

# Contents

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Evolutionary Significance of Whole-Genome Duplication . . . . .</b>  | <b>1</b>   |
|          | C. L. McGrath and M. Lynch  |            |
| <b>2</b> | <b>Genetic Consequences of Polyploidy in Plants . . . . .</b>   | <b>21</b>  |
|          | James A. Birchler   |            |
| <b>3</b> | <b>Meiosis in Polyploid Plants . . . . .</b>  | <b>33</b>  |
|          | Marie-Luise Zielinski and Ortrun Mittelsten Scheid  |            |
| <b>4</b> | <b>Origins of Novel Phenotypic Variation in Polyploids . . . . .</b>  | <b>57</b>  |
|          | Patrick Finigan, Milos Tanurdzic and Robert A. Martienssen  |            |
| <b>5</b> | <b>Identifying the Phylogenetic Context of Whole-Genome<br/>Duplications in Plants. . . . .</b>   | <b>77</b>  |
|          | J. Gordon Burleigh  |            |
| <b>6</b> | <b>Ancient and Recent Polyploidy in Monocots . . . . .</b>  | <b>93</b>  |
|          | Andrew H. Paterson, Xiyin Wang, Jingping Li and Haibao Tang   |            |
| <b>7</b> | <b>Genomic Plasticity in Polyploid Wheat . . . . .</b>  | <b>109</b> |
|          | Moshe Feldman, Avraham Levy, Boulos Chalhoub<br>and Khalil Kashkush   |            |
| <b>8</b> | <b>Maize (<i>Zea Mays</i>) as a Model for Studying the Impact<br/>of Gene and Regulatory Sequence Loss Following<br/>Whole-Genome Duplication . . . . .</b> | <b>137</b> |
|          | James C. Schnable and Michael Freeling  |            |
| <b>9</b> | <b>Polyploidy in Legumes . . . . .</b>  | <b>147</b> |
|          | Jeff J. Doyle   |            |

|           |  |     |
|-----------|--|-----|
| <b>10</b> | <b>Jeans, Genes, and Genomes: Cotton as a Model for Studying Polyploidy</b> . . . . .  | 181 |
|           | Jonathan F. Wendel, Lex E. Flagel and Keith L. Adams   |     |
| <b>11</b> | <b>Evolutionary Implications of Genome and Karyotype Restructuring in <i>Nicotiana tabacum</i> L.</b> . . . . .  | 209 |
|           | Ales Kovarik, Simon Renny-Byfield, Marie-Angèle Grandbastien and Andrew Leitch   |     |
| <b>12</b> | <b>Polyploid Evolution in <i>Spartina</i>: Dealing with Highly Redundant Hybrid Genomes.</b> . . . . .   | 225 |
|           | M. Ainouche, H. Chelaifa, J. Ferreira, S. Bellot, A. Ainouche and A. Salmon  |     |
| <b>13</b> | <b>Allopolyploid Speciation in Action: The Origins and Evolution of <i>Senecio cambrensis</i></b> . . . . .  | 245 |
|           | Matthew J. Hegarty, Richard J. Abbott and Simon J. Hiscock   |     |
| <b>14</b> | <b>The Early Stages of Polyploidy: Rapid and Repeated Evolution in <i>Tragopogon</i>.</b> . . . . .  | 271 |
|           | Douglas E. Soltis, Richard J. A. Buggs, W. Brad Barbazuk, Srikar Chamala, Michael Chester, Joseph P. Gallagher, Patrick S. Schnable and Pamela S. Soltis |     |
| <b>15</b> | <b>Yeast as a Window into Changes in Genome Complexity Due to Polyploidization.</b> . . . . .  | 293 |
|           | Corey M. Hudson and Gavin C. Conant  |     |
| <b>16</b> | <b>Two Rounds of Whole-Genome Duplication: Evidence and Impact on the Evolution of Vertebrate Innovations.</b> . . . . .                                 | 309 |
|           | Cristian Cañestro  |     |
| <b>17</b> | <b>Polyploidy in Fish and the Teleost Genome Duplication.</b> . . . . .  | 341 |
|           | Ingo Braasch and John H. Postlethwait  |     |
| <b>18</b> | <b>Polyploidization and Sex Chromosome Evolution in Amphibians</b> . . . . .   | 385 |
|           | Ben J. Evans, R. Alexander Pyron and John J. Wiens   |     |
|           | <b>Index</b> . . . . .   | 411 |

Polyploidy and Genome Evolution

Soltis, P.; Soltis, D.E. (Eds.)

2012, VIII, 420 p., Hardcover

ISBN: 978-3-642-31441-4
