Advances

A new concept of diffuse (low-grade) glioma surgery. H. DUFFAU, Department of Neurosurgery, Gui de Chauliac Hospital, Montpellier University Medical Center, Montpellier, France and Team “Plasticity of Central Nervous System, Human Stem Cells and Glial Tumors”, INSERM U1051, Institute for Neuroscience of Montpellier, Hôpital Saint Eloi, CHU Montpellier, Montpellier, France

Abstract	3
Introduction.	4
Technical and conceptual limitations of functional and oncological neuroimaging	5
Individual intrasurgical cortical mapping.	7
Subpial dissection with vasculature preservation	8
Subcortical mapping with preservation of the neural connectivity.	13
Motor pathways	15
Somatosensory tracts	15
Optic radiations	15
Language pathways.	15
Pathways underlying spatial cognition.	18
Functional and oncological results.	20
Conclusions and perspectives.	22
References.	23

Spinal cord injury and its treatment: current management and experimental perspectives. F. SCHOLTES¹, G. BROOK², and D. MARTIN¹, ¹Department of Neurosurgery, Centre Hospitalier Universitaire, University of Liege, Liege, Belgium, ²Institute for Neuropathology, University Hospital, RWTH Aachen University, Aachen, Germany

Abstract	30
Introduction.	31
Incidence and prevalence	31
Individual and socio-economical impact.	31

Neurobiology of SCI.....	32
Spinal cord syndromes.....	32
The spinal cord lesion.....	32
Evolution of the lesion after the initial trauma.....	32
Human spinal cord injury.....	34
Axonal regeneration.....	37
The sub-lesional segment.....	39
Influence of spinal cord white matter on neurological recovery.....	39
Fundamental therapeutic approaches.....	39
Neuroprotection.....	40
Repair of the lesion site.....	40
Recruiting preserved tissue.....	41
The locomotor system.....	41
Spinal cord plasticity.....	42
Current clinical treatment.....	43
Acute management.....	43
Surgery.....	43
Chronic care.....	44
Clinical trials.....	44
Neuroprotective strategies.....	45
Pharmacological interventions.....	45
Systemic hypothermia.....	46
Decompression strategies.....	46
Restorative therapies.....	46
Rehabilitation.....	48
Conclusion.....	49
References.....	50

Percutaneous biopsy through the foramen ovale for parasellar lesions: surgical anatomy, method, and indications. M. SINDOU¹, M. MESSERER¹, J. ALVERNIA², and G. SAINT-PIERRE³, ¹Department of Neurosurgery, Hôpital Neurologique Pierre Wertheimer, University of Lyon 1, Lyon, France, ²Department of Anatomy, University of Lyon 1, Lyon, France, ³Department of Pathology, University of Lyon 1, Lyon, France

Abstract.....	57
Introduction.....	58
Surgical anatomy.....	60
Method.....	65
Selection of patients and preoperative evaluation.....	65
Operative procedure.....	66
Surgical technique.....	66
Tissue harvesting.....	68
Pathological examination.....	68
How to avoid complications.....	68
Limitations of the method.....	70

Indications.....	70
Conclusions.....	72
References.....	72

Percutaneous pedicle screw implantation for refractory low back pain: from manual 2D to fully robotic intraoperative 2D/3D fluoroscopy. C. RAFTOPOULOS, F. WATERKEYN, E. FOMEKONG, and T. DUPREZ*, Department of Neurosurgery and Neuroradiology*, Clinique Universitaire St-Luc, Brussels, Université catholique de Louvain, Louvain-la-Neuve, Belgium

Abstract	76
Abbreviations	76
Pedicle screws for better fusion rate	76
From open to percutaneously placed pedicle screws (PPS)	77
Large open posterior approach	77
Less aggressive posterior approaches.....	77
Percutaneous: three main problems	79
Need for better intraoperative control.....	79
CT outside the OR	79
Intraoperative 2D/3D fluoroscopic systems.....	79
Does i2D/3DF mean fewer complications?	80
Our experience with the Artis Zeego.....	80
Our population	80
2D/3D Artis Zeego	81
Our surgical process	82
Pedicle breach quantification	83
Preoperative virtual surgery for the difficult cases.....	83
Our results: fewer complications	83
Other experiences	86
Regarding PPS breach rates	86
All complications using PPS	87
Few exceptional good results: analysis method related?	88
Potential problem: higher radiation doses	88
And robotic PPS insertion?.....	90
Conclusions.....	90
References.....	91

Technical standards

The choroidal fissure: anatomy and surgical implications. I. ZEMMOURA, S. VELUT, P. FRANÇOIS, CHU de Tours, Service de Neurochirurgie, 2 Boulevard Tonnellé, Tours, France

Abstract	97
Embryology	98

Anatomy and surgical implications	98
Rostral portion (body portion)	101
Veins.....	101
Arteries	103
Surgical implications	104
Dorsal portion (atrial portion)	108
Veins.....	108
Arteries	108
Surgical implications	109
Caudal portion (temporal portion)	109
Veins.....	110
Arteries	110
Surgical implications	111
Conclusion.....	111
References.....	112

Decompressive craniectomy – operative technique and perioperative care.

I. TIMOFEEV, T. SANTARIUS, A. G. KOLIAS, and P. J. A. HUTCHINSON, Academic Neurosurgery Unit, Department of Clinical Neurosciences, University of Cambridge, Addenbrooke's Hospital, Cambridge, United Kingdom

Abstract	115
Introduction.....	116
Indications, contraindications and types of craniectomy	116
Patient selection and preoperative care.....	119
Surgical technique of bifrontal decompressive craniectomy.....	120
Surgical technique of hemicraniectomy	125
Post-operative care.....	128
Complications of decompressive craniectomy.....	129
Cranioplasty	130
Conclusions.....	131
References.....	131

Management of cortical dysplasia in epilepsy. S. FAUSER and J. ZENTNER, Department of Neurosurgery, University of Freiburg, Freiburg, Germany

Abstract	137
Introduction.....	138
Detailed review of the literature	139
Histological appearance	139
Theories concerning the pathogenesis of FCD	143
Clinical presentation of FCD in adults and children.....	143
Presurgical monitoring	145
Surgical procedures and postoperative outcome	151

Contents	XI
Long-term outcome	152
Reoperation, complications and mortality rate of epilepsy surgery in FCD patients	153
Prognostic factors: seizure outcome	153
Prognostic factors: neuropsychological outcome	156
Conclusions and proposals for the future	156
References	157
Author index	165
Subject index	179
