

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Problem Statement and Scope	1
1.2	Research Objective and Approach	3
<b>2</b>	<b>Energy Demand of Machine Tools and Performance Management</b>	<b>5</b>
2.1	Implications of Energy Usage in Industry	5
2.2	Energy Flows in Transformation Systems	8
2.2.1	Electrical Energy Demand of Machine Tools	10
2.2.2	Trends Affecting the Power Demand of Machine Tools	13
2.2.3	Improvement Measures for Electrical Energy Demand	15
2.2.4	Energy Efficiency Gap	18
2.2.5	Findings	21
2.3	Performance Management	22
2.3.1	Performance Measurement	22
2.3.2	Process of Performance Measurement	23
2.3.3	Integration of Performance Measurement into Management	28
2.3.4	Energy-Oriented Performance Management	31
2.3.5	Findings	36
<b>3</b>	<b>Review on the State of the Research in Improving Energy Performance of Machine Tools</b>	<b>37</b>
3.1	Review on Existing Approaches	37
3.1.1	Descriptive Approaches	38
3.1.2	Evaluative Approaches	42
3.1.3	Integrated Evaluation Approaches	43
3.1.4	Scheduling Approaches	45
3.1.5	Planning Approaches from Production System Level	46
3.1.6	Procedural Approaches	46
3.2	Comparative Overview about the State of Research	47
3.2.1	Criteria for the Comparison of Approaches	47
3.2.2	Comparative Overview	49
3.3	Ensuing Need for Research	52

<b>4</b>	<b>Performance Management Concept to Evaluate and Improve the Energy Efficiency of Machine Tools</b>	<b>53</b>
4.1	Concept Objective and Preconditions	53
4.1.1	Objective	53
4.1.2	Functional Requirements and Preconditions	54
4.2	Concept Layout and Structure	55
4.3	Determination of an Energy Performance Limit	57
4.3.1	Energy Performance Limits	57
4.3.2	Performance Analysis of Transformation Processes using Production Frontiers	60
4.3.3	Specification of Energy Production Frontiers for Machine Tools	63
4.3.4	Formulation of Energy Performance Limits for Machine Tools	78
4.4	Measurement of Actual Performance for Machine Tools	80
4.4.1	Measurands of the Energy Performance Indicators	80
4.4.2	Planning of Experimental Power Measurement	81
4.4.3	Definition of a Measuring Strategy for Machine Tools	85
4.5	Energy Breakdown Analysis	87
4.5.1	Specification of Potential for Improvement	87
4.5.2	Concurrent Power and Machine Data Analysis	89
4.5.3	Proposition of Improvement Opportunities	94
4.6	Improvement Planning	97
4.6.1	Interlinking of Energy Performance Limits and Improvement Measures	97
4.6.2	Specification of Improvement Measures	98
4.6.3	Formulation of Improvement Policies	101
4.7	Integration of Concept Modules into a Continuous Improvement Process	102
4.7.1	Workflow for Energy Performance Management	102
4.7.2	Evaluation of Energy Efficiency	104
4.7.3	Improvement of Energy Efficiency	108
<b>5</b>	<b>Towards Implementation</b>	<b>111</b>
5.1	Initial Situation	111
5.2	Procurement of Energy Efficient Machine Tools	114
5.2.1	Goal and Scope Definition	114
5.2.2	Initialization of Energy Performance Limits	114
5.2.3	Quantification of Energy Efficiency Gap	117
5.3	Evaluation and Improvement of Energy Efficiency for Existing Machine Tools	121
5.3.1	Goal and Scope Definition	121
5.3.2	Quantification of Energy Efficiency Gap	122
5.3.3	Planning of Improvement Measures	125

**6 Summary and Outlook** . . . . . 131

6.1 Summary . . . . . 131

6.2 Critical Review . . . . . 133

6.3 Outlook on Future Research . . . . . 135

**Appendix** . . . . . 137

**References** . . . . . 143

**Index.** . . . . . 157

Transition Towards Energy Efficient Machine Tools

Zein, A.

2012, XIV, 162 p., Hardcover

ISBN: 978-3-642-32246-4
