Contents

1 Introduction 1
- 1.1 The History of Equitable Life 2
- 1.2 Revised Supervision and Valuation Methodology 4
  - 1.2.1 The Swiss Solvency Test (SST) 5
  - 1.2.2 Solvency II 7
  - 1.2.3 Market Consistent Embedded Value (MCEV) 10
  - 1.2.4 Comparison of the Introduced Approaches 11
- 1.3 Research Question and Objectives 13
- 1.4 Outline 14

2 Theoretical Considerations Regarding Embedded Options 17
- 2.1 Types of Embedded Options and Guarantees 18
- 2.2 Literature Survey 23
- 2.3 Conclusions for the Modelling Framework 39

3 Asset Modelling Process 41
- 3.1 Defining a Proxy for the Asset Modelling 42
- 3.2 Basics of Stochastic Modelling 43
- 3.3 The Share Price Process and the Property Price Process 46
  - 3.3.1 Calibration of the Share Price Process and the Property Price Process 48
  - 3.3.2 Generating Stochastic Scenario Files for the Share Price Process and the Property Price Process 50
- 3.4 Basics of Interest Rate Theory 51
  - 3.4.1 The Short Rate 51
  - 3.4.2 Forward Interest Rate and Interest Rate Curves 53
- 3.5 The Bond Price Process 55
  - 3.5.1 The Cox-Ingersoll-Ross (CIR) Model 56
  - 3.5.2 The Hull-White (HW) Model 59
  - 3.5.3 The Two Additive Factor Gaussian (G2++) Model 63
  - 3.5.4 Comparison of the Interest Rate Model Calibration 70

3.6 Generating Stochastic Scenario Files for the Bond Price Process ... 74
3.7 Using the Stochastic Scenario Files for Modelling Purposes 78

4 Liability Modelling Process 83
4.1 The Initial Values of the Balance Sheet Entries 84
4.2 The Entire Modelling Algorithm 92
4.3 Using the Model's Output to Determine an Option's Value 97
4.4 A Sample Simulation 98

5 An Empirical Analysis Using the Entire Modelling Approach 103
5.1 The Basic Simulation Run 104
5.1.1 A Summary of the Key Results of the Basic Simulation Run 115
5.2 Variation of the Shareholder Margin 116
5.3 Variation of the Interest Rate Model to Generate Stochastic ZCB Prices 120
5.4 Variation of the Asset Allocation 124
5.5 Analysis of as at the End of 2004 Data 127
5.6 Variation of the Market Interest Rates 131
5.7 Variation of the Surplus Distribution Mechanism 134
5.8 Variation of the Surplus Determination 136
5.9 Simulating a Mortality Shock 140
5.10 A Conclusion on the Sensitivity Analysis 142

6 Conclusion 145
6.1 Outlook for Further Research 149

A Calibration Data Basis 151
A.1 Calibration Data Basis as at the End of 2009 151
A.2 Calibration Data Basis as at the End of 2004 152

B Additional Information on the Basic Simulation Run 157
