
Contents

1 Bioinformatic Tools for the Search of Disease-Associated Variations	1
Stefan Coassin, Anita Kloss-Brandstätter, and Florian Kronenberg	
2 Cloud Computing	27
Lukas Forer, Sebastian Schönherr, Hansi Weißensteiner, Günther Specht, Florian Kronenberg, and Anita Kloss-Brandstätter	
3 High-Throughput Characterization and Comparison of Microbial Communities	37
Bettina Halwachs, Gregor Gorkiewicz, and Gerhard G. Thallinger	
4 Microarray Meta-Analysis: From Data to Expression to Biological Relationships	59
Julia Feichtinger, Gerhard G. Thallinger, Ramsay J. McFarlane, and Lee Larcombe	
5 Analysis of Labeled Quantitative Mass Spectrometry Proteomics Data	79
Florian Paul Breitwieser and Jacques Colinge	
6 Lipidomics, Mass Spectrometry, and Bioinformatics	93
Jürgen Hartler, Harald C. Köfeler, Christopher J.O. Baker, Ravi Tharakan, and Gerhard G. Thallinger	
7 Protein Sequence–Structure–Function –Network Links Discovered with the ANNOTATOR Software Suite: Application to ELYS/Mel-28	111
Georg Schneider, Westley Sherman, Durga Kuchibhatla, Hong Sain Ooi, Fernanda L. Sirota, Sebastian Maurer-Stroh, Birgit Eisenhaber, and Frank Eisenhaber	
8 3D Structure and Drug Design	145
Kristina Djinović-Carugo and Oliviero Carugo	
9 Integrating Biomolecular and Clinical Data for Cancer Research: Concepts and Challenges	159
Pornpimol Charoentong, Hubert Hackl, Bernhard Mlecnik, Gabriela Bindea, Jerome Galon, and Zlatko Trajanoski	

10	Applied Data Mining: From Biomarker Discovery to Decision Support Systems	173
	M. Osl, M. Netzer, S. Dreiseitl, and C. Baumgartner	
11	Network-Based Methods for Computational Diagnostics by Means of R	185
	Laurin A.J. Mueller, Matthias Dehmer, and Frank Emmert-Streib	
	Index	199
