|-------------------------------------------------------------------------------------------------------|-----|
| <b>1 Skills, Knowledge, and Translational Technologies Leading to Novel Vaccines</b> . . . . .        | 1   |
| Şefik Ş. Alkan                                                                                        |     |
| <b>2 Finding Protective Bacterial Antigens</b> . . . . .                                              | 27  |
| Guido Grandi and Eszter Nagy                                                                          |     |
| <b>3 Enhancing and Tailoring the Immunogenicity of Vaccines with Novel Adjuvants</b> . . . . .        | 45  |
| Christopher B. Fox, Benjamin Wizel, Steven G. Reed, and Derek T. O'Hagan                              |     |
| <b>4 Vaccine Delivery: Beyond Needles</b> . . . . .                                                   | 73  |
| David C. Flyer and Barbara Butler                                                                     |     |
| <b>5 Employing Live Microbes for Vaccine Delivery</b> . . . . .                                       | 87  |
| Holger Loessner, Astrid Schwantes, Matthias Hamdorf, Uliana Komor, Sara Leschner, and Siegfried Weiss |     |
| <b>6 Synthesizing Vaccines with Microbes</b> . . . . .                                                | 125 |
| Michael Wacker and Danilo R. Casimiro                                                                 |     |
| <b>7 Purification and Formulation: Silent but Important Players in Vaccine Development</b> . . . . .  | 145 |
| Robert Schlegl and Rainer Hahn                                                                        |     |
| <b>8 Cutting-Edge Approaches Toward Novel and Cross-Protective Influenza Vaccines</b> . . . . .       | 189 |
| Ruth Arnon and Tamar Ben-Yedidia                                                                      |     |
| <b>9 Cutting Edge Approaches Toward Novel and Cross-Protective Influenza Vaccines</b> . . . . .       | 205 |
| Kenny Roose, Michael Schotsaert, Karim El Bakkouri, Bert Schepens, Walter Fiers, and Xavier Saelens   |     |
| <b>10 Examples of Novel Registered Prophylactic Vaccines, HPV, and JEV</b> . . . . .                  | 233 |
| Katrin Dubischar-Kastner, Michelle Vichnin, and Carlos Sattler                                        |     |

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| <b>11 The Bumpy Road Toward Vaccine Registration: How to Overcome<br/>Regulatory Hurdles</b> ..... | 287 |
| Michael Pfeiderer                                                                                  |     |
| <b>Index</b> .....                                                                                 | 301 |

Development of Novel Vaccines

Skills, Knowledge and Translational Technologies

von Gabain, A.; Klade, C. (Eds.)

2012, XIV, 306 p. With online files/update., Hardcover

ISBN: 978-3-7091-0708-9
