threshold as Established by a Sensory Panel . . . . . 146
6.2.3 Prediction of Defect Percentage in Sunflower Oil by Electronic Nose Followed by MLR Data Analysis . . . . 148
References . . . . . 150

**7 Development of Methods for the Classification of EVOOs According to Their Genetic Variety** . . . . . 151
7.1 Classification Using FTIR Spectroscopy Data . . . . . 151
7.1.1 Data Treatment and Construction of Data Matrices . . . 151
7.1.2 Construction of LDA Models. . . . . 153
7.2 Classification Using Fatty Acid and Phenolic Compound Profiles Established by Direct Infusion MS . . . . . 156
7.2.1 Construction of Data Matrices and LDA Models . . . . . 157
7.3 Classification Using Sterol Profiles Establishedby HPLC–MS . 161
7.3.1 Optimization of the Separation Conditions . . . . . 162
7.3.2 Construction of Data Matrices and LDA Models . . . . . 163
7.4 Classification Using Sterol Profiles Established by UPLC-MS . 166
7.4.1 Construction of Data Matrices and LDA Models . . . . . 168
7.4.2 Determination of Sterols in Real Samples . . . . . 173
References . . . . . 173

**8 Development of Methods for the Classification of EVOOs According to Their Geographical Origin** . . . . . 175
8.1 Classification Using Phenolic Compound Profiles Obtained by CEC . . . . . 175
8.1.1 Construction of the Monolithic Columns and Optimization of the Separation Conditions . . . . . 175
8.1.2 Characterization of the Phenolic Compound Profiles . . 177
8.1.3 Construction of Data Matrices and LDA Models . . . . . 179
References . . . . . 181

**9 Development of Methods for the Evaluation of Olive Oil Oxidation** . . . . . 183
9.1 Study of Chemical Changes Produced in VOOs with Different Phenolic Content During an Accelerated Ageing Treatment. . . . . 183
9.1.1 Evaluation of the Phenolic Content . . . . . 184
9.1.2 Phenolic Compound Transformation in EV1 Samples

During the Accelerated Ageing Treatment. . . . . 187
9.2 Evaluation of the Oxidative Status of VOOs with Different Phenolic Content by Direct Infusion MS . . . . . 192
9.2.1 MS Analysis and Selection of the Variables . . . . . 193
9.2.2 Construction of Data Matrices and LDA Models . . . . . 194
9.3 MOS Sensors for Monitoring of Oxidative Status Evolution and Sensory Analysis of VOOs with Different Phenolic Contents . . . . . 198
9.3.1 Construction of Data Matrices and LDA Models . . . . . 199
9.3.2 Sensory Analysis and Evaluation of the Constructed LDA Model . . . . . 200
9.4 Prediction of OFA Concentration in VOOs Using MOS Sensors and MLR . . . . . 203
9.4.1 OFA Content . . . . . 203
9.4.2 Construction of Data Matrices and MLR Models . . . . . 205
9.5 Prediction of OFA Concentration in VOOs Using FTIR and MLR . . . . . 208
9.5.1 Description of FTIR Spectra and Construction of Data Matrices and MLR Models . . . . . 208
References . . . . . 211

**10 General Conclusions** . . . . . 213
10.1 Development of Methods for the Determination of Ts and $T_3$s in Vegetable Oils . . . . . 213
10.2 Development of Methods for the Determination of Sterols in Vegetable Oils . . . . . 214
10.3 Development of Methods for the Classification of Vegetable Oils According to Their Botanical Origin . . . . . 215
10.4 Development of Methods for Olive Oil Quality Evaluation . . . 215
10.5 Development of Methods for the Classification of EVOOs According to Their Genetic Variety . . . . . 216
10.6 Development of Methods for the Classification of EVOOs According to Their Geographical Origin . . . . . 217
10.7 Development of Methods for the Evaluation of Olive Oil Oxidation . . . . . 217
